OPEN GOVERNMENT WEB PAGES ........................................................................................................... 75
Executive Summary

The Department of State is pleased to issue this updated Open Government Plan. The plan reflects the personal commitment of the Secretary of State as well as that of the entire Department of State (Department) to the principles and practices of Open Government. The plan focuses on the three imperatives of Open Government:

- Transparency – providing information to enable the American people to view the Department’s activities and products, and ensure accountability for results;
- Participation – enabling the public to engage on issues of importance and make their voices heard; and
- Collaboration – sharing information and ideas, and working cooperatively with partners around the world to promote the foreign policy interests of the United States.

The Department is responsible for carrying out the nation’s foreign policy and representing the United States abroad. It is essential that we take every opportunity to engage the American people as we do this vital work on their behalf.

Highlighting the level to which transparency, participation and collaboration have been integral to the work of the Department of State since its inception, this Open Government Plan identifies “Open Government” initiatives, such as the public participation in the policy process through the incorporation of a library into the Department of State in 1789, or the promotion of transparency through the timely publication of internal diplomatic documents in the “Foreign Relations of the United States” series in 1861.

The Department has a longstanding history and commitment to sharing information with the public about the diplomatic work that we conduct domestically and overseas. The ways in which we communicate internally, with
other agencies and organizations, and to the public have changed significantly with the development of new technologies and social media, and they will undoubtedly continue to change as further advances in communication are discovered.

Our era is now one in which, in addition to face-to-face meetings and writing letters or speaking by telephone, people engage with each other and with their governments through digital networks, sharing data and perspectives in real-time, and collaborating effectively in ways that would not have been possible a quarter of a century ago. In this inter-connected era, as noted in the 2015 Quadrennial Diplomacy and Development Review (QDDR), “our diplomats and development professionals must focus on strengthening partnerships with civil society, citizen movements, faith leaders, entrepreneurs, innovators and others who share our values.” Many of the initiatives in this Open Government Plan, ranging from traditional “Advisory Councils, Commissions, Committees and Boards” to providing online digital mapping tools and data, highlight the broad scope of the collaborative efforts that support the implementation of our foreign policy.

Public engagement in the work of the Department of State not only provides the Department with a wider range of perspectives and expertise than it might otherwise have, but it also serves to exemplify the type of good governance which is representative of the democratic values we encourage. Again, as stated in the QDDR, “Societies that allow citizens a say and a stake in their success are more stable, prosperous, and secure.” To facilitate public engagement, the Department provides numerous avenues for public participation, whether through posting a comment to one of the numerous policy blogs or social media channels established by the Department of State and U.S. embassies around the world, commenting on proposed regulation changes via the Regulations.gov website, or by participating as a virtual intern or fellow in the Virtual Student Foreign Service or Virtual Fellows Program. The Department benefits greatly from public engagement, and is continually expanding the mechanisms by which the public’s voice can be incorporated into policy formulation.

The Department has long recognized the importance of transparency as a means of holding government accountable and engendering the public confidence necessary for a well-functioning democracy. Transparency is a key element of the Open
Government Partnership, through which the U.S. government, represented primarily by the Department, works with other governments, international organizations and civil society organizations to promote transparency, empower citizens, fight corruption, and harness new technologies to strengthen governance. Among the many transparency initiatives the Department has in place are the publication of U.S. government assessments concerning human rights practices, terrorism, religious freedom, trafficking in persons and the investment climate. Data concerning foreign assistance, refugee and migration flows, visa and passport issuances, and numerous other Department processes are published in machine readable formats. The “No Double Standard” principle has long guided the Department in ensuring that it provides private U.S. citizens the same information which it provides to U.S. government employees in safeguarding the welfare of all our citizens. Similarly, in as much as policy decisions within the Department are informed by accurate and reliable data, the Department seeks to make that same data accessible by the public to better inform public decision making.

Building on flagship Department of State Open Government initiatives from previous years, the Department has sought to integrate these initiatives even more closely into its main foreign policy initiatives, such as “Harnessing the Data Revolution for Sustainable Development,” Advancing Democracy and Human Rights, and Strengthening Civil Society,” and “Modernizing the Way We Do Diplomacy and Development.”
Introduction

“The Government continually depends upon the support of Congress and the People, and that support can be expected only in the condition of keeping them thoroughly and truthfully informed of the manner in which the powers derived from them are executed.”
William Henry Seward
Secretary of State, 1861-69

On his first day in office, President Obama signed the Memorandum on Transparency and Open Government and made clear his commitment to “creating an unprecedented level of openness in government.” The President laid out the three core principles that would promote efficiency and effectiveness in government: transparency, public participation, and collaboration.

This document, the Department of State's fourth biennial Open Government Plan, serves as a public road-map detailing the Department's progress in integrating these open government principles into our core mission, and how we will continue to support this goal in the future.

Long before the rise of technology and the advent of the Internet, transparency, participation and collaboration were key to achieving U.S. foreign policy goals. Aspiring to Woodrow Wilson’s goal of "open covenants of peace, openly arrived at," we rely on collaborative effort through treaty negotiation and participation in international organizations. Since the establishment of the Department of State in 1789, our internal library (now the Ralph Bunche Library) has facilitated public input into the foreign policy process. We institutionalized transparency in the Department of State with the inaugural publication of the “Foreign Relations of the United States” series in 1861. In 1967, Secretary of State Rusk launched the Secretary’s Open Forum, encouraging creative thinking on vital policy issues and the presentation of visions and viewpoints that dissented from official policy. Since 1977, the transparency of our annual human rights reports has enhanced our credibility and promoted accountability and consistency in our global engagements.
Every bureau in the Department contributes to Open Government, as the range of initiatives geared to transparency, participation and collaboration makes clear. With the environment having changed from one of paper missives and telegrams to cloud-based collaboration, social media and mobile devices, we’ve adapted to meet public expectations and our own needs in order to accomplish our foreign policy mission. With over 80 ongoing Open Government initiatives ranging from Overseas Security Advisory Councils (OSAC) to the Business Information Database System (BIDS), to the Virtual Student Foreign Service (VSFS), to Exchange Programs, to publishing per diem and allowance schedules online, and many more, the principles of Open Government are now the longstanding principles under which we operate.

The Department now makes thousands of datasets available to the public on the Internet, ranging from the 190,000+ archival documents from the *Foreign Relations of the United States* (FRUS) series digitized by the Office of the Historian, to digital imagery and maps produced by the Humanitarian Information Unit, to visa statistics, foreign assistance figures, and Inspection reports from the Office of the Inspector General. The Department has made a number of these datasets, such as FRUS and Per Diem rates, accessible via Application Programming Interfaces (APIs) so that the data can be embedded in third-party applications.

With the publication of the 2016 Open Government Plan, we survey the current terrain and identify the way forward. There is much we have already done and there is much we are committed to achieving.
New and Expanded Initiatives

Open Data

On May 9, 2013, the Office of Management and Budget (OMB) set forth an Open Data policy via M-13-13, requiring all agencies to manage data as an asset. The policy’s goals are to increase operational efficiencies at reduced costs, improve services, and increase public access to government information. For data to be considered open, it must be machine readable using open data standards and licenses, and adhere to a government-wide common core metadata standard. The five core deliverables of M-13-13 are the following:

- Create and maintain an Enterprise Data Inventory (EDI);
- Create and maintain a Public Data Listing;
- Create a process to engage with customers to help facilitate and prioritize data release;
- Document if data cannot be released; and
- Clarify roles and responsibilities for promoting efficient and effective data release.

The Department of State creates and disseminates datasets about U.S. foreign policy, international diplomacy, and global issues. The data supports analysis of U.S. foreign policy initiatives and trends and is used by experts in specific issue areas as well as experts in the process of diplomacy. The data is also used by the general public to explore the history of U.S. international relations.

The Open Government initiative provides an opportunity to increase access to and use of the datasets available to the public. Datasets that are currently available are located on the Data.gov website, and new datasets will be published there as they are made available. These datasets may be found by selecting the Department of State from the https://www.data.gov/metrics page. The datasets can also be accessed through the Department’s Open Government page at: www.state.gov/open.
The Department has published its policies with regard to implementing data management in volume 5, chapter 639 of the Foreign Affairs Manual (5 FAM 639). The Department of State currently maintains a Department-wide Enterprise Data Catalog, which is a collection of all information assets registered by data owners and system owners. As part of an ongoing process, the datasets associated with existing systems have been populated as system owners update their entries in the Enterprise Data Catalog. System owners are required to enter the dataset information for the new systems as part of their initial Enterprise Data Catalog system registration.

Datasets belong to one of the three following categories:

- Public – Data asset is or could be made publicly available to all without restrictions;
- Restricted Public – Data asset is available under certain use restrictions; and
- Non-Public – Data asset is not available to members of the public. Public data in the EDI is exported to a Public Data Listing (PDL), where anyone can download the index and use it to access the public data. The PDL is also used by Data.gov to create a searchable index to all available public data published by the U.S. government. The PDL is at: www.State.gov/data and contained in a single JSON file. The PDL is refreshed quarterly. The process of collecting and publishing open data is shown in Figure 1.
Figure 1: Open Data Concept of Operations.

For more information on Open Data, including a pointer to the Open Data Plan and Inventory Schedule and a copy of the most recent Public Data Listing, visit the Open Data page at: www.state.gov/data. The Department of State is also an active participant in Data.gov, where three application program interfaces (APIs) are available for the public to use: Foreign Per Diem Rates, Office of the Historian eBook Catalog and the Select State.Gov Data tool (SSD). More information on Data.gov is discussed under the Transparency section of this plan.
Proactive Disclosures

The Department continues to regularly post documents on the FOIA public website at: foia.state.gov. These documents are released under the provisions of the Freedom of Information Act (FOIA), mandatory declassification review requests under Executive Order 13526, or other declassification reviews. Documents released in response to a Privacy Act request are not posted online. The Department strives to post additional documents to the FOIA website no less than once a month. The amount of information on our FOIA website highlights the Department’s commitment to transparency and Open Government. This FOIA Virtual Reading Room contains over 139,000 documents covering a wide range of topics. To make posted information easier for the public to discover, each document is converted to the PDF format before the documents go through an optical character recognition process.

Documents in the Virtual Reading Room can be retrieved based on the date of the document, the date they were posted to the site, the FOIA case number they were processed under or a word search of the electronic text of the documents. Over 29,000 documents have been added thus far to the website in FY 2016. The site has a wealth of other links to additional information resources inside and outside the Department, including a link to the millions of pages of declassified Department of State records available online at the National Archives and Records Administration. In addition, other bureaus within the Department posts documents and information of wide public interest on the Department’s main webpage at: www.state.gov. The Department provides datasets, in a range of formats, in response to the Open Government Initiative and other requirements.

From mid-2015 through February 2016, the Department undertook an unprecedented project to review and release approximately 30,000 documents consisting of former Secretary Clinton’s e-mails. Along with establishing a streamlined process, this project required innovative use of technology to coordinate, review and release a large volume of material on a monthly basis. It also marked the first time that the Department released documents to the public by posting them directly to the FOIA website.
Privacy

The Privacy Act was passed in 1974 to establish controls over what personal information is collected, maintained, used and disseminated by agencies in the executive branch of the federal government. The Privacy Act only applies to records that are located in a “system of records.” As defined in the Privacy Act, a system of records is “a group of any records under the control of any agency from which information is retrieved by the name of the individual or by some identifying number, symbol, or other identifying particular assigned to the individual.” The Privacy Act guarantees three primary rights: the right of individuals to see records about themselves, subject to Privacy Act exemptions; request the amendment of records that are not accurate, timely or complete; and have protection against unwarranted invasion of their privacy resulting from the collection, maintenance, use, and disclosure of personal information.

