

## Appendix B: Template for Narrative Cover Sheet

The HIV/AIDS Sustainability Index and Dashboard (SID) is a tool completed every two years by PEPFAR teams and partner stakeholders to sharpen the understanding of each country's sustainability landscape and to assist PEPFAR and others in making informed HIV/AIDS investment decisions. Based on responses to 110 questions, the SID assesses the current state of sustainability of national HIV/AIDS responses across 17 critical elements. Scores for these elements are displayed on a color-coded dashboard, together with contextual charts and information. As the SID is completed over time, it will allow stakeholders to track progress and gaps across these key components of sustainability.

Dark Green Score (8.50-10 points) (sustainable and requires no additional investment at this time)
Light Green Score (7.00-8.49 points) (approaching sustainability and requires little or no investment)
Yellow Score (3.50-6.99 points) (emerging sustainability and needs some investment)
Red Score (<3.50 points) (unsustainable and requires significant investment)

**Country Overview:** Provide a one-paragraph overview of the SID findings and any country context that is critical to framing sustainability issues in the country.

Namibia has a robust country led HIV/AIDS response that has the country on the cusp of epidemic control, with the response having achieved 94-96-95 on the UNAIDS 90-90-90 FAST-TRACK targets way in advance of the 2020 timelines, barreling down on the 2030 targets of 95-95-95 almost a decade in advance.

Namibia has been able to achieve these goals on a foundation of strong political leadership, robust institutions, and a dedicated and competent cadre of health care workers. This is borne out in the scoring of the SID 2019 for Namibia, with no red scores, and seven out of the seventeen scores being some type of green hue. In general, the SID 2019 suggests that Namibia's HIV/AIDS response still needs some investments, particularly in Governance, Leadership and Accountability as well as the Strategic Information domains.

**SID Process:** The SID process kicked off with the constitution of a multisectoral Core Team for the SID 2019, which included representatives from UNAID, Global Fund, Ministry of Health and Social Services, USAID, CDC, and the PEPFAR Coordinator's Office. This core team then broke the SID 2019 into the different domains with different members of the Core Team having Key Informant Interviews and Focus Group discussions with experts and stakeholders on the domains relevant to their expertise or constituency. The version of the SID 2019 thus populated was validated by over 60 multisectoral stakeholders from government, bilateral and multilateral development partners, civil society and the private sector over two days.

**Sustainability Strengths:** On average Namibia's SID 2019 scores place it in a category of emerging sustainability, with some investment still required to entrench the sustainability of the response.

- **Planning and Coordination** (8.33, color): 2-4 sentences

The government develops and implements a progressive and comprehensive national Strategic Framework for HIV/AIDS, which is the basis for the response in the country, with development partners (including PEPFAR) and other key stakeholder aligning their own operational plans with this framework.

- **Policies and Governance** (7.71, color)

Namibia is an early adopter of WHO guidelines, implementing them with fidelity, which has allowed the country to jump ahead of the curve in responding to the HIV/AIDS epidemic. There are some issues around legal protections for key populations, which are part of ongoing discussions between the government and civil society.

- **Domestic Resources Mobilization** (8.13, color)

Namibia is responsible for funding more than 80% of its HIV/AIDS response from domestic resources. Discussions are underway to determine the long-term financing strategy for the health sector, including HIV/AIDS on the frame of Universal Health Coverage.

- **Market Openness** (10.00, color)

Namibia achieved a perfect score for market openness, mostly a function of Namibia's free-market economic fundamentals, which do not restrict private enterprise. However, government has struggled to leverage private capacity and capabilities to strengthen the HIV/AIDS response.

**Sustainability Vulnerabilities:** Namibia's HIV/AIDS response faces some vulnerabilities, which have been tested in recent times with the stressed that a multi-year drought and an economic recession has applied to the public health system. There is a need for additional investment to build the resilience of the response.

- **Private Sector Engagement** (4.32, color): 2-4 sentences

Namibia has is considered to have vibrant private sector, particularly the private health sector, but this sector has not been effectively engaged to the benefit of the HIV/AIDS response, despite there being coordination mechanisms to facilitate private sector participation in the response.

- **Human Resources for Health** (5.85, color): 2-4 sentences

Namibia's public health sector operates on an outdated Human Resources for Health structure, which is not always responsive to the needs of the country's HIV/AIDS response. A significant portion of HIV/AIDS specific HRH is supported by donor resources or oversight.

- **Epidemiological and Health Data** (5.34, color): 2-4 sentences

Major epidemiological and health data initiatives are significantly supported by development partners and might currently not be carried out with fidelity in the absence of that support.

- **Data for Decision-Making ecosystem** (5.17, color): 2-4 sentences

The government has a strong interest in data for decision-making and is in the process of developing an e-Health Strategy, which will further this intent.

### Rule of Law Index (World Justice Project)

#### Overall WJP Rule of Law Index Score

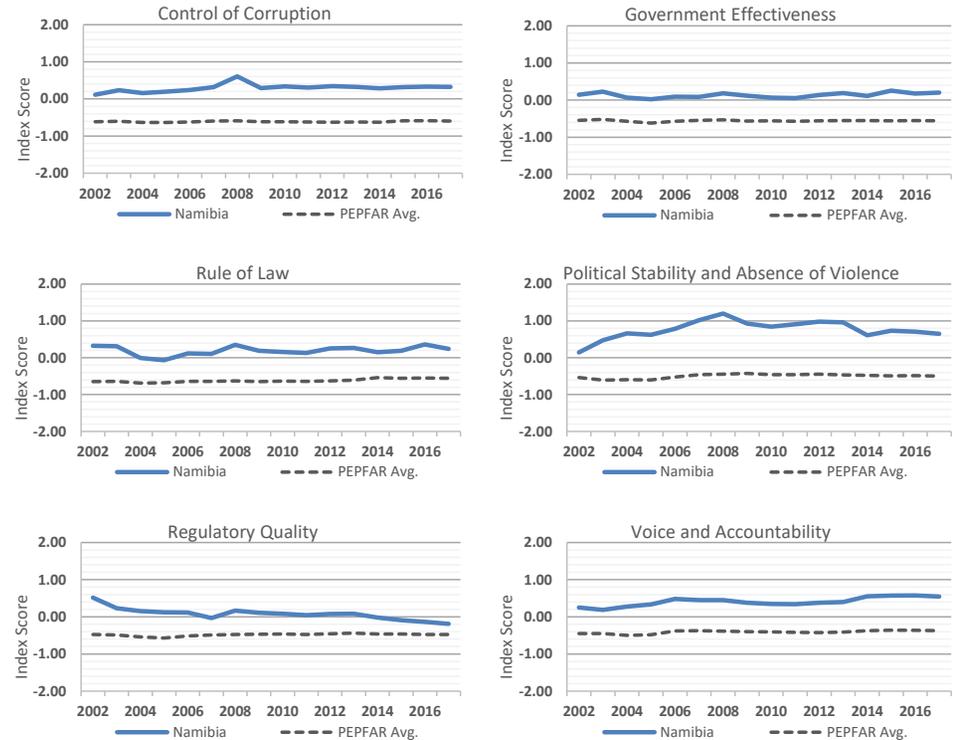

WJP's Rule of Law Index measures the general public's experience and perception across eight 'factors':

- 1. Constraints on Government Powers:** Governmental powers are limited by both internal and external checks, including auditing and review. Governmental officials are subject to the law and sanctioned for misconduct.
- 2. Absence of Corruption:** Government officials in all branches of government do not use public office for private gain.
- 3. Open Government:** Citizens have open access to government information and data, complaint mechanisms, and civic participation.
- 4. Fundamental Rights:** There is equal treatment of citizens and absence of discrimination. The rights to freedom of expression, security of the person, and due process are effectively guaranteed.
- 5. Order and Security:** Crime and civil conflict are effectively limited. Personal grievances are not redressed through violence.
- 6. Regulatory Enforcement:** Government regulations are effectively applied and enforced without improper influence. Due process is respected in administrative proceedings.
- 7. Civil Justice:** Civil justice is accessible and free of discrimination, corruption and improper government influence.
- 8. Criminal Justice:** Criminal justice is impartial, timely and effective, and free from corruption or improper government influence. There is due process of law and rights of the accused.

More information can be found at: <https://worldjusticeproject.org/our-work/research-and-data/wjp-rule-law-index-2019>

### Worldwide Governance Indicators (World Bank)

The World Bank Worldwide Governance Indicators (WGI) score countries based on six dimensions of governance:

- 1. Control of Corruption:** captures perceptions of the extent to which public power is exercised for private gain, including both petty and grand forms of corruption, as well as 'capture' of the state by elites and private interests.
- 2. Government Effectiveness:** measures the quality of public services, the quality of the civil service and its independence from political pressure, the quality of policy formulation and implementation (including the efficiency of revenue mobilization and budget management), and the credibility of the government's commitment to its stated policies.
- 3. Rule of Law:** captures perceptions of the extent to which agents have confidence in and abide by the rules of society, and in particular the quality of contract enforcement, property rights, the police, and the courts, as well as the likelihood of crime and violence.
- 4. Political Stability and Absence of Violence:** measures perceptions of the likelihood of political instability and/or politically-motivated violence, including terrorism.
- 5. Regulatory Quality:** Measures perceptions of the ability of the government to formulate and implement sound policies and regulations that permit and promote private sector development.
- 6. Voice and Accountability:** captures perceptions of the extent to which a country's citizens are able to participate in selecting their government, as well as freedom of expression, freedom of association, and a free media.

## Domain A. Governance, Leadership, and Accountability

**What Success Looks Like:** Host government upholds a transparent and accountable resolve to be responsible to its citizens and international stakeholders for achieving planned HIV/AIDS results, is a good steward of HIV/AIDS finances, widely disseminates program progress and results, provides accurate information and education on HIV/AIDS, and supports mechanisms for eliciting feedback. Relevant government entities take actions to create an enabling policy and legal environment, ensure good stewardship of HIV/AIDS resources, create space for and promote participation of the private sector, and provide technical and political leadership to coordinate an effective national HIV/AIDS response.

1. Planning and Coordination: Host country develops, implements, and oversees a costed multiyear national strategy and serves as the preeminent architect and convener of a coordinated HIV/AIDS response in the country across all levels of government and key stakeholders, civil society and the private sector.	Data Source	Notes/Comments
<p><b>1.1 Content of National Strategy:</b> Does the country have a multi-year, costed national strategy to respond to HIV?</p> <p> <input type="radio"/> A. There is no national strategy for HIV/AIDS  <input checked="" type="radio"/> B. There is a multiyear national strategy. Check all that apply:                 </p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> It is costed</li> <li><input checked="" type="checkbox"/> It has measurable targets.</li> <li><input checked="" type="checkbox"/> It is updated at least every five years</li> </ul> <p>Strategy includes all crucial response components for prevention and treatment (HIV testing, treatment and care [including children and adolescents], PMTCT, transition from 'catchup' to sustainable VMMC if country performs VMMCs, scale-up of viral load, EID, and other key metrics)</p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> Strategy includes explicit plans and activities to address the needs of key populations.</li> <li><input checked="" type="checkbox"/> Strategy includes all crucial response components to mitigate the impact of HIV on vulnerable children</li> <li><input checked="" type="checkbox"/> Strategy (or separate document) includes considerations and activities related to sustainability</li> </ul>	<p>1.1 Score: 2.50</p> <p>NSF 2017-22; Operational Plan</p>	<p>Structural issues such as stigma, human rights, etc. should be included in question, as compenents of national strategy. KP are not explicitly addressed in the NSF, no strategy or costed operational plan to address KP issues.</p>

<p><b>1.2 Participation in National Strategy Development:</b> Who actively participates in development of the country's national HIV/AIDS strategy?</p>	<p><input type="radio"/> A. There is no national strategy for HIV/AIDS</p> <p><input checked="" type="radio"/> B. The national strategy is developed with participation from the following stakeholders (check all that apply):</p> <p><input checked="" type="checkbox"/> Its development was led by the host country government</p> <p><input checked="" type="checkbox"/> Civil society actively participated in the development of the strategy</p> <p><input checked="" type="checkbox"/> Private health sector providers, facilities, and training institutions, actively participated in the development of the strategy</p> <p><input type="checkbox"/> Businesses and the corporate sector actively participated in the development of the strategy including workplace development and corporate social responsibility (CSR)</p> <p><input checked="" type="checkbox"/> External agencies (i.e. donors, other multilateral orgs., etc.) supporting HIV services in-country participated in the development of the strategy</p>	<p>1.2 Score: 2.00</p>	<p>NSF 2017-22; Operational Plan</p>	<p>There was limited participation from businesses and corporate sector through an umbrella body.</p>
<p><b>1.3 Coordination of National HIV Implementation:</b> To what extent does the host country government coordinate all HIV/AIDS activities implemented in the country, including those funded or implemented by CSOs, private sector, and donor implementing partners?</p>	<p>Check all that apply:</p> <p><input checked="" type="checkbox"/> There is an effective mechanism within the host country government for internally coordinating HIV/AIDS activities implemented by various government ministries, institutions, offices, etc.</p> <p><input checked="" type="checkbox"/> The host country government routinely tracks and maps HIV/AIDS activities of:</p> <p><input checked="" type="checkbox"/> civil society organizations</p> <p><input type="checkbox"/> private sector (including health care providers and/or other private sector partners)</p> <p><input checked="" type="checkbox"/> donors</p> <p><input checked="" type="checkbox"/> The host country government leads a mechanism or process (i.e. committee, working group, etc.) that routinely convenes key internal and external stakeholders and implementers of the national response for planning and coordination purposes.</p> <p><input checked="" type="checkbox"/> Joint operational plans are developed that include key activities of implementing organizations.</p> <p><input type="checkbox"/> Duplications and gaps among various government, CSO, private sector, and donor activities are systematically identified and addressed.</p>	<p>1.3 Score: 1.83</p>	<p>NSF 2017-22; Operational Plan. NASA; NHA.</p>	<p>National level mechanism is more effective than some sub-national level mechanisms. Effectiveness of some mechanism (i.e. RACCOCS) is variable by region. Representation on some mechanism (i.e. RACCOCS) are not reflective of all stakeholders operating in the regions. The accountability framework of the coordination mechanism might undermine the effectiveness of some of the mechanisms, as there might not be consistent reporting from these mechanisms, as a result of dual reporting at national/regional level. Government makes attempts to track and map HIV/AIDS activities, but this is not comprehensive, and leaves some CSOs out. Track through NASA, Partner Reporting Form.</p>

