INFORMATION MEMO FOR AMBASSADOR JOHNSON, Namibia

FROM: S/GAC – Ambassador Deborah L. Birx, MD

SUBJECT: FY 2020 PEPFAR Planned Country Allocation and Strategic Direction

Dear Ambassador Johnson:

First, I wanted to personally thank you and Deputy Chief of Mission Lord for your dedication to PEPFAR and working every day to achieve the most possible with the United States taxpayers’ dollars. The ability to translate these resources into effective and impactful programming has and continues to be core to our collective progress. You have taught us how to rapidly expand to a changing epidemic, how to innovate in testing and linkage to care, how to transform policy to real site level impact. Your PEPFAR team in country is extraordinary and we are fortunate to witness their passion and compassion. We are very excited about your progress in:

- Over the past year, Namibia has maintained high levels of treatment coverage and community viral load suppression through rapid implementation of WHO guidelines and patient-centered services. Through these actions, they will be one of the first nations to achieve the UNAIDS 95-95-95 goals, almost a decade ahead of schedule.
- Namibia successfully launched case-based surveillance through recency testing, which will allow for targeted interventions to interrupt active transmission. These programs are on track to scale nationally in FY 2020.
- DREAMS reached full-scale implementation in FY 2019, with high proportions of AGYW receiving the full package of services within their first year of participation.

Together with the Government of Namibia and civil society leadership we have made tremendous progress together. Namibia should be proud of the progress made over the past 16 years of PEPFAR implementation and we are deeply grateful for the ongoing deep coordination with the Global Fund and UNAIDS.

We did want to highlight both overarching issues we see across PEPFAR, and a few specific to Namibia. Full details will follow in a more comprehensive letter from your S/GAC Chair and PPM.

Throughout the PEPFAR family of supported countries and communities, five gaps are shared across the globe holding us collectively back from achieving Sustainable Development Goal 3 related to controlling the HIV AIDS epidemic:

1. Continued new HIV infections in adolescents and young women
2. Supporting key populations with prevention and treatment services
3. Ensuring men are diagnosed and treated early (testing positive and new on treatment (linkage surrogate))
4. Ensuring 15-35-year-old asymptomatic clients are maintained on treatment and virally suppressed (net new on treatment and treatment current growth, (retention surrogate))
5. Ensuring all children are diagnosed and are on the best treatment regimens and virally suppressed

Moreover, we note PEPFAR Namibia’s key challenges:

- While community index testing partners continued to efficiently identify PLHIV, not all districts have community-based programs and facilities have struggled to reproduce community partner results. Effective index testing in all districts will be critical to fully realize the potential of case-based surveillance and respond to active areas of transmission.
- With such high treatment coverage, precision in data and monitoring of individual patients throughout the health sector will be critical and necessitates national electronic patient management systems that utilize unique identifiers.
- PEPFAR and, to a lesser extent, Global Fund, continue to support a significant number of human resources for health. Rationalizing the workforce needed to maintain epidemic control and building capacity within government institutions to manage those needs, will be critical going forward.

In a recent Office of Inspector General audit around PEPFAR coordination there were four draft preliminary recommendations based on their discussions with PEPFAR staff in the field from four countries, three of their recommendations are relevant to this Country Operational Plan planning cycle related to target setting, tool development, and timelines. Although we just received the draft report a few days ago we did not want to wait another COP cycle to make substantive changes related to the recommendations. The first was around targets and target-setting and the need for a clear and transparent understanding and dialogue in establishing targets. PEPFAR targets are not PEPFAR’s but flow directly from the UNAIDS Fast Track Strategy of 2016. Since 2016, both the PEPFAR strategy and targets were directly derived from the global communities of UNAIDS, WHO, and specifically Heads of State in their commitment to SDG 3 and are aligned to support the country’s specific ambition towards those goals.

The global community in 2015, through their Heads of State, committed to achieving SDG 3.3 by 2030 which for HIV is ending the HIV/AIDS epidemic as a public health threat. This was followed by a United Nations High Level Meeting on HIV/AIDS in June 2016, whereby these Heads of State committed to the 90/90/90 Fast Track Strategy. Essential to the strategy was 73% community viral load suppression (VLS) by 2020 and 86% community VLS by 2030 combined with increased prevention interventions and zero stigma and discrimination to ensure all ages, genders and risk groups have access to life saving prevention and treatment services. Also, in 2016, 22 PEPFAR-supported high HIV burden countries committed to the three Frees of Start Free, Stay Free, AIDS Free with 2020 targets of a decrease in new infections in children to 20,000, 85% of pregnant women on ART, AGYW new infections to < 100,000, 90% of children on ART and 25 million VMMCs. Since 2016 PEPFAR and the GF resources have been focused
on achieving these global goals that have been translated to each country by UNAIDS and subsequently supported financially and technically by the PEPFAR family. Since 2016, PEPFAR has utilized these global commitment targets as PEPFAR targets with the commensurate increased funding to countries in 2016, 2017, and 2018 to achieve the goals set out by the Heads of State. Many countries have made tremendous progress towards these targets and others need to accelerate. Namibia is on track to achieve the 2020 and 2030 goals early and sustaining the amazing gains will need to be our constant focus.