The Bureau of Administration (A) is the focal point for the many complex and diverse activities relating to privacy protection, promoting consistent implementation of privacy policies and legal requirements. The A Bureau coordinates responses to, and implementation of, White House directives, and leads the Department’s responses to OMB and the Government Accountability Office (GAO) data calls and inquiries relating to privacy policy. It also leads and coordinates multi-functional projects, studies and research activities to identify and address privacy issues, and participates in various inter- and intra-agency boards, committees, and groups. Additionally, they review legislative and other initiatives proposed by Congress, other agencies and the public, and formulate the Department’s privacy policy. It provides technical expertise to the Department’s Privacy Protection Governance Board (PPGB) and the PPGB’s personally identifiable information (PII) coordinators. The A Bureau directs the Core Response Group which addresses data breaches and conducts reviews of privacy impact assessments (PIAs) to ensure that privacy requirements are fully integrated into the Department’s information technology systems. It supports implementation of the E-Government Act of 2002 and relevant portions of the Federal Information Management Security Act (FISMA).
The A Bureau serves as the Department’s technical expert on the Privacy Act, responding to inquiries concerning privacy issues and concerns by conducting follow-up when necessary. The A Bureau also works with Department of State business owners to assist with the development or alteration of System of Records Notices (SORNs) and coordinates Department responses regarding breach notifications to affected bureaus or individuals. For a complete list of the Department’s records collections systems, go to the Privacy Impact Assessments (PIAs) and the SORNs pages.

Whistleblower Protection

The Whistleblower Protection Act strengthens protections for federal employees who believe they have been subjected to unjustified personnel actions in reprisal for their whistleblowing activities. The Whistleblower Protection Enhancement Act of 2012 was signed into law in November 2012 and provides that the implementation and enforcement of nondisclosure agreements by the Department shall be consistent with the existing statutory framework for whistleblower protections. The Department is committed to ensuring that all employees understand and are aware of the prohibited personnel practices (PPPs) and whistleblower protections.

PPPs are employment-related activities that are banned in the federal workforce because they violate the merit system through some form of employment discrimination, retaliation, improper hiring practices, or failure to adhere to laws, rules, or regulations that directly concern the merit system principles, and are, by statute, forbidden in the federal government. The Office of Special Counsel (OSC) is an independent agency that investigates and prosecutes allegations of PPPs. Pursuant to 5 U.S.C. § 2302(b), Federal employees are prohibited from retaliating against whistleblowers. Whistleblowing involves the act of disclosing information that an employee reasonably believes evidences a violation of any law, rule or regulation; gross mismanagement; a gross waste of funds; an abuse of authority; or a substantial and specific danger to public health or safety. Employees who are aware of these protections are encouraged to come forward to report possible violations.
A complete list of PPPs is available on OSC's website at: https://osc.gov, which provides important information about Federal employee rights, PPPs, whistleblowing, and disclosure procedures. The Department of State has not yet been certified through the OSC's Whistleblower Protection Act certification program; however, the Department has communicated to its employees through various channels, such as an intranet site and Department Notices on employee rights, how to report complaints alleging PPPs, the role of OSC, and additional information regarding whistleblowing.

Additional information regarding the Whistleblower Protection Enhancement Act of 2012, including the Department’s obligations regarding the implementation and enforcement of nondisclosure agreements consistent with Federal whistleblower protections can be found at http://www.state.gov/s/ocr/205593.htm.

**Websites**

In compliance with the E-Government Act of 2002, the Department of State is developing and continuing to enhance several website features to improve customer service. On May 23, 2012, the Administration launched a comprehensive Digital Government Strategy to deliver better digital services to the American people. The Department maintains a web page at www.state.gov/digitalstrategy that contains the status of the milestones of the Digital Strategy initiatives.

The Department is committed to promoting the innovative application of Department data in the public and private sectors. The Department’s Developer Community connects developers with the APIs they need to unlock government data. Their website, at http://www.state.gov/developer, serves as the main resource for developers seeking Department data and contains mobile applications available for download.

In pursuit of the Digital Government Strategy goals, the Department is making its web content more mobile-friendly. State now manages over 1800 official social media accounts geared to global mass audiences as well as local and niche audiences around the world. Through these presences hosted across every major
global social network as well as regional and local networks, the Department is connected with over 75 million people worldwide. A mobile solution has been implemented for more than 450 embassy and consulate websites around the world (see: http://www.usembassy.gov/). These sites support visitor access and browsing on feature phones, smart phones and tablets with the option to view the “desktop” version; m.state.gov is also a mobile website. Those accessing www.state.gov from a mobile device are automatically directed to the m.state.gov mobile-friendly website.

The “Stay Connected” feature is accessible on every http://www.state.gov page, providing quick access to all of the Department of State’s social media platforms. The Department’s pages offers customized information dispersal through an e-mail subscription for foreign policy topics of interest.

The Department collects feedback on customer satisfaction in three ways: through a comments section where users are represented by an e-mail address, online surveys, and Google Analytics. Google Analytics is used to collect information on visitor usage, length of time on the site, how the user was directed to the site (social media, e-mail, another website, etc.), along with on what page they ended their session. Google Analytics is installed on nearly all of the Department's public-facing websites.

Open Innovation Methods

The Department promotes open innovation through a range of structured programs:

- **Virtual Student Foreign Service** and **Virtual Fellows Program**, which crowdsource public input into Department projects; **Alumni Engagement Innovation Fund**, which through annual competitions, provides the more than one million current alumni of United States government-sponsored exchange programs opportunities to form partnerships with one another, and tackle a broad range of global issues at the local, national, regional, and international levels.
- **The Diplomacy Lab**, which funds analytical solutions from academic institutions.
• The Collaboratory, which designs, pilots, and spreads new ways to further educational and cultural diplomacy. Past work has included developing new programmatic tools for the Department, cultivating best practices for the use of technology in exchanges, and coordinating major initiatives like Education Diplomacy. The Collaboratory also works to advance new work methods that allow Department teams to better perform in today's networked world.

The Department has also actively promoted public engagement through challenges, having posted over a half dozen public challenges on policy issues ranging from software development in Africa, to arms control, to fighting forced labor in global supply chains. The Department has a citizen science coordinator.

Open Source Software

Consistent with the federal government's policy of following technology neutral principles and practices in procuring software, the Department of State selects suitable IT on a case-by-case basis to meet its particular operational needs, considering factors such as performance, cost, security, interoperability, ability to share or re-use, and availability of quality support. Recognizing the benefits of using and contributing back to open source software, the Department of State is an active participant in GitHub, a social code sharing service that allows teams to collaborate among themselves or with the general public and has quickly become the go-to social network for the open source community. In addition, the Department's internal use of Open Source software, such as "Wordpress," "Wikimedia," "Drupal" and "Buddypress" has facilitated internal collaboration efforts. The Department also uses Wordpress for its numerous external blog sites at blogs.usembassy.gov.

Spending Information

In compliance with the Digital Accountability and Transparency Act of 2014, Public Law No. 113-110 (the DATA Act) and OMB Memorandum 15-12 "Increasing Transparency of Federal Spending by Making Federal Spending Data Accessible, Searchable, and Reliable," the Department submitted its DATA Act Implementation Plan to OMB in September, 2015. The Plan detailed how data on the Department’s acquisition and federal assistance transactions would be collected and transferred to USAspending.gov.

To comply with the DATA Act’s predecessor, the Federal Funding Accountability and Transparency Act of 2006, Public Law No. 109-286 (FFATA), the Department implemented systems to centralize certain programmatic data elements. Now, to support the DATA Act, the Department is consolidating financial data with the program data. This will allow us to better monitor the flow of data to external FPDS and ACF2 systems, and identify any issues with the timeliness and quality of data provisioning. The Department will also be improving the capture of information in program systems both through system changes and business process changes.
Full implementation of the DATA Act will enhance the Department's commitment to deliver integrated and detailed data on Department global operations to the public through USASpending.gov and other public databases and outreach. Internally, the actions taken to implement the Act supports the Department's vision from the 2010 Quadrennial Diplomacy and Development Review (QDDR) to "equip our people to do their best work, spend our resources efficiently, achieve our objectives effectively, and adapt to the demands of a changing world."

Integrated program and financial information provides program staff with the tools needed to better monitor and analyze vendors and contract performance, and federal assistance recipients and programs. System-provided data reports will provide mid- and senior level managers with better tools to analyze resource usage and program outcomes.

By effecting greater resource efficiencies and program effectiveness, the DATA Act directly supports the vision and mission of the A Bureau: Making Diplomacy work and providing effective global support for the people and programs of America's diplomacy, as well as the Joint Strategic Plan’s mission "...by helping to build and sustain a more democratic, secure and prosperous world....” Through increased program effectiveness in the award and execution of foreign assistance throughout the world, the Department brings its assistance portfolio in direct alignment with the strategic goals of “Promoting economic growth and prosperity” and “Providing humanitarian assistance.”
Ongoing Initiatives

A. Participation in Transparency Initiatives

The Department of State is committed to transparency and the benefit it provides to the public.

Table 1, Department of State Participation in Transparency Initiatives, indicates the extent to which the Department is currently engaged with various transparency initiatives and directives.

Table 1: State Participation in Transparency Initiatives

<table>

Recovery.gov: [www.recovery.gov](http://www.recovery.gov)

The Department reports regular American Recovery and Reinvestment Act of 2009 (ARRA) expenditures.

USAspending.gov: [www.usaspending.gov](http://www.usaspending.gov)

The Department has been reporting assistance and grants figures since Feb 2013.

Catalog of Federal Domestic Assistance: [CFDA.gov](http://CFDA.gov)

The Department has posted over 70 programs, projects, services, and activities that provide assistance or benefits to the American public on CFDA.gov.

Grants.gov: [www.grants.gov](http://www.grants.gov)

The Department has posted over 100 funding programs, projects, and research for the benefit of the public on Grants.gov.

Benefits.gov: [www.benefits.gov](http://www.benefits.gov)

The Department provides funding to Department of Labor to support this site, and provides information about approximately 30 Department-managed benefit programs, such as educational exchange, cultural diplomacy, etc., for U.S. citizens.

This website currently contains data from agencies receiving foreign assistance funds including the Department and USAID. The Department has released foreign assistance budget, obligation, and disbursement data on a transaction level by country, year, and sector.
B. Public Notice

Regulations.gov

All proposed regulations created by the Department are posted on the Regulations.gov eRulemaking website. This resource serves as an internet portal and document repository, where the public participates in the rulemaking process of the Department. This resource provides the public with an opportunity to provide valuable input into the Department’s rulemaking process. Rules and regulations affecting the Department are codified both in the Code of Federal Regulations, Title 22, Chapter I, and in the Foreign Affairs Manual.

Public Engagement

The Department of State uses its public website, www.state.gov, as a resource to share information with the public. This information can be viewed earlier in this Plan, under the header, “Websites.” This is often the first place the public seeks information on the Department’s initiatives. The Department communicates to the public its proposed actions, activity, and business principally through the three bureaus within the Office of Public Affairs and Public Diplomacy: Educational and Cultural Affairs, Public Affairs, and International Information Programs, as well as through the Bureau of Consular Affairs.

The Department’s Bureau of Educational and Cultural Affairs (ECA) works to build friendly, peaceful relations between the people of the United States and the people of other countries through academic, cultural, sports and professional exchanges, as well as public-private partnerships. In an effort to reflect the diversity of the United States and global society, ECA programs encourage the involvement of American and international participants from traditionally underrepresented groups, including women, racial and ethnic minorities, and people with disabilities. Artists, educators, athletes, students, and youth in the United States and in more than 160 countries participate in these academic, cultural, sports and professional exchanges.
The Bureau of International Information Programs (IIP) is the Department’s foreign-facing public diplomacy communications bureau. It provides and supports the places, content, and infrastructure needed for sustained conversations with foreign audiences to build America’s reputation abroad. The bureau uses publications, video, and U.S. expert speakers who engage foreign audiences both in person and through virtual programs. IIP manages the infrastructure for all embassy and consulate websites, translations of public remarks by the President and Secretary, and internal websites serving field public diplomacy officers.

The Bureau of Public Affairs (PA) engages domestic and international media outlets to communicate timely and accurate information with the goal of furthering U.S. foreign policy and national security interests. In carrying out its mission, PA employs a wide range of media platforms to provide historical perspective and conduct public outreach. PA plans strategic and tactical communications, conducts press briefings, pursues media outreach, and manages the Department website. They use social media and other modern technologies to engage the public and oversee the Department’s six international Regional Media Hubs, which serve as overseas platforms for engagement of foreign audiences via various media outlets. PA arranges town meetings and schedules speakers to visit universities, chambers of commerce, and communities to discuss U.S. foreign policy. These resources inform the public, the press, and Department bureaus on United States diplomacy and foreign affairs.

