

IV — GENERAL ASSEMBLY: IMPORTANT VOTES AND CONSENSUS ACTIONS

Public Law 101-246 calls for analysis and discussion of “votes on issues which directly affected United States interests and on which the United States lobbied extensively.” An important basis for identifying issues is their consistency with the State Department’s Strategic Goals. For the 65th UN General Assembly (UNGA) in 2010, 15 votes and seven consensus resolutions were identified for inclusion in this section.

Section IV contains five parts: (1) a listing and description of the 15 important UNGA votes; (2) a listing and description of the seven important UNGA consensus resolutions; (3) voting coincidence percentages with the United States on these important actions that were adopted by votes, arranged alphabetically by country; (4) voting coincidence percentages by UN regional groups and other important groups; and (5) a comparison of voting coincidence percentages on important votes with those on overall votes from Section III. An additional column in the tables of important votes (parts three and four above) presents the percentage of voting coincidence with the United States after including an adjusted, country-specific portion of all consensus resolutions as additional identical votes. Since not all states are equally active at the United Nations, these coincidence percentages were refined to reflect a country’s rate of participation in UN voting overall. The participation rate was calculated by dividing the number of Yes-No-Abstain votes cast by a UN member in Plenary (i.e., the number of times it was not absent) by the total number of Plenary votes (87), and then multiplying that country’s participation rate by all 194 consensus resolutions.

IMPORTANT VOTES

The following 15 important votes are identified by title, resolution number, date of vote, and results (Yes-No-Abstain), with the U.S. vote noted. For each vote, a short description of the issue and U.S. policy considerations is provided. Where available, hyperlinks to additional explanatory material, as well as official U.S. statements, are provided. The resolutions are listed chronologically. Full texts of all resolutions can or will be found on the United Nations website, at: <http://www.un.org/ga/65/resolutions.shtml>. In the left-hand column, all resolutions are listed numerically. Where underscored, resolution numbers are linked to their texts. Some resolutions were not yet linked by the submission date of this report.

1. U.S. Embargo of Cuba

A/Res/65/6

October 26

187-2(US)-3

The United States imposed a trade and financial transaction embargo on Cuba in 1960, because of Castro’s repressive policies and expropriation of U.S. property without compensation. The United States strengthened the embargo in 1962, 1992, and 1996. The UNGA has adopted a resolution condemning this embargo every year since 1992.

4. United actions toward total elimination of nuclear weapons

A/Res/65/72

December 8

173(US)-1-11

While the United States has made progress in many areas toward the goal of a world without nuclear weapons, it will require strengthening the global nonproliferation regime and addressing urgent nonproliferation challenges, including enhanced IAEA safeguards, cooperation to defeat proliferation networks, and improved security for vulnerable nuclear material. Progress on disarmament and nonproliferation is not an either-or proposition, but rather represents two aspects of the same goal.

A/Res/65/225

December 21

106(US)-20-57

The human rights situation remains grave in North Korea. The government controls almost all aspects of citizens' lives and refuses to allow international evaluation of human rights conditions.

The United States strongly supported this resolution as demonstrating the international community's concern over the human rights situation in the D.P.R.K., the desire to hold the government accountable for its human rights violations, and to improve the situation of human rights there.

13. Situation of Human Rights in the Islamic Republic of Iran

A/Res/65/226

December 21

78(US)-45-59

The international community remains deeply concerned over the deteriorating human rights situation in Iran and the government's failure to uphold its obligations under its own constitution and international human rights law. The world continues to bear witness to those in Iran who are trying to exercise their universal rights. This resolution signals that their voices are being heard.

14. Global Efforts for the Total Elimination of Racism, Racial Discrimination, Xenophobia and Related Intolerance and the Comprehensive Implementation of and Follow-up to the Durban Declaration and Program of Action

A/Res/65/240

December 24

104-22(US)-33

This resolution decided to mark the 10th anniversary of the Durban Declaration with a meeting in New York in September 2011. The United States did not support the 2001 declaration and program of action, because of its unbalanced focus on the Israeli/Palestinian conflict. Resolution 240 also supported the 2009 Durban Review Conference outcome document (which reaffirmed the 2001 outcome), and conflicted with U.S. positions that support freedom of expression and religion.

15. Situation of Human Rights in Myanmar (Burma)

A/Res/65/241

December 24

85(US)-26-46

The Burmese regime's political repression, forced relocations, massive human rights violations, military offensives against ethnic minorities, restrictions on international humanitarian organizations, and the use of rape as a tool of political intimidation have resulted in the destabilizing outflow of over a million Burmese to neighboring countries; cross-border trafficking in narcotics and persons; the spread of communicable diseases such as HIV/AIDS, malaria, and tuberculosis; and the internal displacement of between 500,000 and 1 million people.

The United States remains committed to supporting the people of Burma, and believes that adopting this resolution keeps world pressure and attention focused on a regime that disregards the basic rights and universal freedoms of its people.

2. Protection of global climate for present and future generations of humankind

A/Res/65/159

December 20

Resolution 159 recognized that climate change poses serious risks and challenges to all countries, and also called on all countries to show strong political will in working cooperatively toward achieving the ultimate objective of the UN Framework Convention on Climate Change and addressing the challenge of climate change.

6. Human Resources Management

A/Res/65/247

December 24

As part of its continuing effort to reform the United Nations, the United States played a key role in the General Assembly's adoption of a resolution that completed human resource management reforms begun two years ago that streamlined a constellation of sixteen different types of staff contracts into a framework of just three types of contracts: temporary, fixed-term, and continuing. This resolution specified the modalities for granting continuing contracts to the most qualified personnel within the United Nations.

7. Proposed program budget outline for the 2012-2013 biennium

A/Res/65/262

December 24

The Fifth Committee invited the Secretary General to prepare the 2012-2013 biennium budget on the basis of the \$5.397 billion estimate: in effect, requesting that the proposed budget not reflect a substantial increase from the current biennium. The United States succeeded in including a key paragraph in the resolution requesting the Secretary General to propose measures to offset budget increases in an effort to emphasize further the need for budget discipline in the next biennial budget.

IMPORTANT VOTES: COMPARISON WITH UNITED STATES

The table that follows summarizes UN member state performance at the 65th General Assembly in comparison with the United States on 13 of the 15 important votes. Resolutions 195 and 208, on which the United States abstained, are omitted. This table shows what each member did for each of the 13 votes.

The table is alphabetical by country. Each vote is listed in the table by the number assigned to it below.