<p><b>1.4 Sub-national Unit Accountability:</b> Is there a mechanism by which sub-national units are accountable to national HIV/AIDS goals or targets? (note: equal points for either checkbox under option B)</p>	<p><input type="radio"/> A. There is no formal link between the national plan and sub-national service delivery.</p> <p><input checked="" type="radio"/> B. There is a formal link between the national plan and sub-national service delivery. (Check the ONE that applies.)</p> <p><input checked="" type="checkbox"/> Sub-national units have performance targets that contribute to aggregate national goals or targets.</p> <p><input type="checkbox"/> The central government is responsible for service delivery at the sub-national level.</p>	<p>1.4 Score: 2.50</p>	<p>Regional HIV Annual Plans</p>	<p>Sub-national units implement activities in the national plan. The sub-national units have annual plans that include performance targets linked to the NSF, but there has been limited use of these targets for sub-national accountability.</p>
<p><b>Planning and Coordination Score: 8.83</b></p>				

<b>2. Policies and Governance:</b> Host country develops, implements, and oversees a wide range of policies, laws, and regulations that will achieve coverage of high impact interventions, ensure social and legal protection and equity for those accessing HIV/AIDS services, eliminate stigma and discrimination, and sustain epidemic control within the national HIV/AIDS response.		<b>Data Source</b>	<b>Notes/Comments</b>
<b>2.1 WHO Guidelines for ART Initiation:</b> Does current national HIV/AIDS technical practice follow current WHO guidelines for initiation of ART - i.e., optimal ART regimens for all populations (including TLD as recommended)?	For each category below, check yes or no to indicate if current national HIV/AIDS technical practice follows current WHO guidelines on optimal ART regimens for each of the following: <p>A. Adults (&gt;19 years)</p> <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <p>B. Pregnant and Breastfeeding Mothers</p> <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <p>C. Adolescents (10-19 years)</p> <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <p>D. Children (&lt;10 years)</p> <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	2.1 Score: 0.91	Treatment Guidelines 2019.

<p><b>2.2 Enabling Policies and Legislation:</b> Are there policies or legislation that govern HIV/AIDS service delivery or policies and legislation on health care which is inclusive of HIV service delivery?</p> <p>Note: If one of the listed policies differentiates policy for specific groups, please note in the Notes/Comments column.</p>	<p>Check all that apply:</p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> A national public health services act that includes the control of HIV</li> <li><input checked="" type="checkbox"/> A task-shifting policy that allows trained non-physician clinicians, midwives, and nurses to initiate and dispense ART</li> <li><input type="checkbox"/> A task-shifting policy that allows trained and supervised community health workers to dispense ART between regular clinical visits</li> <li><input checked="" type="checkbox"/> Policies that permit patients stable on ART to have reduced clinical visits (i.e. every 6-12 months)</li> <li><input checked="" type="checkbox"/> Policies that permit patients stable on ART to have reduced ARV pickups (i.e. every 3-6 months)</li> <li><input checked="" type="checkbox"/> Policies that permit streamlined ART initiation, such as same day initiation of ART for those who are ready</li> <li><input checked="" type="checkbox"/> Legislation to ensure the well-being and protection of children, including those orphaned and made vulnerable by HIV/AIDS</li> <li><input checked="" type="checkbox"/> Policies that permit HIV self-testing</li> <li><input checked="" type="checkbox"/> Policies that permit pre-exposure prophylaxis (PrEP)</li> <li><input checked="" type="checkbox"/> Policies that permit post-exposure prophylaxis (PEP)</li> <li><input checked="" type="checkbox"/> Policies that allow HIV testing without parental consent for adolescents, starting at age 15</li> <li><input checked="" type="checkbox"/> Policies that allow HIV-infected adolescents, starting at age 15, to seek HIV treatment without parental consent</li> </ul>	<p>2.2 Score: 0.83</p>	<p>National Policy on HIV/AIDS. Self-Testing Policy.</p>	<p>The self-testing policy was recently developed, and self-testing is being scaled up. There are concerns with the level of counselling available in regards to self-testing. Age of consent is 14.</p>
---	--	------------------------	--	--

<p><b>2.3 User Fees for HIV Services:</b> Are HIV infected persons expected or likely to be asked to pay user fees, either formal or informal, for <u>any</u> HIV services in the public sector: clinical, laboratory, testing, prevention and others?</p> <p>Note: "Formal" user fees are those established in policy or regulation by a government or institution.</p>	<p>Check all that apply:</p> <p><input checked="" type="checkbox"/> No, neither formal nor informal user fees exist.</p> <p><input type="checkbox"/> Yes, formal user fees exist.</p> <p><input type="checkbox"/> Yes, informal user fees exist.</p>	<p>2.3 Score: 0.91</p>	<p>National Health Act 2, 2015.</p>	
<p><b>2.4 User Fees for Other Health Services:</b> Are HIV infected persons expected or likely to be asked to pay user fees, either formal or informal, for <u>any</u> non-HIV services in the public sector, such as MCH/SRH, TB, outpatient registration, hospitalizations, and others?</p> <p>Note: "Formal" user fees are those established in policy or regulation by a government or institution.</p>	<p>Check all that apply:</p> <p><input type="checkbox"/> No, neither formal nor informal user fees exist.</p> <p><input checked="" type="checkbox"/> Yes, formal user fees exist.</p> <p><input type="checkbox"/> Yes, informal user fees exist.</p>	<p>2.4 Score: 0.23</p>	<p>National Health Act 2, 2015. Namibia Public &amp; Environment Health Act (2015).</p>	<p>There are patient administration fees, and hospitalization fees, and these are generally low.</p>
<p><b>2.5 Data Protection:</b> Does the country have policies in place that support the collection and appropriate use of patient-level data for health, including HIV/AIDS?</p>	<p>The country has policies in place that (check all that apply):</p> <p><input checked="" type="checkbox"/> Govern the collection of patient-level data for public health purposes, including surveillance</p> <p><input type="checkbox"/> Govern the collection and use of unique identifiers such as national ID for health records</p> <p><input checked="" type="checkbox"/> Govern the privacy and confidentiality of health outcomes matched with personally identifiable information</p> <p><input checked="" type="checkbox"/> Govern the use of patient-level data, including protection against its use in criminal cases</p>	<p>2.5 Score: 0.68</p>	<p>Constitution of Republic of Namibia, Article 13. MoHSS HIS Guidelines; National Policy on HIV/AIDS. Patient Health Charter, MoHSS. Hospital Standards and Criteria, MoHSS (2018).</p>	

<p><b>2.6 Legal Protections for Key Populations:</b> Does the country have laws or policies that specify protections (not specific to HIV) for specific populations?</p>	<p>Check all that apply:</p> <p>Transgender people (TG):</p> <p><input checked="" type="checkbox"/> Constitutional prohibition of discrimination based on gender diversity</p> <p><input type="checkbox"/> Prohibitions of discrimination in employment based on gender diversity</p> <p><input type="checkbox"/> A third gender is legally recognized</p> <p><input type="checkbox"/> Other non-discrimination provisions specifying gender diversity (note in comments)</p> <p>Men who have sex with men (MSM):</p> <p><input checked="" type="checkbox"/> Constitutional prohibition of discrimination based on sexual orientation</p> <p><input type="checkbox"/> Hate crimes based on sexual orientation are considered an aggravating circumstance</p> <p><input type="checkbox"/> Incitement to hatred based on sexual orientation prohibited</p> <p><input type="checkbox"/> Prohibition of discrimination in employment based on sexual orientation</p> <p><input type="checkbox"/> Other non-discrimination provisions specifying sexual orientation</p> <p>Female sex workers (FSW):</p> <p><input checked="" type="checkbox"/> Constitutional prohibition of discrimination based on occupation</p> <p><input type="checkbox"/> Sex work is recognized as work</p> <p><input type="checkbox"/> Other non-discrimination protections specifying sex work (note in comments)</p>	<p>2.6 Score: 0.32</p>	<p>Note: This question is adapted from questions asked in the revised UNAIDS NCPI (2016). If your country has completed the new NCPI, you may use it as a data source to answer this question. NCPI 2016, Legal Environment Assessment. Labour Act (current). National Alcohol and Substance Abuse Policy in draft. Constitution of the Republic of Namibia.</p>	<p>Constitution of the Republic of Namibia: Article 10 (2) No person may be discriminated against on the grounds of sex, race, colour, ethnic origin, religion, creed or social or economic status. The immoral Practices Act does not explicitly refer to transgender (key pops), there is still some complications about the definition of gender in law. There should be awareness raised on the definition of gender. Transgendered people are not recognized by law, there is a policy in place that generally wards against discrimination, but not in practice. The acts and policies don't explicitly address sexual orientation, which means sexual minorities don't have the explicit protection of the law in practice. Key populations are protected under the "general population" laws as there isn't a specific law outlined for key populations. The new Labour law removed a provision for non-discrimination based on sexual orientation (change in 2.6 second checkbox; Constitution provides broad protections, but Immoral Act section 21, discriminates against TG, MSM, FSW.</p>
--	--	------------------------	--	---

	<p>People who inject drugs (PWID):</p> <p><input type="checkbox"/> Specific antidiscrimination laws or other provisions for people who use drugs (specify in comments)</p> <p><input checked="" type="checkbox"/> Explicit supportive reference to harm reduction in national policies</p> <p><input type="checkbox"/> Policies that address the specific needs of women who inject drugs</p>			
<p><b>2.7 Legal Protections for Victims of Violence:</b> Does the country have protections in place for victims of violence?</p>	<p>The country has the following to protect key populations and people living with HIV (PLHIV) from violence:</p> <p><input checked="" type="checkbox"/> General criminal laws prohibiting violence</p> <p><input type="checkbox"/> Specific legal provisions prohibiting violence against people based on their HIV status or belonging to a key population</p> <p><input checked="" type="checkbox"/> Programs to address intimate partner violence</p> <p><input checked="" type="checkbox"/> Programs to address workplace violence</p> <p><input checked="" type="checkbox"/> Interventions to address police abuse</p> <p><input checked="" type="checkbox"/> Interventions to address torture and ill treatment in prisons</p> <p><input checked="" type="checkbox"/> A national plan or strategy to address gender-based violence and violence against women that includes HIV</p> <p><input checked="" type="checkbox"/> Legislation on domestic violence</p> <p><input checked="" type="checkbox"/> Criminal penalties for domestic violence</p> <p><input checked="" type="checkbox"/> Criminal penalties for violence against children</p>	<p>2.7 Score: 0.82</p>	<p>Note: This question is adapted from questions asked in the revised UNAIDS NCPI (2016). If your country has completed the new NCPI, you may use it as a data source to answer this question. NCPI 2016, Legal Environment Assessment. National GBV Plan of Action. Child Care and Protection Act (Act 3 of 2015).</p>	

**2.8 Structural Obstacles:** Does the country have laws and/or policies that present barriers to delivery of HIV prevention, testing and treatment services or the accessibility of these services?

**For each question, select the most appropriate option:**

Are transgender people criminalized and/or prosecuted in the country?

- Both criminalized and prosecuted
- Criminalized
- Prosecuted
- Neither criminalized nor prosecuted

Is cross-dressing criminalized in the country?

- Yes
- Yes, only in parts of the country
- Yes, only under certain circumstances
- No

Is sex work criminalized in your country?

- Selling and buying sexual services is criminalized
- Selling sexual services is criminalized
- Buying sexual services is criminalized
- Partial criminalization of sex work
- Other punitive regulation of sex work
- Sex work is not subject to punitive regulations or is not criminalized.
- Issue is determined/differs at subnational level

2.8 Score: 0.74

Note: This question is adapted from questions asked in the revised UNAIDS NCPI (2016). If your country has completed the new NCPI, you may use it as a data source to answer this question. NCPI 2016, Legal Environment Assessment. Combating Immoral Practices Act 21 of 1980. Roman-Dutch common law, outlaws sodomy or buggery, Unnatural Sexual Offences Act.