The Bureau of Consular Affairs (CA) engages with U.S. citizen and non-U.S. citizen publics to provide them with timely and accurate information, shape realistic expectations about consular services, and improve understanding of controversial and/or politically sensitive consular issues. Public engagement helps establish a positive view of consular activities, develop professional contacts, and prepare the consular public with realistic expectations of what to expect when they do apply for services. Consular sections generally reach out to travel agents, professional and educational groups, Chambers of Commerce, the diplomatic and consular corps, and expatriate groups. Consular managers serving overseas are advised to make certain that the consular information on their U.S. embassy or consulate website is current and readily accessible. At some posts where access to the Internet is limited, consular sections prepare information sheets, brochures, and
other publications on subjects of recurring interest to applicants for both U.S. citizen and visa services. U.S. embassies and consulates also ensure that copies of the Department’s current Country Specific Information sheets, Travel Alerts, application forms, and Travel Warnings are readily available, free of charge in the consular section. CA views the Internet as one of the most effective means of providing information to the public. However, in addition to online communication, consular sections also reach out to U.S. citizens through in-person “town-hall” meetings, in order to address frequently asked questions and specific concerns, while building a strong, mutually beneficial relationship between the embassy or consulate and resident U.S. citizens.

C. Records Management

As mandated by the Federal Records Act and reflected in 5 FAM 400, the Department must create and preserve records containing adequate and proper documentation of the organization, functions, policies, decisions, procedures, and essential transactions or operations of the Department and U.S. embassies, consulates, and missions abroad.

Department of State records are organized into three basic file series:

- Central Foreign Policy file – contains all telegrams sent or received by the Department of State and selected internal memoranda, written correspondence, diplomatic notes, congressional requests, memorandums of conversations and documents from other agencies.
- Post files – the records of U.S. embassies, consulates and other U.S. diplomatic missions abroad.
- Lot files – collections of records generated by offices in the Department of State.

More information about the management of Department of State records can be found at https://foia.state.gov/Learn/RecordsManagement.aspx.
The Department of State has established a number of records management procedures and initiatives to ensure the record of U.S. foreign policy is preserved, protected, and made accessible for current and future generations. They include:

- Active implementation of the President’s Managing Government Records Directive (MGRD). The Department met all of its 2015 goals as required by the MGRD, which included identifying its unscheduled and permanent records, more than 30 years old, and providing inventories to the National Archives and Records Administration (NARA). In addition, the Department established an Electronic Records Management Working Group (ERMWG) to address MGRD Requirements 1.1 and 1.2 and identified executive sponsors and participants;
- A vibrant Records Liaison Program that includes all bureaus and overseas posts is in place;
- An intranet website that provides information to Department personnel relating to the effective implementation of records management;
- Records Management training courses that are available through the Department’s Foreign Service Institute, including distance learning courses and sections of classroom training. Additionally, numerous records management briefings and training sessions are conducted annually in support of the Department’s records management program and reference materials are available to employees online. These efforts have increased records management awareness throughout the Department, both domestically and at overseas posts.

The Electronic Records Management Working Group – ERMWG — chaired by the Director of the Office of Management Policy, Rightsizing and Innovation (M/PRI) is making steady progress towards modernizing the Department’s record management practices, beginning with managing email electronically. This is done through a combination of policy, technology, and records life-cycle initiatives.

The ERMWG directed a study exploring the resource, process, and business implications of implementing the National Archive and Records Administration (NARA) approved Capstone approach to e-mail management. As a result of this
study, the ERMWG made several policy recommendations in August 2014 to enable the Department to retain the e-mail of a select group of senior officials as permanent records, as a first step toward meeting NARA’s Managing Government Records Directive (M-12-18). As a result, in February 2015, the Department began journaling the e-mail accounts of senior officials in the Office of the Secretary, including the Secretary, the Deputy Secretaries, Under Secretaries, several Senior Advisors, and the Secretary's staff, ranging from Staff Assistants to the Chief of Staff. In late 2015, the Department expanded the journaling process to include Assistant Secretaries, Principal Deputy Assistant Secretaries, Ambassadors, Deputy Chiefs of Mission, Principal Officers, and a limited number of other designated senior officials.

In 2016 a subgroup of the ERMWG consisting of IT and records management experts conducted an evaluation of technology and records life-cycle functional requirements against proven product functionality. The outcome of this review led to the development of a new e-mail management system. This system is anticipated to be completed and in production by the end of 2016.

Additionally, the Senior Agency Official approved the adoption of a new e-mail user interface that would require e-mail senders to determine the record value and sensitivity of an e-mail with one click. These developments will allow the Department to capture e-mail Department-wide in an electronic format and organize the data for electronic access, retrieval and use, and disposition by Capstone designation, record type, sensitivity, and information content.

In addition to journaling hundreds of senior officials’ e-mail accounts, the Department is gradually expanding the journaling process to include all Department e-mail accounts. This short-term policy solution continues to facilitate the preservation of the most significant e-mail in the Department until the long-term e-mail management software solution is in place by the end of 2016.

D. Freedom of Information Act (FOIA) Requests

The Department has a centralized Freedom of Information Act (FOIA) program where the Bureau of Administration’s Office of Information Programs and
Services (IPS) processes all requests made to the Department for access to records under FOIA, with the exception of requests for records maintained by the Office of the Inspector General (OIG).

In July 2013 the Department launched a new FOIA website at https://www.foia.state.gov in an effort to better fulfill its commitment to transparency and openness. This dynamic, modernized website makes already-public information easier to find and allows the public to file FOIA requests more easily. The website features robust search functions and detailed information and guidance on how to access Department records and information. The website helps the public determine whether the information they seek falls within the Department’s mission, includes detailed instructions for submitting requests, and solicits comments to assist the Department in making improvements to the site. By incorporating the feedback from requesters and developing a mutual understanding of best practices among both requesters and agencies, the Department created a model website that assists both first-time and experienced requesters.

In fiscal year 2016, the website hosted over 394,000 visitors, with an average of over 1,200 visitors daily.

The Department’s FOIA website at www.foia.state.gov includes the FOIA Virtual Reading Room, collections of declassified documents, and other publicly available information on the Department’s information access programs. The Virtual Reading Room contains over 139,000 documents that have already been released to the public pursuant to FOIA, mandatory declassification review requests under Executive Order 13526, or other declassification reviews. Over 29,000 documents were added to the website thus far in FY 2016. The site has a wealth of other links to additional information resources inside and outside the Department, including a link to the millions of pages of declassified Department records available online at the National Archives and Records Administration.

The Department creates and stores records both domestically and at hundreds of U.S. embassies, consulates and missions globally. FOIA requests made to the Department vary in size and scope, and may also request Department records that contain classified national security information. Review of these records often requires coordination with other federal agencies and a knowledge of
declassification reviews before an appropriate release determination can be made. The most recent FOIA Annual Report as well as the Department Information Access Guide/Manual can also be found on the Department's FOIA website.

E. Congressional Requests

The Bureau of Legislative Affairs (H) coordinates legislative activity for the Department and advises the Secretary, the Deputy Secretaries, Under Secretaries, and Assistant Secretaries on legislative strategy. It works closely with committees in Congress and individual members, manages Department testimony during House and Senate hearings, organizes member and staff briefings, and facilitates Congressional overseas travel throughout the year. The H Bureau reviews proposed legislation and coordinates Statements of Administration Policy on legislation affecting the conduct of U.S. foreign policy. The H Bureau's staff advises individual bureaus of the Department on legislative and outreach strategies and coordinates those strategies with the Secretary's priorities.

The Secretary of State is the principal Congressional Relations Officer of the Department of State. H supports the Secretary by ensuring that the administration's foreign policy priorities are reflected throughout the legislative process. The H Bureau coordinates the annual testimony provided by the Secretary to
Congressional committees with jurisdiction over State programs to explain Department of State priorities and budget requirements. The H Bureau succeeds in its overall mission by seeking passage of relevant foreign policy legislation and appropriations, obtaining advice and consent to treaties, as well as confirmation of the President's Department of State and Ambassadorial nominees by the Senate. It consists of four offices: the Office of Senate Affairs; the Office of House Affairs; the Office of Regional, Global, and Functional Affairs; and the Executive Office. For more information about the Bureau of Legislative Affairs, please visit http://www.state.gov/s/h/index.htm.

F. Declassification

The Systematic Review Program is an initiative to make Department of State records that are 25 years old and older available to the public. The Department had been pursuing a declassification program before Executive Order 12958 mandated systematic declassification reviews for all federal agencies in 1995. The Department has partnered with the National Archives and Records Administration (NARA) to declassify and make our historical records available to the public since 1982, making it the oldest and most successful program for inter-agency declassification in the federal government. To date, the Department has reviewed over 90 million pages of records for declassification and transfer to NARA. The electronic Central Foreign Policy File is just one example of a declassified resource on the NARA website. This commitment to the declassification of the Department’s historic records has enhanced government transparency and increased the public’s understanding of U.S. foreign policy.

The Department is an active participant in the National Declassification Center set up under Executive Order 13526 to expedite the release of NARA’s holdings of agency records. The Department has assigned reviewers to other agency facilities to review information in their records in which the Department is a stakeholder; and we continue our vigorous program of declassifying our own agency’s records and transferring them to NARA. More information about the Department’s information access programs can be found at http://www.state.gov/m/a/ips/c36436.htm.
G. Public Participation

Participation is a key element to ensure continued transparency in an Open Government. The Department actively contributed to the development of the Public Participation Playbook and has drawn on the principles and methodologies it contains in shaping a number of the participation initiatives described below. The Department plans to continue to provide and expand a range of opportunities for the public to interact with Department officials and offer their opinions, questions, and feedback both in the United States and abroad. This is useful for assessing public opinion and tracking reactions to U.S. positions, events and policies. U.S. embassies engage local audiences as well through a variety of online means.

As noted above, the Department is active in the social media arena, and has a sizable following among social media communities and blog users. The Department’s goal is to provide a variety of fora through which U.S. citizens can participate actively in their government and U.S. foreign policy.

The Department amplifies the reach of U.S. foreign policy to domestic and global audiences through a range of media and web-based communication technology. The Department’s three guiding principles for all social media efforts are engagement, transparency, and serving as an alternative to traditional media. These principles guide new expansion efforts and help build lasting relationships with new sectors of the public.

The Department utilizes other programs, in addition to social media, to encourage public participation.

**Blogging**

Micro-blogging platforms, such as "Twitter," enable timely engagement with the public. The Department uses Twitter (http://www.twitter.com/StateDept) to share information on breaking news, as well as to highlight key messaging on foreign policy priorities from the Secretary and other senior Department and U.S.
government officials. The Department also engages on Twitter to promote high-profile Department initiatives and public affairs campaigns.

The Department’s official blog, DipNote (https://blogs.state.gov), provides the public context, clarity, and behind-the-scenes insights on U.S. foreign policy from a range of actors across the Department and U.S. government who are directly engaged in advancing foreign policy priorities through diplomatic engagement. Blog posts touch on an array of themes of strategic importance, such as climate change, trade, health diplomacy, food security, and more. DipNote recently passed 20 million reads since 2013, and has received 28,550 comments from the public since its launch in 2007.

In 2015, the Department launched its official presence on Medium (https://medium.com/@StateDept), to expand the reach of content to broader audiences.

**Diplomacy Lab**

Diplomacy Lab (http://diplomacylab.org/), established in 2013, is designed to address two priorities: to engage the American people in the work of diplomacy and to broaden the Department’s research base in response to a proliferation of complex global challenges. This initiative enables the Department to partner with students and faculty at universities across the nation. Students explore real-world challenges identified by the Department and contribute directly to the policymaking process, while also allowing the Department to tap into underutilized intellectual capital. Teams that deliver exceptional results are recognized and may be invited to brief senior Department officials on their findings. This initiative establishes a mutually beneficial relationship that furthers the cause of diplomacy and development.

**Exchange Programs**

The exchange programs administered by the Department engage youth, students, educators, artists, athletes, and rising leaders in the United States and more than 160 countries. In addition to exchange programs, the Department also administers a variety of other initiatives that support cultural understanding by protecting
The Exchange Program website [exchanges.state.gov](http://exchanges.state.gov) highlights these exchange programs and better serves foreign and domestic audiences by being fully accessible and addressing top user questions and concerns. It offers clear pathways to access the available exchange opportunities. The site includes participant stories, rich multimedia content, detailed program information and information on travel and living in the United States.