Over the past 4 years, PEPFAR resources were allocated based on need, performance, and specifically on the country’s and communities’ desire to achieve the SDG, Fast Track Strategy, and Three Free goals and country specific targets. Based on the OIG recommendation, S/GAC will take a different approach this year to target-setting. Our collective hope is that together we use this moment of reflection on progress and challenges along with the realization that the end of 2020 is only 11 months away to address these overarching challenges this year through COP 2019 implementation and use COP 2020 to maintain our progress, address any ongoing challenges and finally fund ambition for greater impact. Thus, S/GAC will not assign targets to countries but only provide notional budget levels. After the PEPFAR country team submits their targets the notional budget will then be adjusted to the presented level of ambition. Additional funding is available as ambition funding for treatment and VMMC.

The PEPFAR Country/Regional Operational Plan (COP/ROP 2020) notional budget is $84,176,000 inclusive of all new funding accounts and applied pipeline and reflects the following:

1. Sustaining the gains in treatment services based on your projected COP 2019 treatment result (FY2020 treatment current funded in COP19)
   $44,450,000
   a. The care and treatment budget is determined by all of your FY18 C/T expenditure services and commodities (no RTK commodities), including all aspects of the health system inclusive of human resources, laboratory and systems, commodities (exclusive of RTKs), an upward adjustment from FY19 treatment current to the FY2020 treatment current fully burdened cost of treatment services and commodities, and 100% of partner program management costs and data needs
   b. This Budget is broken down by
      i. Care and Treatment services including partner program management costs, FY2020 upward adjustment, EMR and data with surveillance, recency $32,600,000
      ii. ARV drugs and treatment commodities (everything except RTKs) $650,000
      iii. TB preventive treatment $3,200,000
      iv. Cervical cancer $500,000
      v. For earmark purposes 50% of M/O costs $7,500,000
      vi. Care and Treatment qualifies for ambition funds if addresses gap #3-5
2. Continued orphans and vulnerable children funding to include DREAMS vulnerable girls less than 20-year-old. $23,200,000
   a. HKID or $4,700,000 dollars for continued historical OVC services
   b. DREAMS funding of $20,000,000 of which 85% is for vulnerable girls under 20 $17,000,000
   c. 10% of M/O or $1,500,000
3. Continued VMMC funding based on your percent of VMMC in the appropriate age band of >15 years old
   a. Total VMMC $3,500,000
   b. VMMC qualifies for ambition requests
4. Dramatic expansion of DREAMS programming $20,000,000 as noted above
5. Continued expansion of Key Populations prevention and expansion of PrEP depending on country submitted targets
   a. Key Population (non-treatment includes RTKs) $1,600,000
   b. PrEP total: $2,200,000 dollars (includes RTKs)
6. RTK and service support to ANC HIV testing $226,000
7. Remaining 40% M/O based on COP19 $6,000,000

Total COP2020 notional budget of $84,176,000 (comprised of $72,953,980 new and 11,222,020 pipeline).

Overall, across the PEPFAR portfolio, we have dramatically increased DREAMS funding to prevent new infections in adolescent girls and young women. For the first time we find across all districts implementing DREAMS, declines in new diagnoses of HIV in young women. These funds should be used to expand to the highest burden districts not currently covered and saturated in urban areas.

Teams will develop their own targets across PEPFAR program areas described above, with the treatment current target no less than the result that was to be achieved in COP 2019. Testing support outside of ANC should be consistent with any targets above FY2020 treatment current and be submitted with any ambition funding. Targets should reflect continued and sustained OVC, cervical cancer, and KP programming. For DREAMS, PrEP, and Preventive TB, targets should be increased consistent with the level of increased budgets.

Again, the team has received a notional budget as noted above and a final budget approval will be contingent on the team’s desired targets. As always funding is associated with a performance target that will be achieved with those resources. Targets and the subsequent approved budget should reflect the level of ambition the PEPFAR team in collaboration with the Government of Namibia and civil society of Namibia believes is critical for the country’s progress towards controlling the pandemic and maintaining control.

Additionally, country teams and specifically agencies independently can request additive ambition funds in the OU FAST to be submitted, based on their stated increased ambition in Treatment and VMMC, with commensurate increased partner level targets. This funding is available to agency partners with the highest performance with evidence that they are addressing one of the critical gaps outlined above. Budget requests must be consistent with the cost of
expanded targets and address one of the gaps in programming #3-5 above. These requests should be discussed with the S/GAC Chair and PPM during the January strategy retreat and tentatively approved and be submitted with the DataPack and FAST tool. The final budget and associated country level targets will be discussed and approved during the Johannesburg meeting.

We are hoping this new approach to target-setting and budget will establish an open dialogue on target-setting and empower teams to work with all stakeholders to plan a strategic and impactful COP. The expectation is for country teams and agencies to propose to S/GAC the targets they believe are achievable and feasible and hold their partner’s accountable to that achievement. In addition, this new approach to target-setting gives high performing partners and agencies with additional aspirations the opportunity to do more to achieve even greater impact with additional ambition resources.

In the next 48 hours, more detailed descriptions of OU’s programmatic successes and challenges will be conveyed to your wider PEPFAR team by the S/GAC Chair and PPM in a phone call, after which the detailed planning level letter will be immediately released.

Again, thank you for your work and we are looking forward to working with you to achieve your Fast Track Strategy and ultimately the SDG 3.3 goal.

Together we can.

Deborah Birx