Sexual orientation is not addressed or explicitly mentioned in laws and policies. There is some stigma, discrimination and persecution of transgender people, including being singled out by police (particularly if cross-dressing - humiliation, human rights violations) and discrimination at health facilities. Criminalization of transgender people presenting different gender as on identification documents. Cross-dressing is not criminalized, but there is stigma and discrimination against people who cross-dress.

Does the country have laws criminalizing same-sex sexual acts?

- Yes, death penalty
- Yes, imprisonment (14 years - life)
- Yes, imprisonment (up to 14 years)
- No penalty specified
- No specific legislation
- Laws penalizing same-sex sexual acts have been decriminalized or never existed

Does the country maintain the death penalty in law for people convicted of drug-related offenses?

- Yes, with high application (sentencing of people convicted of drug offenses to death and/or carrying out executions are a routine and mainstreamed part of the criminal justice system)
- Yes, with low application (executions for drug offenses may have been carried out in recent years, but in practice such penalties are relatively rare)
- Yes, with symbolic application (the death penalty for drug offenses is included in legislation, but executions are not carried out)
- No

Does the country have laws criminalizing the transmission of, non-disclosure of, or exposure to HIV transmission?

- Yes
- No, but prosecutions exist based on general criminal laws
- No

Does the country have policies restricting the entry, stay, and residence of people living with HIV (PLHIV)?

- Yes
- No

	<p>Does the country have other punitive laws affecting lesbian, gay, bisexual, transgender, and intersex (LGBTI) people?</p> <p><input type="checkbox"/> Yes, promotion ("propaganda") laws</p> <p><input checked="" type="checkbox"/> Yes, morality laws or religious norms that limit LGBTI freedom of expression and association</p> <p><input type="checkbox"/> No</p>			
<p><b>2.9 Rights to Access Services:</b> Recognizing the right to nondiscriminatory access to HIV services and support, does the government have efforts in place to educate and ensure the rights of PLHIV, key populations, adolescents, and those who may access HIV services about these rights?</p>	<p>There are host country government efforts in place as follows (check all that apply):</p> <p><input checked="" type="checkbox"/> To educate PLHIV about their legal rights in terms of access to HIV services</p> <p><input checked="" type="checkbox"/> To educate key populations about their legal rights in terms of access to HIV services</p> <p><input checked="" type="checkbox"/> National law exists regarding health care privacy and confidentiality protections</p> <p><input type="checkbox"/> Government provides financial support to enable access to legal services if someone experiences discrimination, including redress where a violation is found</p>	<p>2.9 Score: 0.91</p>	<p>NSF 2017 - 2022. Legal Aid Act 29 of 1990.</p>	<p>There is a need to sensitize the health workers about the rights of people seeking HIV services. There are efforts to educate KPs about their legal rights in terms of access to HIV services, but information and services mostly provided by CSOs. Government has a Legal Aid program through which any person in Namibia has the right to apply for legal aid in a civil or criminal case, however the director of legal aid has the discretion to grant or decline such an application based on a means test and the merits of the case.</p>
<p><b>2.10 Audit:</b> Does the host country government conduct a national HIV/AIDS program audit or audit of Ministries that work on HIV/AIDS on a regular basis (excluding audits of donor funding that are through government financial systems)?</p>	<p><input type="radio"/> A. No audit is conducted of the National HIV/AIDS Program or other relevant ministry.</p> <p><input type="radio"/> B. An audit is conducted of the National HIV/AIDS program or other relevant ministries every 4 years or more.</p> <p><input checked="" type="radio"/> C. An audit is conducted of the National HIV/AIDS program or other relevant ministries every 3 years or less.</p>	<p>2.10 Score: 0.91</p>	<p>NSF mid-term review.</p>	<p>A mid-term of the NSF is conducted every 3 years, and the Auditor General Audits the finances of the Ministry of Health every year.</p>
<p><b>2.11 Audit Action:</b> To what extent does the host country government respond to the findings of a HIV/AIDS audit or audit of Ministries that work on HIV/AIDS?</p>	<p><input type="radio"/> A. Host country government does not respond to audit findings, or no audit of the national HIV/AIDS program is conducted.</p> <p><input checked="" type="radio"/> B. The host country government does respond to audit findings by implementing changes as a result of the audit.</p> <p><input type="radio"/> C. The host country government does respond to audit findings by implementing changes which can be tracked by legislature or other bodies that hold government accountable.</p>	<p>2.11 Score: 0.45</p>	<p>NSF 2017-2022, Annual Progress Report.</p>	<p>The host country government, is generally keen to incorporate feedback through the Mid-term review of the NSF into its annual plans, and documents progress in addressing these findings in its annual progress report.</p>
<b>Policies and Governance Score:</b>		<b>7.71</b>		

			Data Source	Notes/Comments
<p><b>3. Civil Society Engagement:</b> Local civil society is an active partner in the HIV/AIDS response through service delivery provision when appropriate, advocacy efforts as needed, and as a key stakeholder to inform the national HIV/AIDS response. There are mechanisms for civil society to review and provide feedback regarding public programs, services and fiscal management and civil society is able to hold government institutions accountable for the use of HIV/AIDS funds and for the results of their actions.</p>				
<p><b>3.1 Civil Society and Accountability for HIV/AIDS:</b> Are there any laws or policies that restrict civil society from playing an oversight role in the HIV/AIDS response?</p>	<p><input type="radio"/> A. There exists a law or laws that restrict civil society from playing an oversight role in the HIV/AIDS response.</p> <p><input checked="" type="radio"/> B. There are no laws that restrict civil society playing a role in providing oversight of the HIV/AIDS response but in practice, it does not happen.</p> <p><input type="radio"/> C. There are no laws or policies that prevent civil society from providing an oversight of the HIV/AIDS response and civil society is very actively engaged in providing oversight.</p>	<p>3.1 Score: 0.83</p>	NSF 2017-22	Platforms exist (TWG,TAC, NAEC), involved in the formulation of national policies and strategies such as NSF. The coordination mechanisms are inconsistently convened. Civil Society is involved in the process of developing the NSF, and part of the coordination mechanisms, but civil society coordination to provide oversight
<p><b>3.2 Government Channels and Opportunities for Civil Society Engagement:</b> Does host country government have formal channels or opportunities for diverse civil society groups to engage and provide feedback on its HIV/AIDS policies, programs, and services (not including Global Fund CCM civil society engagement requirements)?</p>	<p>Check A, B, or C; if C checked, select appropriate disaggregates:</p> <p><input type="radio"/> A. There are no formal channels or opportunities.</p> <p><input type="radio"/> B. There are formal channels or opportunities, but civil society is called upon in an ad hoc manner to provide inputs and feedback.</p> <p><input checked="" type="radio"/> C. There are functional formal channels and opportunities for civil society engagement and feedback. Check all that apply:</p> <p><input checked="" type="checkbox"/> During strategic and annual planning</p> <p><input type="checkbox"/> In joint annual program reviews</p> <p><input checked="" type="checkbox"/> For policy development</p> <p><input checked="" type="checkbox"/> As members of technical working groups</p> <p><input type="checkbox"/> Involvement on government HIV/AIDS program evaluation teams</p> <p><input checked="" type="checkbox"/> Involvement in surveys/studies</p> <p><input type="checkbox"/> Collecting and reporting on client feedback</p> <p><input type="checkbox"/> Service delivery</p>	<p>3.2 Score: 0.83</p>	NSF 2017-2022.	The absence of social contracting as a mechanism to extend service delivery to community through civil society creates a vacuum for a channel for service delivery. C: Formal channels (NAEC, RACCOCS, etc. are not always functional). Civil society is not involved in the evaluation teams, but consultants often interview them. CSOs are involved in strategic planning, but not annual planning.

<p><b>3.3 Impact of Civil Society Engagement:</b> Does civil society engagement substantively impact policy, programming, and budget decisions related to HIV/AIDS?</p>	<p>A. Civil society does not actively engage, or civil society engagement does not impact policy, programming, and budget decisions related to HIV/AIDS.</p> <p><input type="radio"/></p> <p>B. Civil society's engagement impacts HIV/AIDS policy, programming, and budget decisions (check all that apply):</p> <p><input checked="" type="checkbox"/> In policy design</p> <p><input type="checkbox"/> In programmatic decision making</p> <p><input checked="" type="checkbox"/> In technical decision making</p> <p><input checked="" type="checkbox"/> In service delivery</p> <p><input type="checkbox"/> In HIV/AIDS basket or national health financing decisions</p>	<p>3.3 Score: 1.00</p>	<p>NSF 2017-22. NAEC, TAC, TWG.</p>	<p>Feedback and inputs do not appear to make it into all final policies and decisions, particularly on financing of a multisectoral response.</p>
<p><b>3.4 Domestic Funding of Civil Society:</b> To what extent are HIV/AIDS related Civil Society Organizations funded domestically (either from government, private sector, or self generated funds)?</p> <p>(if exact or approximate overall percentage known, or the percentages from the various domestic sources, please note in Comments column)</p>	<p>A. No funding (0%) for HIV/AIDS related civil society organizations comes from domestic sources.</p> <p><input type="radio"/></p> <p>B. Minimal funding (approx. 1-9%) for HIV/AIDS related civil society organizations comes from domestic sources (not including Global Fund grants through government Principal Recipients).</p> <p><input type="radio"/></p> <p>C. Some funding (approx. 10-49%) for HIV/AIDS related civil society organizations comes from domestic sources (not including Global Fund grants through government Principal Recipients).</p> <p><input checked="" type="radio"/></p> <p>D. Most funding (approx. 50-89%) for HIV/AIDS related civil society organizations comes from domestic sources (not including Global Fund grants through government Principal Recipients).</p> <p><input type="radio"/></p> <p>E. All or almost all funding (approx. 90%+) for HIV/AIDS related civil society organizations comes from domestic sources (not including Global Fund grants through government Principal Recipients).</p> <p><input type="radio"/></p>	<p>3.4 Score: 1.67</p>	<p>NASA/NHA 2016-2017.</p>	<p>Mostly funded from donors and private sector, with government providing commodities and other in-kind services (policy and technical guidelines as well as technical oversight). FBOs' HIV/AIDS related services mostly funded by government, but other NGO/CSOs have limited funding from government, but receive the majority of commodities used from government.</p>
<p><b>3.5 Civil Society Enabling Environment:</b> Are there laws, policies, or regulations in place which permit CSOs to be funded from a government budget for HIV services through open competition (from any Ministry or Department, at any level - national, regional, or local)?</p> <p>Note: This sometimes referred to as "social contracting" or "social procurement."</p>	<p>A. There is no law, policy, or regulation which permits CSOs to be funded from a government budget for HIV Services through open competition (not to include Global Fund or other donor funding to government that goes to CSOs).</p> <p><input type="radio"/></p> <p>B. There is a law, policy or regulation which permits CSOs to be funded from a government budget for HIV services. Check all that apply:</p> <p><input checked="" type="checkbox"/> Competition is open and transparent (notices of opportunities are made public)</p> <p><input type="checkbox"/> Opportunities for CSO funding are made on an annual basis</p> <p><input type="checkbox"/> Awards are made in a timely manner (within 6-12 months of announcements)</p> <p><input type="checkbox"/> Payments are made to CSOs on time for provision of services</p>	<p>3.5 Score: 0.83</p>	<p>Civil Society Partnership Policy (NPC). National Welfare Act 79 of 1965.</p>	<p>There is an ongoing engagement with MoHSS to adopt social contracting for HIV services, with a benchmarking trip to India being undertaken, and UNAIDS providing TA to further the process. There is a civil society partnership policy developed through the NPC, but does not explicitly make provision for government funding of civil society activities, other than through competitive procurement of services as is the case with private sector. There is no social contracting policy, but there are adhoc MoUs with certain CSOs to provide HIV services. National Welfare Act allows CSOs to be funded by</p>
<p><b>Civil Society Engagement Score:</b></p>		<p><b>5.17</b></p>		