**Foreign Service Institute/National Foreign Affairs Training Center (FSI/NFATC)**

The Foreign Service Institute (FSI) is the federal government's primary training institution for officers and support personnel of the U.S. foreign affairs community, preparing American diplomats and other professionals to advance U.S. foreign affairs interests overseas and in Washington. At the George P. Shultz National Foreign Affairs Training Center, FSI provides more than 600 courses — including some 70 foreign languages — to more than 100,000 enrollees a year from the Department and more than 40 other government agencies and the military service branches.

FSI's programs include training for the professional development of Foreign Service administrative, consular, economic/commercial, political, and public diplomacy officers; for specialists in the fields of information management, office management, security, and medical practitioners and nurses; for Foreign Service Nationals who work at U.S. embassies, consulates and missions around the world; and for Civil Service employees of the Department and other agencies. Ranging in length from one day to two years, courses are designed to promote successful performance in each professional assignment, to ease the adjustment to other countries and cultures, and to enhance the leadership and management capabilities of the U.S. foreign affairs community.

The Foreign Service Institute draws on internal and external expertise to establish mechanisms to seek best practices, counter parochial tendencies, and ensure a flow of regular counsel and insight. Outside experts are regularly invited to provide their insights and perspectives to FSI students. Regular, sustained contact and
cross-fertilization with the broader foreign affairs and educational communities, including academic institutions, language schools, think tanks, nongovernmental organizations, and global corporations, help FSI stay current and outward looking in its curriculum, technology, and management.

**Increased Use of Mobile Technologies**

In October 2014, the Department held an internal event to discuss the future of mobile technologies at the Department, and posted the proceedings online for public comment. As indicated in the presentations by Department senior leadership, the Department is committed to supporting efforts to use mobile technologies as a means for social engagement.

**Live Digital Engagement**

The Department’s Bureau of Public Affairs hosts live, interactive digital engagements with the public using a variety social media tools, including Twitter Chats, Facebook Q&As, and Google+ "Hangouts." In May 2013, Secretary of State John Kerry became the first Secretary of State to participate in a Google+ Hangout when he held a discussion on the foreign affairs budget with the American public. The Secretary has also participated in interactive engagements on Facebook and Twitter. Other topics of Department of State live digital engagements have included international travel safety for U.S. citizens, global youth issues, efforts to combat trafficking in persons, and climate change.

**Official Blogs of U.S. Missions Around the World**

Official blogs of U.S. missions around the world, (blogs.usembassy.gov), similar to the Department of State blog (blogs.state.gov), give the public context, clarity, and behind-the-scenes insights on U.S. foreign policy from an ambassador or other mission personnel who are directly engaged in the work of diplomacy. Mission personnel post regular entries, sharing with the public the work they are doing around the world.
PRM-funded Research and Evaluation

The Department's Bureau of Population, Refugees, and Migration (PRM) supports humanitarian research in order to: (1) promote evidence-based decision-making on priority protection, assistance, and durable solution challenges; (2) enhance knowledge and develop guidance and tools to improve the performance of PRM and its partners; and (3) disseminate and encourage the use of research findings and recommendations, guidance and tools by other humanitarian stakeholders. Research is instrumental in helping PRM and its partners adapt programs and policy engagement to emerging challenges and priorities, including through the development of tools, operational guidance, and best practices. Applying the knowledge and tools gained through research contributes to sound stewardship of Department resources. PRM-funded reports are available online at http://www.state.gov/j/prm/policyissues/prmfund/

Ralph J. Bunche Library

Established in 1789, the Ralph J. Bunche Library at the Department of State is the oldest Federal Government library. It was dedicated to and renamed the Ralph J. Bunche Library on May 5, 1997. The Bunche Library supports the mission of the Department by delivering the most authoritative, relevant, and timely information, services and resources to Department personnel and the international affairs community. Library services within the Department are authorized and outlined in the Foreign Affairs Manual (5 FAM 1400). The Bunche Library is currently staffed by 15 full-time Professional Librarians, and 8 full-time Library Technicians. The Library strives to be attuned to concerns and interests of the Department’s leadership and the changing needs of Department personnel.

Secretary’s Open Forum

The purpose of the Secretary's Open Forum is to encourage and bolster internal deliberations and the consideration of a diverse range of perspectives and alternative approaches to the international relations challenges, responsibilities, and opportunities that the United States faces. The Foreign Affairs Manual (1 FAM 022.5) states that the Open Forum “brings new or alternative policy recommendations to the Secretary and other principals from U.S. government
employees at all levels of the Department and the U.S. Agency for International Development” (USAID), and “provides opportunities for any employee to express professional views (including dissenting views) candidly, free of bureaucratic constraints, and under safeguards against pressures or penalties.”

Social Networking

The Department, at the institutional level, as well as many domestic regional and functional bureaus and U.S. diplomatic missions abroad maintain an official presence on a range of social networking platforms, including Facebook, Google+, Twitter, YouTube, Flickr, Instagram, and Tumblr. The Department’s flagship social media accounts comprise a community of more than five million followers.

TechCamp

TechCamp (http://techcampglobal.org/) is a program through which the Department organizes interactive, hands-on workshops in various locations around the world to increase digital literacy and technology skills among civil society organizations, NGOs, civic activists, journalists and others who work with tech trainers and experts to apply technology solutions to real-world issues. Each TechCamp includes built-in, dedicated follow-on programs, projects and workshops to keep participants, trainers and Department staff connected and to provide means for participants to realize and achieve their projects. TechCamps advance the Department’s diplomatic and development goals in several ways, such as forming networks to catalyze new partnerships among countries and various communities, increasing civil society’s ability to strengthen their reach and impact in an increasingly competitive global environment, and focusing on bridging digital gaps to advance policy objectives. More than 3,000 participants globally have taken part in a TechCamp since the program’s inception in 2010. Inquiries can be directed to TechCamp@state.gov.

Video

The Department publishes video content on video.state.gov, U.S. embassy websites, and several other digital and social networking platforms, such as Twitter, Facebook and Google+.
The Department of State maintains several YouTube channels that host a wide range of video content produced by bureaus and offices across the Department, as well as U.S. diplomatic missions abroad. Video content covers a variety of subjects, from senior staff remarks and press briefings, to elements of U.S. public diplomacy and exchanges, to special video series on foreign policy issues and priority Department initiatives. The Department’s flagship YouTube channel boasts over 45,550 subscribers and 6,885 videos with 12.1 million video views. The channel can be found at: http://www.youtube.com/user/statevideo.

The Department also makes its video content available for download via the Defense Video & Imagery Distribution System (DVIDS). Through DVIDS, journalists, bloggers, and the public can obtain broadcast quality video of the Secretary of State’s remarks, the daily press briefing, and other public events.

**Virtual Fellows Program (VFP)**

The Virtual Fellows Program (http://www.state.gov/m/irm/vfp/index.htm), established in 2014, is working to include the knowledge and expertise of the American public in Department projects. The VFP gives experienced professionals the opportunity to contribute by serving part-time as virtual consultants on issues, problems, or questions faced by the Department, and its embassies and consulates, without requiring physical relocation.

**Virtual Student Foreign Service**

The Department established the Virtual Student Foreign Service (VSFS) (vsfs.state.gov) in 2009. VSFS has grown to become the largest virtual internship program in the world, encompassing more than 30 federal agencies. U.S. college students contribute about 10 hours a week to their government, working on real projects and gaining real experience. VSFS is a smart and transparent way for government and citizens to collaborate on projects. Each May, federal agency colleagues are invited to submit VSFS projects. In July, U.S. college students can logon to USAJOBS.gov and apply to their top three projects. Supervisors make their selections in August, and eInterns start in early September. Most projects conclude by the following April.
VSFS eInterns work remotely from their school, apartment, or other locations, reporting by e-mail, phone, or video chat to supervisors throughout the government. VSFS eIntern duties and responsibilities vary according to the location and needs of each VSFS project. VSFS projects may be research-based, contributing to reports on issues such as human rights, economics, or the environment. They may also be more technology oriented, such as working on webpages, or helping produce electronic journals. To see all the current year’s projects, go to: http://vsfs.state.gov/projects.

Past projects have asked students to:

- Develop and implement a public relations campaign using social media sites like Facebook, Twitter, YouTube, etc., to communicate and reach out to youth;
- Conduct research on the economic situation, prepare graphic representations of economic data, and prepare informational material for the U.S. embassy website;
- Create a system to gather and analyze media coverage on a set of topics including environment, health, and trade;
- Research IT-based interventions that have been successful in higher education, particularly in teacher training;
- Write and contribute biweekly articles to the U.S. embassy’s Facebook page on topics such as internet, computer science/technology, history, and literature;
- Develop a series of professional instructional video clips to be published by the U.S. embassy;
- Survey social media efforts of U.S. diplomatic posts, NGOs, and private companies around the world to help establish best practices in a U.S. embassy’s social media outreach business plan.

**War Crimes Rewards Program**

Under the [War Crimes Rewards Program (WCRP)](http://vsfs.state.gov/), the Department offers rewards of up to $5 million (USD) to individuals who provide information leading to the arrest, transfer or conviction of foreign nationals indicted by any international, hybrid, or mixed tribunals for war crimes, crimes against humanity, and genocide.
The Department of State’s Office of Global Criminal Justice (GCJ) manages the WCRP in close coordination with partners within the U.S. government, foreign governments, international tribunals, and non-governmental organizations. Members of the public may submit tips at https://www.rewardsforjustice.net/english/submit-a-tip.html
H. Collaboration

One essential element of diplomacy is collaboration. The Department has done much in recent years to go beyond in-person collaboration and use technology in innovative ways; and we have plans to expand these efforts in new directions. The goal is to create and sustain an environment in which collaboration and cooperation are the norm, and a suite of state-of-the-practice tools are readily available to enhance collaboration in many different ways.

A challenge that the Department faces in this area is that the work often involves classified and other sensitive information. This requires robust risk management programs and appropriate IT security in place to ensure that Department can fulfill its mission and share information broadly, while appropriately protecting sensitive information assets. In late-2015, the Department published policies in the Foreign Affairs Manual (5 FAM 1100) establishing a framework to govern the acquisition and use of Cloud Computing products and services in the Department. In addition to increasing network security, the Department's Cloud Policy will facilitate the Department's use of technology platforms that improve collaboration. In addition to establishing policies concerning technology, in 2015 the Department implemented reforms to its employee performance management system that placed greater emphasis on documenting and recognizing collaborative accomplishments.

The Department’s effectiveness is highly dependent on its ability to work in partnership with many different kinds of organizations. The Department collaborates actively with the U.S. public, citizens of other countries, other federal agencies, non-Federal governments (including tribal governments), non-governmental organizations (NGOs), and foreign government agencies.

Advisory Councils, Commissions, Committees, and Boards

A number of advisory councils, commissions, committees, and boards exist to maintain an open dialogue between the U.S. government and the private sector on various issues. These groups provide the Department with the perspective and expertise of the private sector to inform the Department’s formulation, coordination, and oversight of its broad range of functions. They are typically
comprised of members with a wide range backgrounds that include past government service, military service, academia, think tanks, politics, and business. These committees report their activities to the Secretary or other Department officials and often hold public meetings. For more information and a complete list of the advisory groups with which the Department works, please visit http://www.state.gov/r/pa/ei/rls/dos/160060.htm. The General Services Administration also maintains a site for Department advisory committees here.

Alumni Engagement Innovation Fund

The Department created the Alumni Engagement Innovation Fund (AEIF) in 2011 to support alumni initiatives that promote shared values and innovative solutions to global challenges. The competition provides small grants to teams of past and current participants of U.S. government-sponsored exchange programs to carry out public service projects that utilize skills and knowledge they have gained through their exchange experiences. To participate, alumni must be members of the International Exchange Alumni (IEA) global online community at https://alumni.state.gov/ and form teams of at least four IEA community members (this number includes the team leader). Proposed projects must address one of the AEIF themes.

Business Information Database System (BIDS)

The Business Information Database System (BIDS) is an Internet-based portal built to help U.S. businesses learn about significant international commercial opportunities. The BIDS website (http://bids.state.gov/index.html) features an interactive map that displays descriptions and locations of projects that represent potential contract or tender opportunities for U.S. businesses. The site also connects U.S. business to detailed information about each project as well as information to contact U.S. embassies overseas.

