Driving Factors of Change

The growing demand for education can only be solved by leveraging technology

- Accessibility
- Affordability
- Accountability
- Employability

Explaining Economic Growth (Figure 3)

How much students learn, not how long they stay in school, is the key to economic growth. The United States, however, has had a higher growth rate during this period than would be expected given its test scores and levels of school attainment.

Note: The y-axis indicates growth rates from 1960 and 2000, adjusted for GDP in 1960 and school attainment. The x-axis shows test scores adjusted for school attainment. The solid line plots the relationship between the two variables among the 50 countries with available test score information, each of which is represented by a dot.

Student faces Facebook consequences

Freshman hit with 147 academic charges for online study network at Ryerson University

Mar 06, 2008 04:30 AM

LOUISE BROWN
EDUCATION REPORTER

Study groups may be a virtual trademark of the Ivory Tower – but a virtual study group has been slammed as cheating by Ryerson University.

ANDREW WALLACE/TORONTO STAR

Ryerson student Chris Avenir is facing expulsion for taking part in a Facebook study group for one of his engineering courses.

First-year student Chris Avenir is fighting charges of academic misconduct for helping run an online chemistry study group via Facebook last term, where 146 classmates swapped tips on homework questions that counted for 10 per cent of their mark.

The computer engineering student has been charged with one count of academic misconduct for helping run the group – called Dungeons/Mastering Chemistry Solutions after the popular Ryerson basement study room engineering students dub The Dungeon – and another 146 counts, one for each classmate who used the site.

Avenir, 18, faces an expulsion hearing Tuesday before the engineering faculty appeals committee. If he loses that appeal, he can take his case to the university's senate.