4. Private Sector Engagement: Global as well as local private sector (both private health care providers and private business) is an active partner in the HIV/AIDS response through service delivery provision when appropriate, advocacy efforts as needed, innovation, and as a key stakeholder to inform the national HIV/AIDS response. There are supportive policies and mechanisms for the private sector to engage and to review and provide feedback regarding public programs, services and fiscal management of the national HIV/AIDS response. The public uses the private sector for HIV service delivery at a similar level as other health care needs.			Data Source	Notes/Comments
<p><b>4.1 Government Channels and Opportunities for Private Sector Engagement:</b> Does the host country government have formal channels and opportunities for diverse private sector entities (including service delivery, corporations, and private training institutions) to engage and provide feedback on its HIV/AIDS policies, programs, and services?</p> <p>(If option B is true, check all subsequent boxes that apply.)</p>	<p><input type="radio"/> A. There are no formal channels or opportunities for private sector engagement.</p> <p><input checked="" type="radio"/> B. There are formal channels or opportunities for private sector engagement.</p> <p>i. The following private sector stakeholders formally contribute input into national or sub-national processes for HIV/AIDS planning and strategic development (check all that apply):</p> <p><input type="checkbox"/> Corporations</p> <p><input type="checkbox"/> Employers</p> <p><input type="checkbox"/> Private training institutions</p> <p><input checked="" type="checkbox"/> Private health service delivery providers</p> <p>ii. Stakeholders contribute in the following ways (check all that apply):</p> <p><input checked="" type="checkbox"/> The private sector contributes technical expertise into HIV program planning</p> <p><input type="checkbox"/> Data and strategic input into supply chain management for HIV commodities</p> <p><input type="checkbox"/> Service delivery and/or client satisfaction data from private service delivery providers is included in health sector and HIV program planning</p> <p><input type="checkbox"/> Data on staffing in private health service delivery providers</p> <p><input checked="" type="checkbox"/> Data on private training institution's human resources for health (HRH) graduates and placements are included in health sector and HIV program planning</p> <p><input checked="" type="checkbox"/> For technical advisory on best practices and delivery solutions</p>	<p>4.1 Score: 0.90</p>	<p>NSF 2017-22</p>	<p>Private health providers participate in NAEC, TACs and TWGs, where they contribute technical know-how on service delivery and provide input on policies and guidelines. Private sector engagement in NAEC and regional coordination mechanism is in practice limited. Private training institutions (IUM, Welwitchia) provide information on graduates. The NSF doesn't have a specific section on Private Sector or Civil Society, but there is mention of the roles of private sector and CSOs (including collaboration on: condom distribution; innovative health insurance programs; Skills/HRH; coordination) throughout the document. The question gives limited options, CSO and private sector engagement is extensively addressed throughout the NSF, but not in specific section.</p>

	<p>iii. The national HIV/AIDS strategic plan explicitly addresses private sector's role in the HIV/AIDS response (check all that apply):</p> <p><input checked="" type="checkbox"/> The national HIV/AIDS strategic plan has a specific section that specifies the private sector's role in the HIV/AIDS response.</p> <p><input type="checkbox"/> A recent (within past 4 years) market analysis informs the private sector strategy that is included in the HIV/AIDS strategic plan</p> <p><input type="checkbox"/> The government and private sector effectively coordinates and executes a total market approach for HIV service delivery, which accounts for whether people are able and/or willing to pay for HIV services.</p>			
<p><b>4.2 Enabling Environment for Private Corporate Contributions to HIV/AIDS Programming:</b> Does the host country government have systems and policies in place that allow for private corporate contributions to HIV/AIDS programming?</p>	<p>Check all that apply:</p> <p><input type="checkbox"/> Tax policies and incentives are designed to encourage corporate social responsibility efforts from companies who are contributing financial commitments and/or non-financial resources (including, but not limited to, product donations, expertise, and employee staff time).</p> <p><input checked="" type="checkbox"/> The host country government has in-house expertise in contracting services to private sector corporations when appropriate and necessary (e.g., transportation and waste management).</p> <p><input type="checkbox"/> The host country government has standards for reporting and sharing data across public and private sectors.</p> <p><input type="checkbox"/> Regulations help ensure that workplace programs align with the national HIV/AIDS program (e.g., medical leave policies, on-site testing, on-site prevention and education, anti-discrimination policies).</p> <p><input type="checkbox"/> There are strong linkage and referral networks between on-site workplace programs and public health care facilities.</p>	<p>4.2 Score: 0.50</p>	<p>NSF 2017-2022. Public Private Partnership Act (Act 4 of 2017).</p>	<p>The host country government has specialist PPP units at the Ministry of Finance, as well as within the ministry of Health and Social Services. National PPP legislation was passed in 2017.</p>

<p><b>4.3 Enabling Environment for Private Health Service Delivery:</b> Does the host country government have systems and policies in place that allow for private health service delivery?</p> <p>Note: Full score possible without checking all boxes.</p>	<p><input type="radio"/> A. Private health service delivery providers are not legally allowed to deliver HIV/AIDS services.</p> <p><input type="radio"/> B. The host country government plans to allow private health service delivery providers to provide HIV/AIDS services in the next two years.</p> <p><input checked="" type="radio"/> C. Private health service delivery providers are legally allowed to deliver HIV/AIDS services. In addition (check all that apply):</p> <p><input type="checkbox"/> Policies are in place to ensure that private providers receive, understand, and adhere to national guidelines/protocols for ART, and appropriate quality standards and certifications.</p> <p><input checked="" type="checkbox"/> Systems are in place for service provision and/or research reporting by private facilities to the government, including guidelines for data reporting.</p> <p><input type="checkbox"/> Joint (i.e., public-private) supervision and quality oversight of private facilities.</p> <p><input type="checkbox"/> The government offers tax deductions for private facilities delivering HIV/AIDS services.</p> <p><input type="checkbox"/> The government offers tax deductions for private training institutions.</p> <p><input type="checkbox"/> The private sector is eligible to procure HIV/AIDS and/or ART commodities via public sector procurement channels and/or national medical stores</p> <p><input type="checkbox"/> The host country government has formal contracting or service-level agreement procedures to compensate private facilities for HIV/AIDS services.</p> <p><input type="checkbox"/> HIV/AIDS services received in private facilities are eligible for reimbursement through national health insurance schemes</p> <p><input checked="" type="checkbox"/> There are open competitions for private health care providers to compete for government service contracts</p> <p><input checked="" type="checkbox"/> There is a systematic and timely process for private company registration and/or testing of new health products (e.g., drugs, diagnostic kits, medical devices, etc.) that support HIV/AIDS programming</p> <p><input type="checkbox"/> The government effectively regulates the flow of subsidized commodities into the private sector.</p> <p><input type="checkbox"/> Private Banks or lenders provide access to low interest loans prioritizing private health sector small and medium-sized enterprise (SME) development and expansion.</p>	<p>4.3 Score: 1.67</p>	<p>Medicines and Related Substances Control Act, Act 13 of 2003.</p>	<p>There are no tax deductions for private training institutions, but students can get government scholarships/Loans. All research has to be approved by the MoHSS's ethics committee. There is a systematic process for private company registration and/or of new health products, but the process is not always timely.</p>
--	--	------------------------	--	--

<p><b>4.4 Private Sector Capability and Interest:</b> Does the private sector possess the capability to support HIV/AIDS services, and do private sector stakeholders demonstrate interest in supporting the national HIV/AIDS response?</p>	<p><input type="radio"/> A. The host country government does not leverage the skill sets of the private sector for the national HIV/AIDS response.</p> <p><input type="radio"/> B. The private sector does not express interest in or actively seek out opportunities to support the national HIV/AIDS response.</p> <p><input checked="" type="radio"/> C. The private sector has expertise and has expressed interest in or actively seeks out (check all that apply):</p> <p><input checked="" type="checkbox"/> Market opportunities that align with and support the national HIV/AIDS response</p> <p><input type="checkbox"/> Opportunities to contribute financial and/or non-financial resources to the national response (including business skills, market research, logistics, communication, research and development, product design, brand awareness, and innovation)</p>	<p>4.4 Score: 1.25</p>	<p>Public Private Partnership Act (Act 4 of 2017).</p>	<p>VMMC campaign supported by private health care providers. Private sector has also expressed interest in several touted PPP projects in the health sector.</p>
<p><b>Private Sector Engagement Score: 4.32</b></p>				

5. Public Access to Information: Host government widely disseminates timely and reliable information on the implementation of HIV/AIDS policies and programs, including goals, progress and challenges towards achieving HIV/AIDS targets, as well as fiscal information (public revenues, budgets, expenditures, large contract awards , etc.) related to HIV/AIDS. Program and audit reports are published publically. Efforts are made to ensure public has access to data through print distribution, websites, radio or other methods of disseminating information.			
		Source of Data	Notes/Comments
<p><b>5.1 Surveillance Data Transparency:</b> Does the host country government ensure that national HIV/AIDS surveillance data and analyses are made available to stakeholders and general public in a timely and useful way?</p>	<p><input type="radio"/> A. The host country government does not make HIV/AIDS surveillance data available to stakeholders and the general public, or they are made available more than one year after the date of collection.</p> <p><input checked="" type="radio"/> B. The host country government makes HIV/AIDS surveillance data available to stakeholders and the general public within 6-12 months.</p> <p><input type="radio"/> C. The host country government makes HIV/AIDS surveillance data available to stakeholders and the general public within six months.</p>	<p>5.1 Score: 1.00</p>	<p>STATISTICS ACT ( Act No. 9, 2011)</p> <p>E.g Minister of Health' speech on World AID Day usually includes some data. MoHSS conducts surveillance in collaboration with the NSA, which has improved transparency and access to data through NSA website and reports. MoHSS also has press conferences and dissemination campaigns of major reports and events.</p>
<p><b>5.2 Expenditure Transparency:</b> Does the host country government make annual HIV/AIDS expenditure data available to stakeholders and the public in a timely and useful way?</p>	<p><input type="radio"/> A. The host country government does not track HIV/AIDS expenditures.</p> <p><input checked="" type="radio"/> B. The host country government does not make HIV/AIDS expenditure data available to stakeholders and the general public, or they are made available more than one year after the date of expenditures.</p> <p><input type="radio"/> C. The host country government makes HIV/AIDS expenditure data available to stakeholders and the general public within 6-12 months after date of expenditures.</p> <p><input type="radio"/> D. The host country government makes HIV/AIDS expenditure data available to stakeholders and the general public within six months after expenditures.</p>	<p>5.2 Score: 0.00</p>	<p>Ministry of Finance, Accountability Reports 2017/18</p> <p>There are planned expenditure figures in the national budget documents e.g. the Estimates of Revenue, Income and Expenditure includes some data on HIV-related spending (fairly limited) under health, education, and gender votes. There are figures for actual expenditure on these budget lines in the past - for example the 2019/20 budget document includes actual expenditure for 2017/18. See - <a href="https://mof.gov.na/documents/134901/158590/%2312843+MoF+ESTIMATE+2019+-+20,.pdf/be9467a4-05bb-aa99-bd8e-ef02f1d1bf0a">https://mof.gov.na/documents/134901/158590/%2312843+MoF+ESTIMATE+2019+-+20,.pdf/be9467a4-05bb-aa99-bd8e-ef02f1d1bf0a</a></p>

<p><b>5.3 Performance and Service Delivery Transparency:</b> Does the host country government make annual HIV/AIDS program performance and service delivery data available to stakeholders and the public in a timely and useful way?</p>	<p>A. The host country government does not make HIV/AIDS program performance and service delivery data available to stakeholders and the general public or they are made available more than one year after the date of programming.</p> <p>B. The host country government makes HIV/AIDS program performance and service delivery data available to stakeholders and the general public within 6-12 months after date of programming.</p> <p>C. The host country government makes HIV/AIDS program performance and service delivery data available to stakeholders and the general public within six months after date of programming .</p> <p>At what level of detail is this performance data reported? [CHECK ALL THAT APPLY]</p> <p><input checked="" type="checkbox"/> National</p> <p><input type="checkbox"/> District</p> <p><input type="checkbox"/> Site-Level</p>	<p>5.3 Score: 1.56</p>	<p>Ministry of Finance, Accountability Reports 2017/18</p>	<p>For example, the MoHSS Health Accounts report released in 2017 only includes data from 2014-15 and before - see - <a href="https://www.afro.who.int/sites/default/files/2017-10/Namibia%20Health%20Accounts%20Report%202014-2015%20-%20final%202017.09.07.pdf">https://www.afro.who.int/sites/default/files/2017-10/Namibia%20Health%20Accounts%20Report%202014-2015%20-%20final%202017.09.07.pdf</a>. Accountability Reports submitted as part of the national budgeting process have reporting on program performance.</p>
<p><b>5.4 Procurement Transparency:</b> Does the host country government make government HIV/AIDS procurements public in a timely way?</p>	<p>A. The host country government does not make any HIV/AIDS procurements.</p> <p>B. The host country government makes HIV/AIDS procurements, but neither procurement tender nor award details are publicly available.</p> <p>C. The host country government makes HIV/AIDS procurements, and tender, but not award, details are publicly available.</p> <p>D. The host country government makes HIV/AIDS procurements, and both tender and award details available.</p>	<p>5.4 Score: 2.00</p>	<p>Public Procurement Act (Act 15 of 2015).</p>	<p>Transparency in the procurement sector has been haphazard since the new procurement law was introduced in 2017 (despite such expectations of transparency in the law). As a result information about tenders is often not publicised or only partially publicised. Major procurement awards are sometimes published on the website of the Central Procurement Board of Namibia.</p>

<p><b>5.5 Institutionalized Education System:</b> Is there a government agency that is explicitly responsible for providing scientifically accurate education to the public about HIV/AIDS?</p>	<p><input type="radio"/> A. There is no government institution that is responsible for this function and no other groups provide education.</p> <p><input type="radio"/> B. There is no government institution that is responsible for this function but at least one of the following provides education:</p> <p><input type="checkbox"/> Civil society</p> <p><input type="checkbox"/> Media</p> <p><input type="checkbox"/> Private sector</p> <p><input checked="" type="radio"/> C. There is a government institution that is responsible for, and is providing, scientifically accurate information on HIV/AIDS.</p>	<p>5.5 Score: 2.00</p>	<p>Social Media Policy, Government of Namibia, 2017. NSF 2017-2022.</p>	<p>There is no specific government institution providing education to public on HIV/AIDS, but the Directorate of Special Programs has some prevention programs providing educational information. The MICT is explicitly tasked with providing accurate education on HIV/AIDS, but can sometimes be deprioritized due to funding constraints.</p>
<p><b>Public Access to Information Score: 6.56</b></p>				

THIS CONCLUDES THE SET OF QUESTIONS ON DOMAIN A

## Domain B. National Health System and Service Delivery

**What Success Looks Like:** Host country institutions (inclusive of government, NGOs, civil society, and the private sector), the domestic workforce, and local health systems constitute the primary vehicles through which HIV/AIDS programs and services are managed and delivered. Optimally, national, sub-national and local governments have achieved high and appropriate coverage of a range of quality, life-saving prevention, treatment, and care services and interventions. There is a high demand for HIV/AIDS services, which are accessible and affordable to poor and vulnerable populations at risk of infection (i.e. key populations, discordant couples, exposed infants), are infected and/or are affected by the HIV/AIDS epidemic.