U.S. government officials upload new procurement opportunities complete with context, commentary, and contact information into BIDS. Through BIDS, U.S. companies can access this basic information and connect directly with U.S. government officials in the field. The technology behind BIDS also enables the Department to easily curate BIDS data and ensure leads remain fresh and relevant.
BIDS directly supports Executive Order 13630 issued December 6, 2012, which, among other things, directs the new Interagency Task Force on Commercial Advocacy to "institute processes to obtain and distribute information about foreign procurement opportunities that may be of interest to U.S. businesses in order to expand awareness of opportunities for U.S. businesses to sell their goods and services to foreign governments."

BIDS is an open data platform; developers can use BIDS data to support other applications including the development of websites and mobile apps. Over the long-term, BIDS is also designed to create an archive of projects that can be used to analyze development and procurement patterns.

**Countering Violent Extremism**

Countering violent extremism (CVE) is a pillar of the Administration’s strategic approach to counterterrorism, and is an increasingly critical component of a comprehensive and sustainable counterterrorism strategy that seeks to address the entire life cycle of radicalization to violent extremism. The United States is working with governments and non-governmental partners to address the spread of violent extremism and the conditions that make communities susceptible to violent extremism, including – but not limited to – ISIL/Da’esh’s potent brand of terrorism.

The White House Summit on Countering Violent Extremism in February 2015, and follow-on process, has mobilized international support for a multi-stakeholder action agenda to address the drivers of violent extremism. This action agenda includes partnerships with international organizations, national and local governments, civil society, religious leaders, the private sector and affected communities. Building on this momentum, Secretary of State Kerry has committed to elevate CVE as a priority within the Department and to use the Bureau of Counterterrorism as a central locus for enhancing the Department’s CVE efforts. In this regard, the bureau works very closely with a range of Department stakeholders, the USAID, and other interagency partners.
Country Data Collaboratives for Local Impact

The President’s Emergency Plan for AIDS Relief (PEPFAR) and the Millennium Challenge Corporation (MCC) have partnered to invest $21.8 million in Country Data Collaboratives for Local Impact in sub-Saharan Africa that will use data on HIV/AIDS, global health, gender equality and economic growth to improve programs and policies. The program will be completed in collaboration with the Global Partnership for Sustainable Development Data.

Country Data Collaboratives will improve existing data and make it more accessible, strengthen data analysis and visualization, enhance opportunities for citizen contribution to data, cultivate talent, and ensure mutual accountability when implementing development aid so it can make a sustainable difference.

Direct Line for American Business

The Direct Line for American Business program ([http://www.state.gov/e/eb/directline/](http://www.state.gov/e/eb/directline/)) provides a unique opportunity for American businesses, particularly small- and medium-sized enterprises, to engage directly via webcast with U.S. Ambassadors overseas. The program is open to United States companies – whether they are already in the country where the ambassador serves or if they are interested in expanding their businesses there. Webcasts vary in topic according to the specific needs for business in a given country.

English Language Programs

The [Office of English Language Programs](http://www.state.gov) engages English language professionals and students abroad by promoting the teaching of English, managing English language exchange programs, leveraging new technology to reach teachers and students of English to improve the teaching and learning of English overseas, supporting the professional development of teachers and teacher trainers through:

- exchanges;
- developing multi-media resources and publications for teachers and learners; and
consulting with foreign ministries of education, universities, and non-governmental organizations to strengthen the teaching of English throughout the world.

The programs, overseen by Regional English Language Officers abroad and the Department's Bureau of Educational and Cultural Affairs (ECA) program officers in Washington, foster mutual understanding, strengthen teachers’ and students’ teaching and language skills, develop critical thinking capabilities, and convey balanced and accurate information about the United States.

**Feed the Future**

During the 2009 G-8 Summit in Italy, President Obama called on global leaders to reverse the decades-long decline in investment in agriculture and strengthen global efforts to reduce poverty, hunger and under-nutrition. To lead the way, the United States pledged $3.5 billion to this effort over three years, which helped leverage an additional $18.5 billion in support from G-8 members and other donors. The United States contribution to this global commitment came to be called “Feed the Future” (https://www.feedthefuture.gov/). Along with this increase in resources, donors also committed to 'do development differently' and follow the Rome Principles for Sustainable Global Food Security, a set of aid effectiveness principles adopted by the global community.

Feed the Future has progressed significantly since then. It currently supports 19 focus countries through its initiatives and has helped build more productive, resilient agricultural systems through country ownership, accountability, and partnership. Feed the Future has published progress reports on their efforts annually since 2012.

The U.S. Special Representative for Global Food Security serves as the Deputy Coordinator for Diplomacy for Feed the Future.

**Global Engagement Center**

The Global Engagement Center coordinates, integrates and synchronizes messaging to foreign audiences that undermines the disinformation espoused by
violent extremist groups, including ISIL and al-Qaeda, and that offers positive alternatives. The Center focuses on empowering and enabling partners, governmental and non-governmental, who are able to speak out against these groups and provide an alternative to ISIL’s nihilistic vision. To that end, the center offers services ranging from planning thematic social media campaigns to providing factual information that counters disinformation, to building capacity for third parties, to effectively utilize social media to research and evaluation.

Global Enterprise Registration

In a formal public-private partnership with the Kauffman Foundation’s Global Entrepreneurship Network (GEN) and the United Nations Conference on Trade and Development (UNCTAD), the Department is promoting simple online administrative processes around the world, specifically through the Global Enterprise Registration (GER.co) portal. This website provides basic information about procedures for registering a business in countries around the world, with links to information including the mandatory steps to register businesses, downloadable forms, legal justifications for the required steps, and a contact point for questions and complaints. Entrepreneurs and investors save time by having links to all of the world's official business registration websites on one page along with a user-friendliness rating of each. With GER.co as a resource, governments can learn how to make their own websites better by studying the websites of their higher rated peers.

The "Go Green by 2019" campaign, which is built on the GER.co website, has already celebrated five countries putting their business registration processes online between January 2015 and September 2016 (Bhutan, Saudi Arabia, Oman, India and Vietnam) and three countries improving their websites (Cameroon, Algeria and Kenya). GER.co aims to inspire the remaining governments that haven't yet put their business registration processes online to do so by 2019, and the rest of the world to make their websites more user-friendly by 2019.

Putting business registration online globally and making governmental websites more user-friendly will create clear processes and opportunities for the 1.8 billion people working in the informal economy (60 percent of the global workforce) to move into the formal economy, where they can enjoy labor protections, access to
bank credit, and lawfulness through payment of taxes. Efficient interactions with governmental service providers and visible improvements to infrastructure create positive attitudes towards government that are the essential underpinnings of stable, vibrant, inclusive democracies. GER.co is intended to be a catalyst for better governmental services and economic growth, everywhere.

Global Innovation through Science and Technology

The Department’s Global Innovation through Science and Technology (GIST) initiative (https://www.gistnetwork.org/) empowers young innovators through networking, skills building, mentoring, and access to financing to develop startup solutions that address economic and development challenges.

Since 2011, GIST has engaged with science and technology innovators and entrepreneurs in 135 emerging economies around the world, providing training and resources to help them build successful startups. This is done through competitions, startup boot camps, and interactive online programs, implemented by VentureWell and the American Association for the Advancement of Science (AAAS).

GovUP

GovUP is a pilot initiative designed to give Department personnel better collaboration tools, including dynamic, virtual meeting and online information sharing capabilities, for effective engagement with the public, civil society and foreign government partners working on a multitude of foreign policy issues around the world.

Harnessing the Data Revolution for Sustainable Development

On September 27, 2015, the member states of the United Nations agreed to a set of Sustainable Development Goals (Global Goals) that define a common agenda to achieve inclusive growth, end poverty, and protect the environment by 2030.

"Harnessing the data revolution" is a critical enabler of the global goals, not only to monitor progress, but also to inclusively engage stakeholders at all levels: local,
regional, national, and global, to advance evidence-based policies and programs to reach those who need it most. Data can show, for example, where girls are at greatest risk of violence, so that it can be prevented more effectively; where forests are being destroyed in real-time, so they can be better protected; and where HIV/AIDS is enduring, so that efforts to combat it can have the greatest impact. Data can catalyze private investment; build modern and inclusive economies; and support transparent and effective investment of resources for social good.

With the Department taking the lead in coordinating at the international level, the U.S. government has advanced priorities and targeted investments toward increasing the availability and application of public data that span many parts of the 2030 Agenda for Sustainable Development adopted by the United Nations Sustainable Development Summit in 2015.

"Harnessing the Data Revolution for Sustainable Development" is one of the Department's flagship initiatives, and is referenced in those terms later in the Open Government Plan. Numerous other Department-managed or -supported collaboration and data sharing initiatives mentioned elsewhere in the Open Government Plan, such as MapGive and Project 8, also contribute to supporting the Sustainable Development Goals.

**Imagery to the Crowd and MapGive**

A lack of quality geographic data handicaps government and non-government organizations attempting to respond to critical humanitarian and development needs. To address this problem, the Department’s Humanitarian Information Unit (HIU), within the Office of the Geographer and Global Issues (GGI) of the Bureau of Intelligence and Research (INR), collaborated with USAID and the non-governmental Humanitarian OpenStreetMap Team (HOT) to launch an initiative that relies on crowdsourcing to create better geographic data.

First, the HIU created the Imagery to the Crowd (IttC) initiative to help support the use of OpenStreetMap (OSM) for humanitarian response, disaster risk reduction, and sustainable development. IttC addresses significant data gaps for humanitarian and development needs by publishing high-resolution commercial satellite imagery purchased by the U.S. government in a format that public volunteers (“the crowd”
e.g. individual volunteers, students, professionals, etc.) can easily map into OSM. To date, mapping projects have been completed in support of disaster risk reduction in Nepal, disaster response in the Philippines, community resilience projects in Uganda, humanitarian logistics in the Democratic Republic of the Congo, refugee camp planning in Ethiopia and Kenya, and malaria prevention in Mozambique.

Second, in order to grow the crowd, the HIU and the Bureau of International Information Programs (IIP) created MapGive, a Department educational and public diplomacy initiative to bring people around the world into the OSM community by teaching them about the importance of creating open map data, giving them the skills to map, and helping them get connected with mapping efforts through a user-friendly website. New volunteers are engaged in creating open geographic data that can help empower organizations and communities to make decisions across a range of environmental, economic, and crisis management themes through http://mapgive.state.gov/ and @MapGive on Twitter.

The data created is made freely available to the public through the Open Data Commons Open Database License 1.0. There are many other free maps on the Internet, but most have legal or technical restrictions preventing others from using the data openly. With OSM, both the maps and underlying data can be downloaded for free, for developers or anyone to use or redistribute. Additionally, in many places of the world where there is no commercial motivation to develop this data, OSM is often the best available resource. During a crisis response, digital volunteers can be mobilized quickly to create new data, with their efforts coordinated by HOT.

**International Exchange Alumni**

International Exchange Alumni (https://alumni.state.gov/) is a dynamic and interactive networking website for past and current participants of U.S. government-sponsored exchange programs.
Overseas Schools

The mission of the Department's Office of Overseas Schools is to promote quality educational opportunities at the elementary and secondary level for dependents of American citizens carrying out our programs and interests of the U.S. government abroad.

The goal of this office's efforts is to increase mutual understanding between the people of the United States and the people of other countries by upgrading educational institutions which serve to demonstrate American educational principles and methods employed in the United States. In addition to the collaboration that occurs between a U.S. embassy or consulate and Department of State-assisted school, both informally and formally through embassy representation on the school board, the Department established an Overseas Schools Advisory Council in 1967. This Advisory Council was created to seek the advice of American leaders from the business, foundation, and educational communities in pursuing the goal of assuring quality education for American children attending Department-assisted schools overseas.

Overseas Security Advisory Council (OSAC)

The Overseas Security Advisory Council (OSAC) (https://www.osac.gov) was created in 1985 under the Federal Advisory Committee Act to promote security cooperation between American private sector interests worldwide and the Department.

The OSAC is comprised of 34 private and public sector member organizations that represent specific industries and agencies operating abroad. The member organizations designate representatives to serve on the Overseas Security Advisory Council to provide direction and guidance to develop programs that most benefit the U.S. private sector overseas. A primary goal of OSAC is to develop an effective security communication network; consequently, OSAC invites all United States businesses, academia, faith-based groups, and non-governmental organizations to become constituents.
President’s Emergency Plan for AIDS Relief (PEPFAR)

Led by the U. S. Global AIDS Coordinator at the Department of State, PEPFAR (http://www.pepfar.gov/) is the U.S. government initiative to help save the lives of those suffering from HIV/AIDS around the world. This historic commitment is the largest by any nation to combat a single disease internationally, and PEPFAR investments also help alleviate suffering from other diseases across the global health spectrum. Recognizing that partnerships are needed to sustain programs for the long-term, Congress authorized PEPFAR to promote public-private partnerships (PPP) as a priority element of United States strategy to combat the HIV/AIDS pandemic and other global health crises. PEPFAR has fostered public-private partnerships that support and complement its prevention, care, and treatment work. PEPFAR is driven by a shared responsibility among donor and partner nations and others to make smart investments to save lives.

Public-Private Partnership Programs

As the private sector has dramatically increased its share of development aid, the Department has had to adapt to this changing landscape. The Secretary's Office of Global Partnerships (S/GP) (http://www.state.gov/t/pm/wra/partners/) facilitates collaboration between the Department; the public, private, and non-profit sectors; and civil society. S/GP's mission is to build public-private partnerships that strengthen diplomacy and development outcomes by convening people from across regions and sectors; catalyzing new projects and new solutions by providing training and technical assistance; collaborating closely with partners; and cultivating new partnerships by providing space, access to networks and capital, and mentoring assistance. Since 2009, S/GP has cooperated with over 1,600 partners from around the world to foster collaboration and impact in global diplomacy and development initiatives. For instance, a public-private partnership with the United Nations Foundation's Girl Up campaign, Google, Intel Corporation, and other partners has enabled the Department to support the second iteration of WiSci (Women in Science) camp. 2016's camp in Peru brought together 100 high school girls from Chile, Mexico, Peru, and the United States as part of an Asia-Pacific Economic Cooperation (APEC) initiative, to enhance
women's participation and advancement in the STEM (Science, Technology, Engineering, Mathematics) fields.

Secondarycities.state.gov

This initiative seeks to accomplish these goals by: building partnerships with local government officials, universities, and non-governmental organizations to create geospatial data on secondary cities, i.e. non-primary cities that often serve as regional hubs and are generally experiencing rapid and unplanned urbanization; enhancing understanding of secondary cities through data and mapping; building local capacity in geospatial science-based decision making; providing open geospatial data solutions; facilitating long-term secondary city partnerships and networks.

Small Business Network of the Americas

Small and medium businesses employ more than half of the workforce in the Western Hemisphere. The Small Business Network of the Americas (SBNA) is comprised of community-based centers helping more than two million entrepreneurs and small business people create jobs. Business owners across the United States can walk into one of 1,100 Small Business Development Centers (SBDCs) to get long-term business counseling, managerial training, and market research services for little or no cost. Additionally, 1,250 incubators help entrepreneurs build new companies. These centers of expertise can connect with thousands of similar centers throughout the Western Hemisphere, extending business links beyond national borders. Membership in SBNA is open to a wide variety of organizations providing services to entrepreneurs and small business owners. SBDCs, incubators, accelerators, and other service providers are welcome to join. More information about the SBNA can be found at: [http://partner.state.gov](http://partner.state.gov).
Sustainable Energy for All Initiative

The Department participates on the Advisory Board and Executive Committee of the Sustainable Energy for All Initiative at: http://www.se4all.org/. The Sustainable Energy for All initiative is a multi-stakeholder partnership between governments, the private sector, and civil society. Launched by the United Nations Secretary-General in 2011, it has three interlinked objectives to be achieved by 2030:

- Ensure universal access to modern energy services;
- Double the global rate of improvement in energy efficiency; and
- Double the share of renewable energy in the global energy mix.

Trafficking in Persons International Grants Program

The Department's Office to Monitor and Combat Trafficking in Persons (J/TIP) manages the only foreign assistance program dedicated solely to combating human trafficking outside of the United States. Our foreign assistance targets both sex trafficking and labor trafficking through implementation of the “3P” paradigm of Prevention (including demand reduction), Protection of victims, and Prosecution of traffickers. A fourth P, Partnership, is also a critical element in the majority of our programs. The Office to Monitor and Combat Trafficking in Persons partners with foreign governments, international organizations, and civil society to develop and implement effective strategies for confronting modern slavery.
I. Transparency

Agency Financial Report

The Department’s Agency Financial Report (AFR) (http://www.state.gov/s/d/rm/rls/perfrpt/index.htm) provides an overview of financial and performance data to help Congress, the President, and the public assess the Department's stewardship over the resources entrusted to it. The AFR provides financial and performance information for the fiscal year beginning October 1 and ending on September 30, with comparative prior year data, where appropriate. It demonstrates the agency’s commitment to its mission and accountability to Congress and the American people, and candidly presents the Department’s operations, accomplishments, and challenges.

Audio Products

The Department produces digital audio files (e.g. "podcasts") for listening and downloading on platforms such as iTunes. These "podcasts" feature discussions with senior Department officials and other subject matter experts covering an array of issues from human rights, to economic diplomacy, to countering violent extremism, to leadership.

Certificates of Competency

Under the Foreign Service Act of 1980, Certificates of Competency must be presented to the Senate Foreign Relations Committee for each candidate nominated by the President to serve as a bilateral ambassador overseas and for the candidates for ambassador to the European Union (EU), the African Union (AU) and the Association of Southeast Asian Nations (ASEAN). In 2014, the Department began making the Certificates of Competency available online at: http://www.state.gov/m/dghr/coc/index.htm.

Consular Information Program

The Department’s Office of American Citizens Services and Crisis Management (ACS) administers the Consular Information Program at:
https://travel.state.gov/content/passports/en/country.html, which informs the public of conditions abroad that may affect their safety and security. Country Specific Information, Travel Alerts, and Travel Warnings are vital parts of this program.

In administering the Consular Information Program, the Department applies a “no double standard” policy to important security threat information, including criminal information. Such information, if shared with the official U.S. community (generally defined as Americans working for the U.S. government abroad), must be made available to the wider American community if the threat applies to both official and non-official Americans.

The Consular Information Program provides Country Specific Information for every country of the world. Members of the public will find the location of the U.S. embassy and any consular offices, information about whether a visa is necessary, crime and security information, health and medical considerations, drug penalties, localized hot spots and more.

**Country Reports on Human Rights Practices**

The Foreign Assistance Act of 1961 requires that the U.S. government take a country’s human rights record into account when providing assistance to that country. To provide greater transparency into the assessment of a country’s human rights record, the Trade Act of 1974 requires that the Department submit to Congress “a full and complete report” on the human rights practices of all countries receiving United States assistance and all United Nations member states. The first volume of the Country Reports on Human Rights Practices covered the year 1976 and was released in 1977. These annual Country Reports on Human Rights Practices – the Human Rights Reports at: http://www.state.gov/j/drl/rls/hrrpt/ – cover internationally recognized individual, civil, political, and worker rights, as set forth in the Universal Declaration of Human Rights and other international agreements. The Department has redesigned and reformatted the popular Human Rights Reports in a format that is more useful to the end users.
Country Reports on Terrorism

Country Reports on Terrorism (http://www.state.gov/j/ct/rls/crt/) are submitted in compliance with Title 22 of the United States Code, Section 2656f (the “Act”), which requires the Department to provide to Congress a full and complete annual report on terrorism for those countries and groups meeting the criteria of the Act.

Department of State by State Map

The Department of State by State (http://www.state.gov/r/pa/map/index.htm) initiative provides an interactive U.S. Map that shows how the Department benefits each U.S. State. The contextualized data provided on this website illustrates how the Department’s work matters to each state’s education system, economy, travel, security, etc. The webpage also has information and links for Department careers, the Business Information Database System (BIDS), the Direct Line Program for American Businesses, the U.S. Diplomacy Center, and ForeignAssistance.gov.

Such information increases the Department’s transparency and helps inform the public of the many varied tasks conducted by the Department, building a connection between taxes paid and services received, and, through this transparency, fostering trust in government. The Department will update the information in the Department of State by State map as new programs and initiatives are implemented. The state.gov application programming interfaces (APIs) “Select, State.gov Data” also includes data from the State by State map. See http://www.state.gov/developer.

Digest of United States Practice in International Law

in the spring of 2010. A brief history of the Digest and explanation of the current format of the book is provided in the Introduction to the Digest of United States Practice in International Law 2000. A supplemental note, dated October 1, 2010, provides updated information on Internet citations included in the Digest. Beginning with the 2011 Digest, the official version of the Digest is published exclusively on-line.

End-Use Reports

End-Use Reports at: http://www.pmddtc.state.gov/reports/enduse_reports.html describe the actions that the Department of State has taken under 22 U.S.C. 2785 of the Arms Export Control Act (AECA) to implement, the blue Lantern program to monitor the end-use of defense articles, services, and related technical data authorized for export under 22 U.S.C. 2778 of the AECA.

FAIR Act Inventory

The Federal Activities Inventory Reform (FAIR) Act of 1998 (P.L. 105-270), requires federal agencies to prepare and submit to the Office of Management and Budget (OMB) inventories of commercial activities performed by federal employees. OMB Circular A-76, Performance of Commercial Activities, further requires agencies to submit inventories of their inherently governmental activities to OMB. Agencies are required to submit their inventories to OMB by June 30.

The annual inventory submission, accessible online at: https://csm.state.gov/content.asp?content_id=96&menu_id=71, includes all government full-time equivalent (GFTE) authorized positions categorized on the basis of the type of work performed versus who is performing the work. Agency submissions comprise a list of the inherently governmental and commercial activities that “reasonably equate” to budgeted FTE totals.

The FAIR Act process is a key way to track the number of GFTE currently working at the Department and gain a better understanding of how federal employee labor is being used to carry out the Department’s mission. The ongoing guidance emerging from OMB also requires federal agencies to create a Service Contract Inventory, which will catalog the number of contractor full-time
equivalents (CFTE). The Service Contract Inventory together with the FAIR Act Inventory provides a snapshot of the Department’s workforce by bureau and function.

**Fiscal Transparency Report**

Since 2008, the Department has conducted fiscal transparency reviews of governments receiving bilateral allocations of assistance funded under the Department Foreign Operations, and Related Programs Appropriations Acts. Since fiscal year 2012, the Department has annually published fiscal transparency reports, as required by annual appropriations acts. The release of the report is an opportunity for citizens to consider their government’s level of and approach to fiscal transparency, and to engage in discussion of how to improve budget transparency, public participation in the budget process, and fiscal policy. The reports are available online at: [http://www.state.gov/e/eb/ifd/oma/fiscaltransparency/index.htm](http://www.state.gov/e/eb/ifd/oma/fiscaltransparency/index.htm).

**Foreign Affairs Manual and Foreign Affairs Handbook**

The Foreign Affairs Manual (FAM) and associated Handbooks (FAHs) (both at: [https://fam.state.gov/Fam/FAM.aspx](https://fam.state.gov/Fam/FAM.aspx)) are a single, comprehensive, and authoritative source for the Department’s organization structures, policies, and procedures that govern the operations of the Department, the Foreign Service and, when applicable, other federal agencies. The FAM (generally policy) and the FAHs (generally procedures) together convey codified information to Department staff and contractors so they can carry out their responsibilities in accordance with statutory, executive and Department mandates. Currently, there are over 25,000 pages of policies and procedures published in 16 volumes of the FAM and 38 corresponding sections of the FAH.

**ForeignAssistance.gov**

[ForeignAssistance.gov](http://ForeignAssistance.gov) (FA.gov) was created in response to the principles of the Paris Declaration on Aid Effectiveness and President Obama’s Open Government Initiative. FA.gov serves as the U.S. government’s main tool for improving transparency in U.S. foreign assistance spending, and is the mechanism to report
data in the International Aid Transparency Initiative (IATI) Standard. It has been a commitment in all three U.S. National Action Plans of the Open Government Partnership, where it is specifically highlighted as a means to increase the transparency of foreign assistance.