			<b>Data Source</b>	<b>Notes/Comments</b>
<p><b>6. Service Delivery:</b> The host country government at national, sub-national and facility levels facilitates planning and management of, access to and linkages between facility- and community-based HIV services.</p>				
<p><b>6.1 Responsiveness of facility-based services to demand for HIV services:</b> Do public facilities respond to and generate demand for HIV services to meet local needs? (Check all that apply.)</p>	<p><input type="checkbox"/> Public facilities are able to tailor services to accommodate demand (e.g., modify or add hours/days of operations; add/second additional staff during periods of high patient influx; customize scope of HIV services offered; adapt organization/model of service deliver to patient flow)</p> <p><input checked="" type="checkbox"/> Public facilities are able to situate services in proximity to high-HIV burden locations or populations (e.g., mobile clinics)</p> <p><input checked="" type="checkbox"/> There is evidence that public facilities in high burden areas and/or serving high-burden populations generate demand for HIV services</p>	<p>6.1 Score: 0.63</p>	<p>Namibia Health Facility Census 2009.</p>	<p>1. Current public health facilities are able to adapt new policies and make adjustments for smooth clinical workflow during periods of high demand. However, public facilities do not offer flexible hours or additional service days, and do not routinely offer additional staff during periods of high</p>
<p><b>6.2 Responsiveness of community-based HIV/AIDS services:</b> Has the host country standardized the design and implementation of community-based HIV services? (Check all that apply.)</p>	<p>The host country has standardized the following design and implementation components of community-based HIV/AIDS services through (check all that apply):</p> <p><input checked="" type="checkbox"/> Formalized mechanisms of participation by communities, high-burden populations and/or civil society engagement in delivery or oversight of services</p> <p><input checked="" type="checkbox"/> National guidelines detailing how to operationalize HIV/AIDS services in communities</p> <p><input checked="" type="checkbox"/> Providing official recognition to skilled human resources (e.g. community health workers) working and delivering HIV services in communities</p> <p><input checked="" type="checkbox"/> Providing financial support for community-based services</p> <p><input checked="" type="checkbox"/> Providing supply chain support for community-based services</p> <p><input checked="" type="checkbox"/> Supporting linkages between facility- and community-based services through formalized bidirectional referral services (e.g., use of national reporting systems to refer and monitor referrals for completeness)</p>	<p>6.2 Score: 0.95</p>	<p>National Coordination Framework</p>	<p>4. Host government does provide salary support for community health extension workers, however, it is insufficient. There is no mechanism to competitively engage, fund and programmatically sustain civil society organizations. 5. Continuous supply chain interruptions limit success of community based outreach programs. government mostly provides commodities for communities based services, but limited to no financial support for operations.</p>
<p><b>6.3 Domestic Financing of Service Delivery:</b> To what extent do host country institutions (public, private, or voluntary sector) finance the delivery of HIV/AIDS services (i.e. excluding any external financial assistance from donors)?</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<p><input type="radio"/> A. Host country institutions provide no (0%) financing for delivery of HIV/AIDS services</p> <p><input type="radio"/> B. Host country institutions provide minimal (approx. 1-9%) financing for delivery of HIV/AIDS services</p> <p><input type="radio"/> C. Host country institutions provide some (approx. 10-49%) financing for delivery of HIV/AIDS services</p> <p><input checked="" type="radio"/> D. Host country institutions provide most (approx. 50-89%) financing for delivery of HIV/AIDS services</p> <p><input type="radio"/> E. Host country institutions provide all or almost all (approx. 90%+) financing for delivery of HIV/AIDS services</p>	<p>6.3 Score: 1.25</p>	<p>NASA 2016/2017</p>	<p>64% domestic funding, however, due to economic crisis occurring in country, current levels may not be maintained, particular in HRH and supply chain</p>

<p><b>6.4 Domestic Provision of Service Delivery:</b> To what extent do host country institutions (public, private, or voluntary sector) deliver HIV/AIDS services without external technical assistance from donors?</p>	<p><input type="radio"/> A. HIV/AIDS services are primarily delivered by external agencies, organizations, or institutions.</p> <p><input type="radio"/> B. Host country institutions deliver HIV/AIDS services but with substantial external technical assistance.</p> <p><input checked="" type="radio"/> C. Host country institutions deliver HIV/AIDS services with some external technical assistance.</p> <p><input type="radio"/> D. <p><b>Service Delivery Score</b></p>		<p><b>6.37</b></p>		

7. Health Workforce			
7. Health Workforce: Health workforce staffing decisions for those working on HIV/AIDS are based on use of workforce data and are aligned with national plans. Host country has sufficient numbers and categories of competent health care workers and volunteers to provide quality HIV/AIDS prevention, care and treatment services in health facilities and in the community. Host country trains, deploys and compensates health workers providing HIV/AIDS services through local public and/or private resources and systems. Host country has a strategy or plan for transitioning staff funded by donors.		Data Source	Notes/Comments
7.1 Health Workforce Supply: To what extent is the clinical health worker supply adequate to enable the volume and quality of HIV/AIDS services needed for sustained epidemic control at the facility and/or community site level?	Check all that apply: <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> The country's pre-service education institutions are producing an adequate supply and skills mix of clinical health care providers</li> <li><input type="checkbox"/> The country's clinical health workers are adequately deployed to, or distributed within, facilities and communities with high HIV burden</li> <li><input type="checkbox"/> The country has developed retention schemes that address clinical health worker vacancy or attrition in high HIV burden areas</li> <li><input type="checkbox"/> The country's pre-service education institutions are producing an adequate supply and appropriate skills mix of social service workers to deliver social services to vulnerable children</li> </ul>	7.1 Score: 0.48	Workload Indicators of Staffing Need (WISN), Namibia.  1. Some clinical healthcare providers are produced in country. However, a portion of those move to private sector as opposed to public health sector and many prefer urban settings. 4. There is a social work program through UNAM, that is generating educated social workers, however there remains a limited amount employed in public sector to provide adequate coverage and accessibility. Additionally, there is a limited amount of data on qualified, trained and available social services.
7.2 Role of Community-based Health Workers (CHWs): To what extent are community-based health workers' roles and responsibilities specified for HIV/AIDS service delivery?	Check all that apply: <ul style="list-style-type: none"> <li><input type="checkbox"/> There is a national community-based health worker (CHW) cadre that has a defined role in HIV/AIDS service delivery (e.g., through a national strategy or task-sharing framework/guidelines).</li> <li><input checked="" type="checkbox"/> Data are made available on the staffing and deployment of CHWs, including non-formalized CHWs supported by donors.</li> <li><input checked="" type="checkbox"/> The host country government officially recognizes non-formalized CHWs delivering HIV/AIDS services.</li> </ul>	7.2 Score: 0.95	NSF 2017-2022.  The NSF highlights the role of Community Health workers as critical in linking community to ART services, and in offering comprehensive prevention services.
7.3 Health Workforce Transition: What is the status of transitioning PEPFAR and/or other donor supported HIV/AIDS health worker salaries to local financing/compensation?  Note in comments column which donors have transition plans in place and timeline for transition.	<ul style="list-style-type: none"> <li><input type="radio"/> A. There is no inventory or plan for transition of donor-supported health workers</li> <li><input checked="" type="radio"/> B. There is an inventory of donor-supported health workers, but no official plan to transition these staff to local support</li> <li><input type="radio"/> C. There is an inventory and plan for transition of donor-supported workers, but it has not yet been implemented</li> <li><input type="radio"/> D. There is an inventory and plan for donor-supported workers to be transitioned, and staff are being transitioned according to this plan</li> <li><input type="radio"/> E. No plan is necessary because all HIV/AIDS health worker salaries are already locally financed/compensated</li> </ul>	7.3 Score: 0.24	Namibia HIV and AIDS Investment Case, UNAIDS (2016). Namibia - Global Fund Grant Agreement (2018-2020).  There is no transition plan in place yet, but PEPFAR routinely transitions responsibility for districts that have reached sustained status to government responsibility, PEPFAR will develop an HRH transition plan that will cover COP20-COP22. Global fund has already signaled a reduction in funding for the next funding round (2021-2023) of at least 25%, including a significant reduction in HRH supported.

<p><b>7.4 Domestic Funding for Health Workforce:</b> What proportion of health worker (doctors, nurses, midwives, and CHW) salaries are supported with domestic public or private resources (i.e. excluding donor resources)?</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<p><input type="radio"/> A. Host country institutions provide no (0%) health worker salaries</p> <p><input type="radio"/> B. Host country institutions provide minimal (approx. 1-9%) health worker salaries</p> <p><input type="radio"/> C. Host country institutions provide some (approx. 10-49%) health worker salaries</p> <p><input checked="" type="radio"/> D. Host country institutions provide most (approx. 50-89%) health worker salaries</p> <p><input type="radio"/> E. Host country institutions provide all or almost all (approx. 90%+) health worker salaries</p>	<p>7.4 Score: 2.50</p>	<p>NHA/NASA 2016-17.</p>	
<p><b>7.5 Pre-service Training:</b> Do current pre-service education curricula for any health workers providing HIV/AIDS services include HIV content that has been updated in last three years?</p> <p>Note: List applicable cadres in the comments column.</p>	<p><input checked="" type="radio"/> A. Pre-service education institutions do not have HIV content, or HIV content used by pre-service education institutions is out of date (not updated within 3 years)</p> <p><input type="radio"/> B. Pre-service institutions have updated HIV/AIDS content within the last three years (check all that apply):</p> <p><input type="checkbox"/> Updated content reflects national standards of practice for cadres offering HIV/AIDS-related services</p> <p><input type="checkbox"/> Institutions maintain process for continuously updating content, including HIV/AIDS content</p> <p><input type="checkbox"/> Updated curricula contain training related to stigma &amp; discrimination of PLHIV</p> <p><input type="checkbox"/> Institutions track student employment after graduation to inform planning</p>	<p>7.5 Score: 0.00</p>	<p>Prospectus 2018, School of Medicine, Faculty of Health Sciences, University of Namibia. Prospectus 2018, School of Nursing, Faculty of Health Sciences, University of Namibia. Prospectus, International University of Management.</p>	<p>All Nursing programs in Namibia (IUM, UNAM, and NHTC) cover HIV/AIDS extensively, and some even have specialist HIV/AIDS Management degrees, but their curriculums are often not up to date with the latest development in HIV/AIDS programming.</p>
<p><b>7.6 In-service Training:</b> To what extent does the host country government (through public, private, and/or voluntary sectors) plan and implement HIV/AIDS in-service training necessary to equip health workers for sustained epidemic control?</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<p>Check all that apply among A, B, C, D:</p> <p><input checked="" type="checkbox"/> A. The host country government provides the following support for in-service training in the country (check ONE):</p> <p><input type="checkbox"/> Host country government implements no (0%) HIV/AIDS related in-service training</p> <p><input type="checkbox"/> Host country government implements minimal (approx. 1-9%) HIV/AIDS related in-service training</p> <p><input type="checkbox"/> Host country government implements some (approx. 10-49%) HIV/AIDS in-service training</p> <p><input checked="" type="checkbox"/> Host country government implements most (approx. 50-89%) HIV/AIDS in-service training</p> <p><input type="checkbox"/> Host country government implements all or almost all (approx. 90%+) HIV/AIDS in-service training</p> <p><input type="checkbox"/> B. The host country government has a national plan for institutionalizing (establishing capacity within local institutions to deliver) donor-supported in-service training in HIV/AIDS</p> <p><input checked="" type="checkbox"/> C. The host country government requires continuing professional development, a form of in-service training, for re-licensure for key clinicians</p> <p><input checked="" type="checkbox"/> D. The host country government maintains a database to track training for HIV/AIDS, and allocates training based on need (e.g. focusing on high burden areas)</p>	<p>7.6 Score: 0.65</p>	<p>HEALTH PROFESSIONS COUNCILS OF NAMIBIA, CONTINUING PROFESSIONAL DEVELOPMENT DIRECTIVES FOR THE HEALTH PROFESSIONS.</p>	<p>A. Planning is driven by host government, but a substantial level of funding is provided by donors. D. There is a database, however it is not widely used and there is a limited understanding of the database system (TrainSmart).</p>

<p><b>7.7 Health Workforce Data Collection and Use:</b> Does the country systematically collect and use health workforce data, such as through a Human Resource Information Systems (HRIS), for HIV/AIDS services and/or health workforce planning and management?</p>	<p><input type="radio"/> A. There is no HRIS in country and data on the health workforce is not collected systematically for planning and management</p> <p><input checked="" type="radio"/> B. There is no HRIS in country, but some data is collected for planning and management</p> <p><input checked="" type="checkbox"/> Registration and re-licensure data for key professionals is collected and used for planning and management</p> <p><input checked="" type="checkbox"/> MOH health worker employee data (number, cadre, and location of employment) is collected and used</p> <p><input type="checkbox"/> Routine assessments are conducted regarding health worker staffing at health facility and/or community sites</p> <p><input type="radio"/> C. There is an HRIS (an interoperable system that captures at least regulatory and deployment data on health workers) in country:</p> <p><input type="checkbox"/> The HRIS is primarily financed and managed by host country institutions</p> <p><input type="checkbox"/> There is a national strategy or approach to interoperability for HRIS</p> <p><input type="checkbox"/> The government produces HR data from the system at least annually</p> <p><input type="checkbox"/> Host country institutions use HR data from the system for planning and management (e.g. health worker deployment)</p>	<p>7.7 Score: 0.40</p>	<p><b>Namibia 2014/2015 Health Accounts Report. HPCNA.</b></p>	<p>Health Professions Councils of Namibia keeps information on registration of health professionals. Namibia had developed a national level HRIS that was being managed through the Office of the Prime minister, which is in charge of the Public Service, but this system has since gone out of service.</p>
<p><b>7.8 Management and Monitoring of Health Workforce</b> Does an administrative entity, such as a national office or Bureau/s, exist with specific authority to manage - plan, monitor, and provide guidance - for health workforce activities in HIV service delivery sites, including training, supervision, deployments, quality assurance, and others across all sectors. <u>Select only ONE answer.</u></p>	<p><input type="radio"/> A. No, there is no entity.</p> <p><input type="radio"/> B. Yes, there is an entity, but it has limited authority, insufficient staff, and insufficient budget</p> <p><input checked="" type="radio"/> C. Yes, there is an entity with authority and sufficient staff, but not a sufficient budget.</p> <p><input type="radio"/> D. Yes, there is an entity with authority and sufficient staff and budget.</p>	<p>7.8 Score: 0.63</p>	<p>NSF 2017-2022. National Policy on HIV and AIDS, Revised 2015.</p>	<p>B. Government has a special programs directorate but there is limited control over staff deployment. There are not specific job descriptions for some functions in HIV service delivery. DSP has sufficient authority and staffing, but a significant part of the programming and staffing is funded by donors.</p>
<p><b>Health Workforce Score:</b></p>		<p><b>5.85</b></p>		

8. Commodity Security and Supply Chain: The National HIV/AIDS response ensures a secure, reliable and adequate supply and distribution of quality products, including drugs, lab and medical supplies, health items, and equipment required for effective and efficient HIV/AIDS prevention, diagnosis and treatment. Host country efficiently manages product selection, forecasting and supply planning, procurement, warehousing and inventory management, transportation, dispensing and waste management reducing costs while maintaining quality.			
		Data Source	Notes/Comments
<p><b>8.1 ARV Domestic Financing:</b> What is the estimated percentage of ARV procurement funded by domestic sources? (Domestic sources includes public sector and private sector but excludes donor and out-of-pocket funds)</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<p><input type="radio"/> A. CMS, however, lacks sufficient staff (and has no approved organogram) and budget.</p>
<p><b>Commodity Security and Supply Chain Score:</b></p>		<p><b>7.14</b></p>		

9. Quality Management: Host country has institutionalized quality management systems, plans, workforce capacities and other key inputs to ensure that modern quality improvement methodologies are applied to managing and providing HIV/AIDS services			
		Data Source	Notes/Comments
<p><b>9.1 Existence of a Quality Management (QM) System:</b> Does the host country government support appropriate QM structures to support continuous quality improvement (QI) at national, sub-national and site levels?</p>	<p><input type="radio"/> A. The host country government does not have structures or resources to support site-level continuous quality improvement</p> <p><input checked="" type="radio"/> B. The host country government:</p> <p style="padding-left: 20px;">Has structures with dedicated focal points or leaders (e.g., committee, focal person, working groups, teams) at the national level, sub-national level and in a majority of sites where HIV/AIDS care and services are offered that are supporting site-level continuous quality improvement</p> <p><input type="checkbox"/> Has a budget line item for the QM program</p> <p style="padding-left: 20px;">Supports a knowledge management platform (e.g., web site) and/or peer learning opportunities available to site QI participants to gain insights from other sites and interventions</p>	<p>9.1 Score: 1.33</p>	<p>NSF 2017-2022.</p> <p>B-2: The MOH has an established quality management division, however the bulk of the budget for QM activities is through donors. The GRN approved a structure for a directorate of quality management with national and subnational positions. However, due to budget limitations, all positions remain unfilled. The ministry uses videoconferencing technologies to conduct QM/QI session with clinicians and other health care providers at the sub-national level.</p>
<p><b>9.2 Quality Management/Quality Improvement (QM/QI) Plan:</b> Is there a current (updated within the last 2 years) QM/QI plan? (The plan may be HIV program-specific or include HIV program-specific elements in a national health sector QM/QI plan.)</p>	<p><input type="radio"/> A. There is no HIV/AIDS-related QM/QI strategy</p> <p><input type="radio"/> B. There is a QM/QI strategy that includes HIV/AIDS, but it is not utilized</p> <p><input checked="" type="radio"/> C. There is a current QM/QI strategy that includes HIV/AIDS program specific elements, and it is partially utilized.</p> <p><input type="radio"/> D. There is a current HIV/AIDS program specific QM/QI strategy, and it is fully utilized.</p>	<p>9.2 Score: 1.33</p>	<p>NSF 2017-2022.</p> <p>QM/QI activities are occurring and being implemented, specifically for HIV testing care and treatment programs only. However, there is a annual QM/QI plan but no comprehensive strategy covering all HIV/AIDS programs.</p>
<p><b>9.3 Performance Data Collection and Use for Improvement:</b> Are HIV program performance measurement data systematically collected and analyzed to identify areas of patient care and services that can be improved through national decision making, policy, or priority setting?</p>	<p><input type="radio"/> A. HIV program performance measurement data are not used to identify areas of patient care and services that can be improved through national decision making, policy, or priority setting.</p> <p><input checked="" type="radio"/> B. HIV program performance measurement data are used to identify areas of patient care and services that can be improved through national decision making, policy, or priority setting (check all that apply):</p> <p style="padding-left: 20px;"><input checked="" type="checkbox"/> The national quality structure has a clinical data collection system from which local performance measurement data on prioritized measures are being collected, aggregated nationally, and analyzed for local and national improvement</p> <p style="padding-left: 20px;"><input checked="" type="checkbox"/> There is a system for sharing data at the national, SNU, and local level, with evidence that data is used to identify quality gaps and initiate QI activities</p> <p style="padding-left: 20px;"><input checked="" type="checkbox"/> There is documentation of results of QI activities and demonstration of national HIV program improvement through sharing and implementation of best practices across HIV/AIDS sites at all levels</p>	<p>9.3 Score: 2.00</p>	<p>DHIS2 and ePMS.</p>

<p><b>9.4 Health worker capacity for QM/QI:</b> Does the host country government ensure that the health workforce has capacities to apply modern quality improvement methods to HIV/AIDS care and services?</p>	<p><input type="radio"/> A. There is no training or recognition offered to build health workforce competency in QI.</p> <p><input checked="" type="radio"/> B. There is health workforce competency-building in QI, including:</p> <p><input type="checkbox"/> Pre-service institutions incorporate modern quality improvement methods in curricula</p> <p><input checked="" type="checkbox"/> National in-service training (IST) curricula integrate quality improvement training for members of the health workforce (including managers) who provide or support HIV/AIDS services</p>	<p>9.4 Score: 1.00</p>	<p>NSF 2017-2022.</p>	<p>B-2. Selected staff from sites participating in the QI program are included in the training. It is not universally rolled out to all health care workers. This training needs to be expanded to all sites.</p>
<p><b>9.5 Existence of QI Implementation:</b> Does the host country government QM system use proven systematic approaches for QI?</p>	<p>The national-level QM structure:</p> <p><input checked="" type="checkbox"/> Provides oversight to ensure continuous quality improvement in HIV/AIDS care and services</p> <p><input type="checkbox"/> Regularly convenes meetings that include health services consumers</p> <p><input checked="" type="checkbox"/> Routinely reviews national, sub-national and clinical outcome data to identify and prioritize areas for improvement</p> <p>Sub-national QM structures:</p> <p><input type="checkbox"/> Provide coordination and support to ensure continuous quality improvement in HIV/AIDS care and services</p> <p><input checked="" type="checkbox"/> Regularly convene meetings that includes health services consumers</p> <p><input checked="" type="checkbox"/> Routinely review national, sub-national and clinical outcome data to identify and prioritize areas for improvement</p> <p>Site-level QM structures:</p> <p><input checked="" type="checkbox"/> Undertake continuous quality improvement in HIV/AIDS care and services to identify and prioritize areas for improvement</p>	<p>9.5 Score: 1.43</p>	<p>NSF 2017-2022.</p>	<p>National-level QM: Most QM/QI meetings are care and treatment focused, there is room to expand to other HIV services such as prevention.</p>
<p><b>Quality Management Score:</b></p>		<p><b>7.10</b></p>		

10. Laboratory: The host country ensures adequate funds, policies, and regulations to ensure laboratory capacity (workforce, equipment, reagents, quality) matches the services required for PLHIV.			
		Data Source	Notes/Comments
<p><b>10.1 Strategic Plan:</b> Does the host country have a national laboratory strategic plan?</p>	<p><input type="radio"/> A. There is no national laboratory strategic plan</p> <p><input type="radio"/> B. National laboratory strategic plan is under development</p> <p><input type="radio"/> C. National laboratory strategic plan has been developed, but not approved</p> <p><input type="radio"/> D. National laboratory strategic plan has been developed and approved</p> <p><input type="radio"/> E. National laboratory plan has been developed, approved, and costed</p> <p><input type="radio"/> F. National laboratory strategic plan has been developed, approved, costed, and implemented</p>	<p>10.1 Score: 0.00</p>	<p>National Public Health Laboratory policy (2012).</p> <p>The 2012 Strategic Plan was never implemented because of monetary resource limitations and an updated plan is currently in development.</p>
<p><b>10.2 Management and Monitoring of Laboratory Services:</b> Does an administrative entity, such as a national office or Bureau/s, exist with specific authority to manage - plan, monitor, purchase, and provide guidance - laboratory services at the regional and district level across all sectors? <u>Select only ONE answer.</u></p>	<p><input type="radio"/> A. No, there is no entity.</p> <p><input checked="" type="radio"/> B. Yes, there is an entity, but it has limited authority, insufficient staff, and insufficient budget</p> <p><input type="radio"/> C. Yes, there is an entity with authority and sufficient staff, but not a sufficient budget.</p> <p><input type="radio"/> D. Yes, there is an entity with authority and sufficient staff and budget.</p>	<p>10.2 Score: 0.44</p>	<p>National Public Health Laboratory policy (2012). Namibia Institute of Pathology Act (Act No. 15 of 1999).</p> <p>MoHSS laboratory division lacks a director, and as such, there is not currently an administrative entity within the MoHSS due to continued budget constraints. However, NIP functions somewhat autonomously and therefore has its own admin structure regionally that functions well but with limited authority beyond their own structure.</p>
<p><b>10.3 Regulations to Monitor Quality of Laboratories and Point of Care Testing (POCT) Sites:</b> To what extent does the host country have regulations in place to monitor the quality of its laboratories and POCT sites?</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<p><input type="radio"/> A. Regulations do not exist to monitor minimum quality of laboratories in the country.</p> <p><input type="radio"/> B. Regulations exist, but are not implemented (0% of laboratories and POCT sites regulated).</p> <p><input type="radio"/> C. Regulations exist, but are minimally implemented (approx. 1-9% of laboratories and POCT sites regulated).</p> <p><input type="radio"/> D. Regulations exist, but are partially implemented (approx. 10-49% of laboratories and POCT sites regulated).</p> <p><input checked="" type="radio"/> E. Regulations exist and are mostly implemented (approx. 50-89% of laboratories and POCT sites regulated).</p> <p><input type="radio"/> F. Regulations exist and are fully or almost fully implemented (approx. 90%+ of laboratories and POCT sites regulated).</p>	<p>10.3 Score: 1.00</p>	<p>National Public Health Laboratory policy (2012). Namibia Institute of Pathology Act (Act No. 15 of 1999).</p> <p>A POC guideline was in the works but was not finalized or approved due to budget cutbacks at MoHSS Laboratory section. No national program exists at the MoHSS level beyond HIV rapid testing. However, NIP laboratories have a quality monitoring system in place with most laboratories adhering and passing. Also of note, the MoHSS are currently adding near POCT for VL and EID without regulations for monitoring quality in place.</p>
<p><b>10.4 Capacity of Laboratory Workforce:</b> Does the host country have an adequate number of qualified laboratory personnel (human resources [HR]) in the public sector, to sustain key functions to meet the needs of PLHIV for diagnosis, monitoring treatment and viral load suppression?</p>	<p><input type="radio"/> A. There are not adequate qualified laboratory personnel to achieve sustained epidemic control</p> <p><input checked="" type="radio"/> B. There are adequate qualified laboratory personnel to perform the following key functions:</p> <p><input checked="" type="checkbox"/> HIV diagnosis by rapid testing and point-of-care testing</p> <p><input checked="" type="checkbox"/> Routine laboratory testing, including chemistry, hematology, microbiology, serology, blood banking, and malaria</p> <p><input type="checkbox"/> Complex laboratory testing, including HIV viral load, CD4 testing, and molecular assays</p> <p><input checked="" type="checkbox"/> TB diagnosis</p>	<p>10.4 Score: 1.00</p>	<p>WISN, Namibia.</p> <p>HIV Rapid testing is not done at the lab at NIP. This is done at facility level by the MOHSS. NIP has the qualified people but is currently understaffed. Due to financial constraints replacements and new hires are on hold leaving gaps in key areas.</p>