FA.gov makes it possible for anyone to explore how the U.S. government invests its foreign assistance funds in countries around the world through a single website in an accessible, machine readable, and easy-to-understand format. The website includes detailed foreign assistance financial, award, and performance data, and there are plans underway to expand both the quantity and quality of data available. Users can explore the data in multiple ways, through an interactive map, pre-defined charts and graphs, downloadable datasets, and XML files prepared in the IATI format.

The visualizations and downloadable data enable a wide variety of stakeholders to examine, research, and track U.S. government foreign assistance investments and compare them against other donors and organizations. In addition to raising public awareness for U.S. foreign assistance investments around the world, FA.gov has the power to help recipient governments better manage aid and inform budgeting and planning decisions; empower citizens to hold their governments accountable for the aid they receive; and support data-driven development.

FA.gov continues to evolve and increase the availability and quality of the data for the public. The site currently contains data on planning, obligations, and disbursements on a transactional level. Performance data and descriptive narrative data are also available for State and USAID. All agencies with foreign assistance funding in their portfolio, including USAID, the Department of State, Department of Defense, and Department of the Treasury, Department of Health and Human Services, the Millennium Challenge Corporation, U.S. African Development Foundation, Inter-American Development Foundation, the Peace Corps, and Department of Agriculture will be reporting to FA.gov.

It is a Department priority to improve the quality of the data from reporting agencies and expand the number of reporting agencies. In addition to leading the overall effort of the development of FA.gov, the Department will work to improve its own reported data. Improvements can only be made with the support of the
entire Department. To this end the Foreign Assistance Data Review (FADR) was chartered in September 2014 to evaluate and make recommendations for improvement on how the Department captures foreign assistance activity from budgeting, planning, and allocation through obligation and disbursement. The initial recommendations document was shared with the public in December 2015. As part of the second phase of FADR, the Department will release a report outlining a key set of standardized foreign assistance data fields that when adopted and used across the Department will improve the Department’s ability to track and report on its foreign assistance programs and funds at the level demanded by internal and external stakeholders. The Department will also see dividends in its ability to manage activities, coordinate with others effectively, make data-driven decisions, and meet transparency commitments.

**Foreign Relations of the United States (FRUS)**

The *Foreign Relations of the United States* (FRUS) ([https://history.state.gov/historicaldocuments](https://history.state.gov/historicaldocuments)) series presents the official documentary historical record of major U.S. foreign policy decisions. The series began in 1861 and now comprises more than 525 individual volumes. FRUS volumes contain documents from the Presidential libraries, Departments of State and Defense, National Security Council, Central Intelligence Agency, Agency for International Development, and other foreign affairs agencies as well as the private papers of individuals involved in implementing U.S. foreign policy.

The Office of the Historian has been digitizing the FRUS series using the highest standards for text encoding to make it searchable and fully browsable online, in partnership with the University Of Wisconsin Digital Collections Center. To date the Office has completed 351 volumes, posting these on its public website. Nearly all are available for download as PDF and/or the major open ebook standards. The Office created an API for its ebook catalog, which has been embedded by third-party ebook reader applications, such as ShuBook on the Apple App Store at: [https://history.state.gov/developer/catalog](https://history.state.gov/developer/catalog). The Office has also posted the master digital files for each volume in XML format on its GitHub site: [https://github.com/HistoryAtState/frus](https://github.com/HistoryAtState/frus). This allows researchers to perform
sophisticated analysis across the entire corpus. The Office plans to complete the FRUS digital archive within two to three years.

**Hometown Diplomats Program**

The Hometown Diplomats Program ([http://www.state.gov/r/pa/pl/hometown/](http://www.state.gov/r/pa/pl/hometown/)) facilitates programs for the Department's Foreign Service staff and Civil Service employees to travel back to their hometowns to address American audiences about their careers and experiences. Since the program began in 2002, about 1200 Department employees have traveled to places around the country, from New England to California to inform the American people about the work of the Department. Hometown Diplomats speak to high school and college students, social and professional organizations, and make themselves available for media interviews. They speak on topics including the role of the Department, how a U.S. embassy functions, their career paths, and their cross-cultural experiences. Hometown Diplomats also provide information to local citizens on how to join the Foreign Service and the Civil Service and how to participate in internships with the Department.

**HumanRights.gov**

To further the U.S. government’s human rights agenda, the Department established a [HumanRights.gov](http://www.humanrights.gov) website on the Internet. This site serves as the federal government’s focal point for information sharing and collaboration with external partners on human rights issues.

This effort was initiated by the Administration and the White House’s National Security Council in order to improve the quality and availability of human rights information, and to help strengthen outreach and engagement on human rights matters. Currently a great deal of human rights information is scattered among the websites and databases of numerous federal agencies, making it difficult to find and obtain. There is no central repository or web site, and no central U.S. government Internet presence for engagement on human rights issues. This new HumanRights.gov web site provides such a central repository and enhanced engagement platform.
Improving Public Access to Air Quality Information

The Department has developed a centralized air quality program so as to be able to quickly incorporate new developments into its diplomacy and operations policy worldwide and to facilitate data transparency through a centralized software platform. On February 18, 2015, Secretary Kerry, and the Environmental Protection Agency (EPA) Administrator, McCarthy announced a joint Department of State/EPA partnership on air quality monitoring efforts at U.S. embassies overseas. Now active in more than 20 global cities, the Department’s centralized platform leverages the expertise of the U.S. Environmental Protection Agency (EPA) for setting up the monitors, collecting and analyzing the data, and providing training and scientific exchanges. The Department program uses EPA’s AirNow Platform, which collects data from American states and localities. The importance of collecting standardized data cannot be overstated. This data will help the Department develop scientifically-based management policies, In addition, the EPA/DOS partnership signifies an effort by the U.S. government to provide air quality health messaging to U.S. citizens overseas, as well as promote data sharing with foreign governments and the public.

Intercountry Adoption Statistics

In addition to the annual reports to Congress on Intercountry Adoption required by Section 104 of the Intercountry Adoption Act of 2000, which provides statistical data and other information on inter-country adoptions, the Department’s Bureau of Consular Affairs has made accessible on the Internet at: travel.state.gov/content/adoptionsabroad/en/about-us/statistics.html, a database of intercountry adoption statistics, searchable by country, state, year or visa type and displayed as a table or chart.

Interactive Travel Map

The Department's Bureau of Public Affairs created an interactive map to track the Secretary’s foreign travel at: http://www.state.gov/secretary/travel/. The map enables visitors to see where the Secretary is at any given time, calculates miles traveled (throughout the trip and cumulatively), displays photos from the road, and
features the Secretary’s remarks and blogs. To date, Secretary John Kerry has traveled more than a million miles as Secretary.

**International Parental Child Abduction Reports and Data**

The International Child Abduction Prevention and Return Act (ICAPRA) states that the Department will submit an Annual Report on International Parental Child Abduction to Congress. The Department will submit a subsequent report to Congress on the actions taken towards those countries determined to have been engaged in a pattern of noncompliance in the Annual Report on International Parental Child Abduction. As with most reports submitted by the Department of State to Congress, these are public documents, published on travel.state.gov. In addition, the Bureau of Consular Affairs publishes International Parental Child Abduction data on travel.state.gov.

**International Religious Freedom Report**

**Investment Climate Statements**

Investment Climate Statements ([http://www.state.gov/e/eb/rls/othr/ics/](http://www.state.gov/e/eb/rls/othr/ics/)) provides country-specific information and assessments prepared by U.S. embassies and consulates abroad on investment laws and practices in over 170 countries worldwide. Each report provides approximately 20 pages of original research and a point of contact at the embassy or consulate to answer questions. Users can create tailored reports by country(ies) and topic(s). By making Investment Climates Statements more user-friendly, the Economic Bureau has increased the
reports’ relevance for U.S. companies and policy makers, in support of U.S. policies promoting rule of law, free trade and investment, and market-based, corruption-free models of economic growth and prosperity.

**Office of the Historian (history.state.gov)**

The Office of the Historian maintains a public website at: history.state.gov, which provides in-depth information to the public on the history of U.S. foreign policy. In addition to a full text archive of the Foreign Relations of the United States series (containing over 190,000 documents from a growing archive of 351 volumes published since 1861, to be complete with all 525+ volumes within two to three years.), the website includes valuable encyclopedic content on the history of U.S. relations with states around the world, a database of the Department’s principal officers and chiefs of mission, and other publications and datasets. The Office regularly posts information about its publications and activities on its Twitter account, @HistoryAtState.

In keeping with the Open Government Directive’s principle of transparency, participation, and collaboration as the cornerstone of an open government, the Office of the Historian posts all of the publications, datasets, and source code from its public website on the popular open government data and code sharing site, GitHub, at: https://github.com/HistoryAtState. Interested readers can download and install a complete, functioning copy of the website (which uses only free, open source software) on their computer, enabling researchers to perform sophisticated analysis not possible through the public website. The Office encodes all its publications and datasets according to the highest standards for digital texts, including those set out by the Text Encoding Initiative, the Library of Congress, and the National Archives and Records Administration.

**Office of the Inspector General Inspection Reports**

The Department's Office of the Inspector General (OIG) (https://oig.state.gov) inspects each of the approximately 260 U.S. embassies, diplomatic posts, and international broadcasting installations throughout the world to determine whether policy goals are being achieved and whether the interests of the United States are being represented and advanced effectively. Additionally, the OIG performs
specialized security inspections and audits in support of the Department’s mission to provide effective protection to our personnel, facilities, and sensitive information. The OIG also audits Department and BBG operations and activities to ensure that they are as effective, efficient, and economical as possible. Finally, the OIG investigates instances of fraud, waste, and mismanagement that may constitute either criminal wrongdoing or violation of Department and BBG regulations. Versions of the reports that have been redacted to remove classified or sensitive information are published online on the OIG website.

**Open Source Platform for State.gov and Embassy Websites**

In support of the President’s Open Government Directive to publish information online in an open format, the Office of Website Management (PA/WM) is migrating the current, proprietary Content Management System used for the Department’s website, www.state.gov, to an open source platform. This will allow users to easily repurpose any code developed for state.gov. The Directive also requires agencies to use modern technology to disseminate useful information. PA/WM is developing more application programming interfaces (APIs) to allow users to access and disseminate our data more easily, thereby extending the reach of our information. The migration is targeted to begin in early 2017.

**Per Diem, Allowances and Standardized Regulation**

The Office of Allowances in the Bureau of Administration develops and coordinates policies, regulations, standards, and procedures to administer the government-wide allowances and benefits program abroad under the Department Standardized Regulations (DSSR).

The Office compiles statistics of living costs abroad, quarters allowances, hardship differentials, and danger pay allowances and computes the established allowances to compensate U.S. government civilian employees for costs and hardships related to assignments abroad. The office is also responsible for establishing maximum per diem rates for foreign areas.
The Department’s Office of Allowances (A/OPR/ALS) publishes its allowance and per diem tables online at [https://aoprals.state.gov/](https://aoprals.state.gov/) where they can be used by private companies in determining their own allowances and per diem rates.

**Plans, Performance and Budget Documents**

Located online at: [http://www.state.gov/s/d/rm/c6113.htm](http://www.state.gov/s/d/rm/c6113.htm)

- **Congressional Budget Justification**
  - The FY 2017 Congressional Budget Justification – Department of State, Foreign Operations, and Related Programs describes the funding required for State and USAID to carry out our missions worldwide.

- **State Dept Agency Financial Report**
  - The FY 2015 Agency Financial Report provides an overview of the Department’s financial and performance data to help Congress, the President, and the public assess our stewardship over the resources entrusted to us.

- **State Dept Joint Summary of Performance and Financial Information**
  - The FY 2015 Joint Summary of Performance and Financial Information describe the performance and accomplishments achieved by State and USAID toward the highest U.S. diplomatic and development objectives.

- **FY 2016 Annual Performance Plan and FY 2014 Annual Performance Report**
  - The FY 2016 Annual Performance Plan and FY 2014 Annual Performance Report describe the diplomacy and development efforts of the Department of State and USAID to achieve the strategic objectives and performance goals set forth in the [FY 2014-2017 Department of State and USAID Joint Strategic Plan](http://www.state.gov/s/d/rm/c6113.htm).

- **FY 2014-2017 U.S. Department of State and USAID Strategic Plan**
  - The Department of State and USAID Strategic Plan for FY 2014-2017 presents how the Department and USAID will implement U.S. foreign policy and development assistance.
- **Department of State and U.S. Agency for International Development Foreign Assistance Programs Federal Program Inventory**
  - This document describes the foreign assistance programs of the Department of State and U.S. Agency for International Development, as well as how each program supports the Joint State-USAID Strategic Goals and Strategic Objectives.

- **U.S. Department of State Federal Program Inventory List**
  - This document describes each of the Department of State’s 22 State operations programs across 43 bureaus/offices, as well as how the program supports the Department’s broader Strategic Goals.

- **State-USAID Agency Priority Goals for Fiscal Years 2012-2013 for U.S. Department of State and U.S. Agency for International Development**

- **ForeignAssistance.gov**
  - ForeignAssistance.gov makes it possible to explore how the U.S. government invests in countries around the world.

- **State Dept Inspector General Audits and Reports**
  - The Office of Inspector General conducts independent audits, inspections, and investigations that advance the missions of the Department of State and the Broadcasting Board of Governors.

- **Government Accountability Office (GAO) Reports**
  - GAO reports on all Federal agencies to help improve the performance and ensure the accountability of the federal government.

**Press Briefings and Interviews**

The Press Office responds to press queries, conducts media interviews, monitors media for breaking international events, and coordinates special press briefings and conference calls. In addition, the Press Office coordinates interview requests from the national media for senior Department officials other than the Secretary of State. The staff proactively promotes interviews on a wide variety of issues to national media outlets and places editorials in major U.S. newspapers. Daily press briefings
are made accessible to the public in both transcript and video format at:

Privacy Impact Assessments

Section 208, Privacy Provisions of the E-Government Act of 2002 requires agencies to meet specific requirements to ensure sufficient protections are in place for the privacy of personal information. As agencies implement citizen-centered, electronic government, Privacy Impact Assessments (PIA) confirm that the government uses the personal information provided to it for the purpose intended; that the information remains timely, relevant, accurate and complete; and, that it is protected while the government has it, and that it is maintained it only as long as the government needs it.

PIAs ensure that:

- The public is aware of the information the Department collects about it;
- Any impact these systems have on personal privacy is adequately addressed;
- Only personal information necessary to administer our programs is collected, and no more; and
- Adequate system safeguards are in place to protect the personal privacy of individuals in accordance with Department standards

The Privacy Impact Statements for the various Department of State Systems that collect personal information are available online at: https://foia.state.gov/Learn/PIA.aspx.

Regional Geographic Products

The Humanitarian Information Unit serves as a USG interagency center to identify, collect, analyze and disseminate unclassified information critical to USG decision makers and partners in preparation for and response to humanitarian emergencies worldwide, and to promote best practices for humanitarian information management. The HIU contextualizes data geospatially by mapping population displacements in the Middle East, HIV-related information in Africa, transnational impact of man-made and natural disasters, etc. It publishes its products in the
following categories: Africa, Central Asia, East & Southeast Asia, Global & Transnational, Latin American & the Caribbean, Middle East, PEPFAR, Papers & other analysis, South Asia. The products are accessible online at: https://hiu.state.gov/Pages/Products.aspx. Many, but not all of these datasets are cataloged on data.gov.

Salary Schedules

Foreign Service salary schedules are made accessible to the public at: http://www.state.gov/m/dghr/pay/index.htm.

Section 655, Annual Military Assistance Report

Section 655 Annual Military Assistance Reports cover defense articles and defense services licensed for export under 22 U.S.C. 2778 of the Arms Export Control Act (see the AECA Web page here). These reports are provided annually to Congress pursuant to Section 655 of the Foreign Assistance Act and, as required by that Section, these reports show for a fiscal year the aggregate dollar value and quantity of defense articles and defense services authorized as direct commercial sales to each foreign country http://www.pmddtc.state.gov/reports/655_intro.html

Status Pending Congressional Notifications (CNs)

Section 36(f) of the Arms Export Control Act (22 U.S.C. 2778) mandates that notifications to the Congress pursuant to sections 36(c) and 36(d) must be published in the Federal Register when they are transmitted to Congress or as soon thereafter as practicable. Before transmission to Congress, the Department of State’s Bureau of Political-Military Affairs, Directorate of Defense Trade Controls publishes a matrix, updated weekly, of the status of pending CNs, online at: http://www.pmddtc.state.gov/reports/CNs/CN_Matrix2016.pdf

System of Records Notices

A System of Records Notice (https://foia.state.gov/Learn/SORN.aspx) is intended to inform the public about what kinds of personal information federal agencies maintain; to limit the uses and disclosures of the information to those compatible
U.S. Citizen Deaths Overseas

Sec. 204(c) of P.L. 107-228, the Foreign Relations Authorization Act for Fiscal Year 2003, mandates that, to the maximum extent practicable, the Department collects and makes available on the Department’s Bureau of Consular Affairs Internet website certain information with respect to each United States citizen who dies in a foreign country from a non-natural cause. The information required is:

§ (1) the date of death;
§ (2) the locality where the death occurred; and
§ (3) the cause of death, including, if the death resulted from an act of terrorism, a statement disclosing that fact. Whenever possible, the Department provides a more specific cause of death (e.g., Drowning-Ocean, instead of Drowning).

The information on the website must be listed on a country-by-country basis, and must cover deaths occurring since the date of enactment of the legislation on September 30, 2002, or occurring during the preceding three calendar years, whichever period is shorter. The information is updated every six months and is available online at: travel.state.gov/content/travel/en/statistics/deaths.html.

U.S. Passport Application and Issuance Statistics

Statistical data is available on the number of U.S. Passports issued by year, valid passports in circulation by year, passport applications received by year, and passports issued by state. The data is available at: http://travel.state.gov/content/passports/en/passports/statistics.html.

Visa Appointment and Processing Wait Times

The travel.state.gov website at travel.state.gov/content/visas/en/general/wait-times.html, provides the following data to enable visa applicants to plan their
travel and to provide the Bureau of Consular Affairs with greater insight into visa operations at consular posts:

Wait Time for Interview: The estimated wait time to receive an interview appointment to apply at a U.S. embassy or consulate.

Wait Time for Processing: The typical wait time for visa processing refers to the time it typically takes for a visa to be ready for pick-up or delivery by courier after the consular officer has made the decision to issue the visa.

Note: These Visa Wait Times estimates do not include time required for administrative processing, which may affect a small number of applications.

**Visa Reciprocity and Civil Documents by Country**

Nonimmigrant visa applicants from certain countries or areas of authority may need to pay a visa issuance fee after a consular officer approves their application. These fees are based on the principle of reciprocity: when a foreign government imposes fees on U.S. citizens for certain types of visas, the United States will impose a reciprocal fee on citizens of that country or area of authority for similar types of visas.

Immigrant visa applicants must submit certain civil documents as part of their visa application, such as birth certificates and police records. (Nonimmigrant visa applicants do not routinely need to submit civil documents as part of their visa application.)

The Department’s Bureau of Consular Affairs publishes reciprocity tables and civil documents by country online at [travel.state.gov/content/visas/en/fees/reciprocity-by-country.html](http://travel.state.gov/content/visas/en/fees/reciprocity-by-country.html).

Each Reciprocity Page provides detailed information about visa reciprocity for that country, as well as information about how to obtain required civil documents from the selected country.
Visa Statistics

The Report of the Visa Office is an annual report that provides statistical information on immigrant and nonimmigrant visa issuances by consular offices, as well as information on the use of visa numbers in numerically limited categories. The reports are online at: travel.state.gov/content/visas/en/law-and-policy/statistics.html.

Statistics specific to the special immigrant visa program in Iraq and Afghanistan can be found in the quarterly processing reports available here for the Iraqi program and here for Afghan program.
Flagship Initiatives

New Flagship Initiatives

The Department of State is committed to advancing a transparent, collaborative, and participatory Open Government and, in doing so, its mission. In this year’s Open Government Plan, the Department has designated three new initiatives as “Flagship Initiatives,” specifically:

- Harnessing the Data Revolution for Sustainable Development
- Advance Democracy and Human Rights, Strengthening Civil Society
- Modernize the Way We Do Diplomacy and Development

The Department engages with the public and interested stakeholders with regard to foreign policy initiatives, among which is Open Government, through a range of fora and mechanisms, many of which have been described in this document. These include participation in the Open Government Partnership and engaging with civil society. This engagement both strengthens civil society and provides data that civil society needs in order to partner effectively in accomplishing shared goals and utilizing social media platforms to engage with the public. It also enables the Department to partner with civil society and the public in developing policy documents, such as the QDDR, through open and transparent processes that incorporate a two-way dialogue.

Each of these initiatives has the potential to change the way that the Department does business, which is the intention of the Open Government Directive – to change the way that the government interacts with citizens, how agencies collaborate internally, and how much information is available to the public.

Harnessing the Data Revolution for Sustainable Development

As noted earlier in this document, on September 27, 2015, the member states of the United Nations agreed to a set of Sustainable Development Goals (Global Goals) that define a common agenda to achieve inclusive growth, end poverty, and protect the environment by 2030. The Global Goals build on tremendous development
gains made over the past decade, particularly in low- and middle-income countries, and set actionable steps with measurable indicators to drive progress. The availability and use of high quality data is essential to measuring and achieving the Global Goals. By harnessing the power of technology, mobilizing new and open data sources, and partnering across sectors, we will achieve these goals faster and make their progress more transparent.

The following programs (described in detail earlier in this document) support this flagship initiative:

- Country Data Collaboratives for Local Impact
- Feed the Future
- FIND
- Foreignassistance.gov
- Imagery to the Crowd
- Improving Public Access to Air Quality Information
- MapGive
- Open Source Platform for State.gov
- PEPFAR
- Secondarycities.state.gov
- Sustainable Energy for All

Advance Democracy and Human Rights, Strengthening Civil Society

Protecting human rights and advocating democracy is an integral part of a U.S. foreign policy that seeks to end oppression, combat terrorism, and advocate democratic ideals and freedoms worldwide. The Department seeks opportunities to cooperate with human rights advocates and policy makers to engender positive change in countries that strive for democracy and human rights and to challenge those that routinely ignore international human rights or selectively uphold them. In this effort, the Department utilizes the full range of diplomatic and programmatic tools. Multilaterally, the Department engages in fora such as the United Nations Commission on Human Rights (UNCHR), the Community of Democracies, the International Labor Organization (ILO), and regional organizations, such as the Organization for Security and Cooperation in Europe (OSCE) and the Organization of American States (OAS), to advance these
democratic ideals. The Department’s annual Country Reports on Human Rights Practices serve not only to inform Congress, but also to raise awareness of human rights across the globe.

The following programs (described in detail earlier in this document) support this flagship initiative:

- *Exchange Programs*
- *HumanRights.gov*
- *TechCamps*

**Modernize the Way We Do Diplomacy and Development**

In the 21st Century, effective engagement with international partners, stakeholders, customers, and audiences requires fundamental shifts that involve applying new technologies and innovative approaches for strengthening collaboration, coordinated and integrated strategic planning linked to budget priorities, and expanding our internal and external networks. Whether promoting transparency through open and accountable government and open data initiatives, meeting increased customer demand for passports and other consular services, expanding our digital media to reach a rapidly growing audience, or eliminating inefficiencies and reducing costs through business process reform, the Department and USAID are working together to amplify the effectiveness of our diplomatic and development professionals. Modernizing how the Department and USAID operate is key to bolstering the U.S. government response to the range and magnitude of foreign policy and development challenges. In accomplishing our mission, we stand committed to becoming more efficient, effective, transparent, and flexible organizations while maintaining accountability to the American people in managing government resources.

The following programs (described in detail earlier in this document) support this flagship initiative:

- *GovUP*
- *Live Digital Engagement*
- *Strategy Lab*
• Virtual Fellows Program
• Virtual Student Foreign Service

Ongoing Flagship Initiatives (described in detail earlier in this document)

Innovating with Geographic Data

• Imagery to the Crowd
• MapGive
• Department of State by State Map

Embracing Technologies and Platforms to Increase Public Access to Information

• Improving Public Access to Air Quality Information
• Open Source Platform for State.gov
• Virtual Student Foreign Service
• ForeignAssistance.gov

OPEN GOVERNMENT WEB PAGES

The Department of State has created an Open Government website at: http://www.state.gov/open/, linked from the state.gov home page. The web page provides access to available datasets and represents the Department's continuing efforts to engage the public more dynamically, solicit input, and increase collaboration.