<p><b>10.5 Viral Load Infrastructure:</b> Does the host country have sufficient infrastructure to test for viral load to reach sustained epidemic control?</p>	<p><input type="radio"/> A. There is not sufficient infrastructure to test for viral load.</p> <p><input checked="" type="radio"/> B. There is sufficient infrastructure to test for viral load, including:</p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> Sufficient HIV viral load instruments</li> <li><input checked="" type="checkbox"/> All HIV viral load laboratories have an instrument maintenance program</li> <li><input checked="" type="checkbox"/> Sufficient supply chain system is in place to prevent stock out</li> <li><input type="checkbox"/> Adequate specimen transport system and timely return of results</li> </ul>	<p>10.5 Score: 1.00</p>	<p>NIP Annual Report, 2016/2017.</p>	<p>Instrument maintenance programs are sometimes affected by financial constraints leading to significant delays in repair. NIP supply chain is in place and functional, but unfortunately, budget issues are causing extensive stock outs due to NIP's inability to pay it's vendors.</p>
<p><b>10.6 Domestic Funds for Laboratories:</b> To what extent are laboratory services financed by domestic public or private resources (i.e. excluding external donor funding)?</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<p><input type="radio"/> A. No (0%) laboratory services are financed by domestic resources.</p> <p><input type="radio"/> B. Minimal (approx. 1-9%) laboratory services are financed by domestic resources.</p> <p><input type="radio"/> C. Some (approx. 10-49%) laboratory services are financed by domestic resources.</p> <p><input type="radio"/> D. Most (approx. 50-89%) laboratory services are financed by domestic resources.</p> <p><input checked="" type="radio"/> E. All or almost all (approx. 90%+) laboratory services are financed by domestic resources.</p>	<p>10.6 Score: 3.33</p>	<p>NHA/NASA 2016-17.</p>	
<b>Laboratory Score:</b>		<b>6.78</b>		

THIS CONCLUDES THE SET OF QUESTIONS ON DOMAIN B

## Domain C. Strategic Financing and Market Openness

**What Success Looks Like:** Host country government is aware of the financial resources required to effectively and efficiently meet its national HIV/AIDS prevention, care and treatment targets. HCG actively seeks, solicits and or generates the necessary financial resources, ensures sufficient resource commitments, and uses data to strategically allocate funding and maximize investments. Finally, having and effectively implementing policies that ensure leveraging markets (both nonprofit and for profit) where appropriate and enabling their participation and competition will be critical for a sustained HIV response.

<b>Fiscal Context for Health and HIV/AIDS</b>		<b>Data Source</b>	<b>Notes/Comments</b>
This section will not be assigned a score, but will provide additional contextual information to complement the questions in Domain C.			
1. What percentage of general government expenditures goes to health?	14%	NHA/NASA through 2016-17	Validated through Resource Mobilization & Development Coordination Unit, DSP, MoHSS
2. What is the per capita health expenditure all sources?	\$431.24	NHA/NASA through 2016-17	
3. What is the total health care expenditure all sources as a percent of GDP?	10%	NHA/NASA through 2016-17	
4. What percent of total health expenditures is financed by external resources?	7%	NHA/NASA through 2016-17	
5. What percent of total health expenditures is financed by out of pocket spending net of household contributions to medical schemes/pre-payment schemes?	7%	NHA/NASA through 2016-17	

<p><b>11. Domestic Resource Mobilization:</b> The partner country budgets for its HIV/AIDS response and makes adequate resource commitments and expenditures to achieve national HIV/AIDS goals for epidemic control in line with its financial ability.</p>	<p><b>Data Source</b></p>	<p><b>Notes/Comments</b></p>
<p>11.1 Long-term Financing Strategy for HIV/AIDS: Has the host country government developed a long-term financing strategy for HIV/AIDS?</p> <p>Check all that apply:</p> <p><input checked="" type="checkbox"/> A. Yes, there is a universal, comprehensive financing scheme that integrates social health insurance, public subsidies, and national budget provisions for public health aspects (e.g., disease surveillance). It includes the following (check all that apply):</p> <p style="text-align: right;">11.1 Score: 0.83</p> <p><input checked="" type="checkbox"/> ARVs are covered</p> <p><input checked="" type="checkbox"/> Non-ARV care and treatment is covered</p> <p><input checked="" type="checkbox"/> Prevention services are covered</p> <p><input checked="" type="checkbox"/> B. Yes, there is an affordable health insurance scheme available (check one of the following).</p> <p><input checked="" type="checkbox"/> It covers 25% or less of the population.</p> <p><input type="checkbox"/> It covers 26 to 50% of the population.</p> <p><input type="checkbox"/> It covers 51 to 75% of the population.</p> <p><input type="checkbox"/> It covers more than 75% of the population.</p> <p><input checked="" type="checkbox"/> C. The affordable health insurance scheme in (B.) includes the following (check all that apply):</p> <p><input checked="" type="checkbox"/> ARVs are covered.</p> <p><input checked="" type="checkbox"/> Non-ARV care and treatment services are covered.</p> <p><input checked="" type="checkbox"/> Prevention services are covered (specify in comments).</p> <p><input checked="" type="checkbox"/> It includes public subsidies for the affordability of care.</p>	<p><b>RT &amp; benefit schemes</b></p>	<p><b>A. Social health insurance part of an ongoing discussion under UHC.</b></p> <p><b>Covered within scheme, but not 100% financed by GRN</b></p> <p><b>B. GRN scheme (PSEMAS) covers &lt;25%</b></p>

<p><b>11.2 Domestic Budget:</b> To what extent does the national budget explicitly account for the national HIV/AIDS response?</p>	<p><input type="radio"/> A. There is no explicit funding for HIV/AIDS in the national budget.</p> <p><input checked="" type="radio"/> B. There is explicit HIV/AIDS funding within the national budget.</p> <p><input type="checkbox"/> The HIV/AIDS budget is program-based across ministries</p> <p><input checked="" type="checkbox"/> The budget includes or references indicators of progress toward national HIV/AIDS strategy goals</p> <p><input checked="" type="checkbox"/> The budget includes specific HIV/AIDS service delivery targets</p> <p><input type="checkbox"/> National budget reflects all sources of funding for HIV, including from external donors</p>	<p>11.2 Score: 0.71</p>	<p>National Budgets 2017/2018, 2018/2019. Medium Term Expenditure framework 2016/2017-2019/2020.</p>	<p>There are references to HIV in the detailed budget allocation statement for the MOHSS, and reference to targets to be achieved in the NSF for HIV/AIDS response. There is a HIV/AIDS workplace program explicitly stated in the national budget for every ministry, but there is no explicit program based budgeting for HIV/AIDS for most ministries.</p>
<p><b>11.3 Annual Goals/Targets:</b> To what extent does the national budget contain HIV/AIDS goals/targets?</p>	<p><input type="radio"/> A. There are no HIV/AIDS goals/targets articulated in the national budget</p> <p><input checked="" type="radio"/> B. There are HIV/AIDS goals/targets articulated in the national budget.</p> <p><input checked="" type="checkbox"/> The goals/targets are measurable.</p> <p><input type="checkbox"/> Budget items/programs are linked to goals/targets.</p> <p><input type="checkbox"/> The goals/targets are routinely monitored during budget execution.</p> <p><input type="checkbox"/> The goals/targets are routinely monitored during the development of the budget.</p>	<p>11.3 Score: 0.60</p>	<p>National Budgets 2017/2018, 2018/2019. Medium Term Expenditure framework 2016/2017-2019/2020.</p>	<p>Budget not delineated to where specific line items could be applied to targets. The budget states some HIV/AIDS goals, but no targets. The Accountability Report usually submitted with the budget has performance reporting, including on HIV/AIDS programs.</p>
<p><b>11.4 HIV/AIDS Budget Execution:</b> For the previous three years, what was the average execution rate for budgeted domestic HIV/AIDS resources (i.e. excluding any donor funds) at both the national and subnational level?</p> <p>(If subnational data does not exist or is not available, answer the question for the national level. Note level covered in the comments column)</p>	<p><input type="radio"/> A. There is no HIV/AIDS budget, or information is not available.</p> <p><input type="radio"/> B. 0-49% of budget executed</p> <p><input type="radio"/> C. 50-69% of budget executed</p> <p><input type="radio"/> D. 70-89% of budget executed</p> <p><input checked="" type="radio"/> E. 90% or greater of budget executed</p>	<p>11.4 Score: 0.95</p>	<p>Financial Distribution Certificate Report</p>	

<p><b>11.5 Donor Spending:</b> Does the Ministry of Health or Ministry of Finance routinely, and at least on an annual basis, collect all donor spending in the health sector or for HIV/AIDS-specific services?</p>	<p><input type="radio"/> A. Neither the Ministry of Health nor the Ministry of Finance routinely collects all donor spending in the health sector or for HIV/AIDS-specific services.</p> <p><input type="radio"/> B. The Ministry of Health or Ministry of Finance routinely collects all donor spending for only HIV/AIDS-specific services.</p> <p><input checked="" type="radio"/> C. The Ministry of Health or Ministry of Finance routinely collects all donor spending all the entire health sector, including HIV/AIDS-specific services.</p>	<p>11.5 Score: 0.95</p>	<p>Resource tracking 2015/16 &amp; 2016/17</p>	
<p><b>11.6 Domestic Spending:</b> What percent of the annual national HIV response is financed with domestic public and domestic private sector HIV funding? (Domestic funding excludes out-of-pocket, Global Fund grants, and other donor resources)?</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<p><input type="radio"/> A. None (0%) is financed with domestic funding.</p> <p><input type="radio"/> B. Very little (approx. 1-9%) is financed with domestic funding.</p> <p><input type="radio"/> C. Some (approx. 10-49%) is financed with domestic funding.</p> <p><input checked="" type="radio"/> D. Most (approx. 50-89%) is financed with domestic funding.</p> <p><input type="radio"/> E. All or almost all (approx. 90%+) is financed with domestic funding.</p>	<p>11.6 Score: 2.50</p>	<p>Resource tracking 2015/16 &amp; 2016/17</p>	
<p><b>11.7 Health Budget Execution:</b> What was the country's execution rate of its budget for health in the most recent year's budget?</p>	<p><input type="radio"/> A. There is no budget for health or no money was allocated.</p> <p><input type="radio"/> B. 0-49% of budget executed.</p> <p><input type="radio"/> C. 50-69% of budget executed.</p> <p><input type="radio"/> D. 70-89% of budget executed.</p> <p><input checked="" type="radio"/> E. 90% or greater of budget executed.</p>	<p>11.7 Score: 0.95</p>	<p>WB Public Expenditure Review</p>	
<p><b>11.8 Data-Driven Reprogramming:</b> Do host country government policies/systems allow for reprogramming domestic investments based on new or updated program data during the government funding cycle?</p>	<p><input type="radio"/> A. There is no system for funding cycle reprogramming.</p> <p><input type="radio"/> B. There is a policy/system that allows for funding cycle reprogramming, but is seldom used.</p> <p><input checked="" type="radio"/> C. There is a policy/system that allows for funding cycle reprogramming and reprogramming is done as per the policy, but not based on data.</p> <p><input type="radio"/> D. There is a policy/system that allows for funding cycle reprogramming and reprogramming is done as per the policy, and is based on data.</p>	<p>11.8 Score: 0.63</p>	<p>State Finance Act 31 of 1991.</p>	<p>Reprogramming is done, but not with data</p>
<p><b>Domestic Resource Mobilization Score:</b></p>		<p><b>8.13</b></p>		

12. Technical and Allocative Efficiencies: The host country analyzes and uses relevant HIV/AIDS epidemiological, health, health workforce, and economic data to inform HIV/AIDS investment decisions. For maximizing impact, data are used to choose which high impact program services and interventions are to be implemented, where resources should be allocated, and what populations demonstrate the highest need and should be targeted (i.e. the right thing at the right place and at the right time). Unit costs are tracked and steps are taken to improve HIV/AIDS outcomes within the available resource envelope (or achieves comparable outcomes with fewer resources).			
		Data Source	Notes/Comments
<p><b>12.1 Resource Allocation Process:</b> Does the partner country government utilize a recognized data-driven model to inform the allocation of domestic (i.e. non-donor) public HIV resources?</p> <p>If yes, please note in the comments section when the model was last used and for what purpose (e.g., for Global Fund concept note development)</p> <p>(note: full score achieved by selecting one checkbox)</p>	<p><input type="radio"/> A. The host country government does not use one of the mechanisms listed below to inform the allocation of their resources.</p> <p><input checked="" type="radio"/> B. The host country government does use the following mechanisms to inform the allocation of their resources (check all that apply):</p> <p><input type="checkbox"/> Optima</p> <p><input checked="" type="checkbox"/> Spectrum (including EPP and Goals)</p> <p><input type="checkbox"/> AIDS Epidemic Model (AEM)</p> <p><input type="checkbox"/> Modes of Transmission (MOT) Model</p> <p><input type="checkbox"/> Other recognized process or model (specify in notes column)</p>	<p>12.1 Score: 2.00</p>	<p>State Finance Act 31 of 1991. National Strategic framework for HIV and AIDS (NSF). National Budgets 2017/2018, 2018/2019. Medium Term Expenditure framework 2016/2017-2019/2020. Ministry of Health and Social Services - annual Operational Plan (s) 2018 and 2019.</p> <p>Spectrum is used annually to update epidemic profile (PLHIV, incidence, etc.) which is then used to calculate the HIV/AIDS disease burden, this is then factored into some resource allocation (commodities, etc.).</p>
<p><b>12.2 Geographic Allocation:</b> Of central government HIV-specific resources (excluding any donor funds) allocated to geographic subunits in the most recent year available, what percentage is being allocated in the highest burden geographic areas (i.e. districts that cumulatively account for 80% of PLHIV)?</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<p><input type="radio"/> A. Information not available.</p> <p><input type="radio"/> B. No resources (0%) are targeting the highest burden geographic areas.</p> <p><input type="radio"/> C. Minimal resources (approx. 1-9%) are targeting the highest burden geographic areas.</p> <p><input type="radio"/> D. Some resources (approx. 10-49%) are targeting the highest burden geographic areas.</p> <p><input checked="" type="radio"/> E. Most resources (approx. 50-89%) are targeting the highest burden geographic areas.</p> <p><input type="radio"/> F. All or almost all resources (approx. 90%+) are targeting the highest burden geographic areas.</p>	<p>12.2 Score: 1.50</p>	<p>National Strategic framework for HIV and AIDS (NSF).</p> <p>significant amount of budget specifically allocated to geographic subunits, based on population size, but not based on highest burden areas. Spending, however, is higher in higher burden areas, by default of those having the largest population.</p>

<p><b>12.3 Information on cost of service provision:</b> Does the host country government have a system that routinely produces information on the costs of providing HIV/AIDS services, and is this information used for budgeting or planning purposes?</p> <p>(note: full score can be achieved without checking all disaggregate boxes).</p>	<p><input checked="" type="radio"/> A. The host country DOES NOT have a system that routinely produces information on the costs of providing HIV/AIDS services.</p> <p><input type="radio"/> B. The host country has a system that routinely produces information on the costs of providing HIV/AIDS services, but this information is not used for budgeting or planning.</p> <p><input type="radio"/> C. The host country has a system that routinely produces information on the costs of providing HIV/AIDS services AND this information is used for budgeting or planning purposes for the following services (check all that apply):</p> <p><input type="checkbox"/> HIV Testing</p> <p><input type="checkbox"/> Laboratory services</p> <p><input type="checkbox"/> ART</p> <p><input type="checkbox"/> PMTCT</p> <p><input type="checkbox"/> VMMC</p> <p><input type="checkbox"/> OVC Service Package</p> <p><input type="checkbox"/> Key population Interventions</p> <p><input type="checkbox"/> PrEP</p>	<p>12.3 Score: 0.00</p>	<p>Resource tracking 2015/16 &amp; 2016/17, NASA/NHA.</p>	<p>There is ad hoc data collection on costs of service provision, supported by PEPFAR partners, and the cost of procured services through the ministry of health, but no independent costs estimates or expenditure cost units exists. Tender awards provide information on what providers bid for services, but it is not an effective system to produce routine costing information. There is no systematic and routine way of collecting costs information, but some cost information exists based on bid prices on procured goods and services.</p>
<p><b>12.4 Improving Efficiency:</b> Has the partner country achieved any of the following efficiency improvements through actions taken within the last three years?</p>	<p>Check all that apply:</p> <p><input checked="" type="checkbox"/> Improved operations or interventions based on the findings of cost-effectiveness or efficiency studies</p> <p><input checked="" type="checkbox"/> Reduced overhead costs by streamlining management</p> <p><input checked="" type="checkbox"/> Lowered unit costs by reducing fragmentation, i.e. pooled procurement, resource pooling, etc.</p> <p><input checked="" type="checkbox"/> Improved procurement competition</p> <p><input checked="" type="checkbox"/> Integrated HIV/AIDS into national or subnational insurance schemes (private or public -- need not be within last three years)</p> <p><input checked="" type="checkbox"/> Integrated HIV into primary care services with linkages to specialist care (need not be within last three years)</p> <p><input checked="" type="checkbox"/> Integrated TB and HIV services, including ART initiation in TB treatment settings and TB screening and treatment in HIV care settings (need not be within last three years)</p>	<p>12.4 Score: 2.00</p>	<p>Ministry of Health and Social Services - Annual Operational Plan (s) 2017, 2018 and 2019.</p>	

	<p><input checked="" type="checkbox"/> Integrated HIV and MCH services, including ART initiated and maintained in eligible pregnant and postpartum women and in infants at maternal and child health care settings (need not be within last three years)</p> <p><input checked="" type="checkbox"/> Developed and implemented other new and more efficient models of HIV service delivery (e.g., multi-month scripting, testing modalities targeted to the population profile, etc. - specify in comments)</p>			
<p><b>12.5 ARV Benchmark prices:</b> How do the costs of ARVs (most common first line regimen) purchased in the previous year by the partner government using domestic resources compare to international benchmark prices for that year?</p> <p>(Use the "factory cost" of purchased commodities, excluding transport costs, distribution costs, etc.)</p>	<p><input type="radio"/> A. Partner government did not pay for any ARVs using domestic resources in the previous year.</p> <p><input type="radio"/> B. Average price paid for ARVs by the partner government in the previous year was more than 50% greater than the international benchmark price for that regimen.</p> <p><input type="radio"/> C. Average price paid for ARVs by the partner government in the previous year was 10-50% greater than the international benchmark price for that regimen.</p> <p><input checked="" type="radio"/> D. Average price paid for ARVs by the partner government in the previous year was 1-10% greater than the international benchmark price for that regimen.</p> <p><input type="radio"/> E. Average price paid for ARVs by the partner government in the previous year was below or equal to the international benchmark price for that regimen.</p>	<p>12.5 Score: 1.50</p>	<p>Analysis of latest ARV tender prices from CMS procurement data</p>	<p>On average, prices for previous year are 1-10% greater (for current year, they are equal or lower.)</p>
<p><b>Technical and Allocative Efficiencies Score:</b></p>		<p><b>7.00</b></p>		

13. Market Openness: Host country and donor policies do not negatively distort the market for HIV services by reducing participation and/or competition.			
		Data Source	Notes/Comments
<p><b>13.1 Granting exclusive rights for services or training:</b> Do national government or donor (e.g., PEPFAR, GFATM, etc.) policies grant exclusive rights for the government or another local provider to provide HIV services?</p>	<p>Do national government or donor (e.g., PEPFAR, GFATM, etc.) polices:</p> <p>A. Restrict the provision of any one aspect of HIV prevention, testing, counseling, or treatment services to a single entity (i.e., creating a monopoly arrangement for that service)?</p> <p><input type="checkbox"/> Yes</p> <p><input checked="" type="checkbox"/> No</p> <p>B. The Ministry of Health under the directorate of Special Programs has a Response Monitoring and Evaluation unit, which coordinates surveillance and survey activities for Malaria, TB and HIV.</p>
<p><b>Epidemiological and Health Data Score:</b></p>		<p><b>5.34</b></p>		

			Data Source	Notes/Comments
<b>15. Financial/Expenditure data:</b> Government collects, tracks and analyzes and makes available financial data related to HIV/AIDS, including the financing and spending on HIV/AIDS expenditures from all financing sources, costing, and economic evaluation, efficiency and market demand analyses for cost-effectiveness.				
<b>15.1 Who Leads Collection of Expenditure Data:</b> To what extent does the host country government lead & manage a national expenditure tracking system to collect HIV/AIDS expenditure data?	<input type="radio"/> A. No tracking of public HIV/AIDS expenditures has occurred within the past 5 years <input type="radio"/> B. Collection of public HIV/AIDS expenditure data occurs using a standard tool (i.e. NASA, NHA), but planning and implementation is primarily led by external agencies, organizations, or institutions <input checked="" type="radio"/> C. Collection of public HIV/AIDS expenditure data occurs using a standard tool (i.e. NASA, NHA) and planning and implementation is led by the host country government, with substantial external technical assistance <input type="radio"/> D. Collection of public HIV/AIDS expenditure data occurs using a standard tool (i.e. NASA, NHA) and planning and implementation is led by the host country government, with some external technical assistance <input type="radio"/> E. Collection of public HIV/AIDS expenditure data occurs using a standard tool (i.e. NASA, NHA), and planning and implementation is led by the host country government, with minimal or no external technical assistance	15.1 Score: 1.67	NHA/NASA report 2017	NHA/NASA was completed by the MoHSS with financial support from PEPFAR /USAID GF and UNAIDS, WHO
<b>15.2 Comprehensiveness of Expenditure Data:</b> To what extent does the host country government collect HIV/AIDS public sector expenditures according to funding source, expenditure type, program and geographic area?	<input type="radio"/> A. No HIV/AIDS expenditure tracking has occurred within the past 5 years <input checked="" type="radio"/> B. HIV/AIDS expenditure data are collected (check all that apply): <input checked="" type="checkbox"/> By source of financing, such as domestic public, domestic private, out-of-pocket, Global Fund, PEPFAR, others <input checked="" type="checkbox"/> By expenditures per program area, such as prevention, care, treatment, health systems strengthening <input checked="" type="checkbox"/> By type of expenditure, such as training, overhead, vehicles, supplies, commodities/reagents, personnel <input type="checkbox"/> Sub-nationally	15.2 Score: 2.50	NHA/NASA report 2017	
<b>15.3 Timeliness of Expenditure Data:</b> To what extent are expenditure data collected in a timely way to inform program planning and budgeting decisions?	<input type="radio"/> A. No HIV/AIDS expenditure data are collected <input type="radio"/> B. HIV/AIDS expenditure data are collected irregularly, and more than 3 years ago <input type="radio"/> C. HIV/AIDS expenditure data were collected at least once in the past 3 years <input checked="" type="radio"/> D. HIV/AIDS expenditure data are collected annually but represent more than one year of expenditures <input type="radio"/> E. HIV/AIDS expenditure data are collected annually and represent only one year of expenditures	15.3 Score: 2.50	NSF 2017-2022.	
<b>Financial/Expenditure Data Score:</b>			<b>6.67</b>	

16. Performance data: Government routinely collects, reports, analyzes and makes available HIV/AIDS service delivery data. Service delivery data are analyzed to track program performance, i.e. coverage of key interventions, results against targets, and the continuum of care and treatment cascade, including linkage to care, adherence and retention, and viral load testing coverage and suppression.			
		Data Source	Notes/Comments
<p><b>16.1 Who Leads Collection and Reporting of Service Delivery Data:</b> To what extent is the routine collection and reporting of HIV/AIDS service delivery data institutionalized in an information system and managed and operated by the host country government at the national level?</p>	<p><input type="radio"/> A. No system exists for routine collection of HIV/AIDS service delivery data</p> <p><input checked="" type="radio"/> B. Multiple unharmonized or parallel information systems exist that are managed and operated separately by various government entities, local institutions and/or external agencies/institutions</p> <p><input type="radio"/> C. One information system, or a harmonized set of complementary information systems, exists and is primarily managed and operated by an external agency/institution</p> <p><input type="radio"/> D. One information system, or a harmonized set of complementary information systems, exists and is managed and operated by the host country government with technical assistance from external agency/institution</p> <p><input type="radio"/> E.
