

Strategic Plan CIO Statement

I, Stuart M. McGuigan, the undersigned Chief Information Officer, of the Department of State, certifies that my agency is compliant with the following reporting requirements of the draft OMB memorandum, M-19-19, the Data Center and Cloud Optimization Initiative (DCCOI) that was released in June 2019.

My Department is effectively reporting against the required DCCOI data fields used to generate the mandated Metric Target Values on the reported CONUS and OCONUS data centers. The Department of State's Bureau of Information Resource Management (IRM) is responsible for managing the State's DCCOI Program and reporting for the following requirements:

- Advanced Energy Metering
- Virtualization
- Underutilized Servers
- Availability
- Data Center Closures
- Cost Savings

My Department continues to enhance its data collection and reporting processes for its inventory of over 400 data centers located domestically and overseas. We have exceeded our overall closure targets and received an ATO for our Enterprise Azure Cloud. Additionally, an enterprise data center, ESOC East, closed in 2019 resulting in the continued IT Modernization of the other three enterprise data centers. The attached Strategic Plan will detail our accomplishments and provide an outlook for areas we plan to enhance.

Lastly, my agency has verified that the Strategic Plan accompanied by this document is a valid JSON file, conforms to the schema on <https://management.cio.gov/schema>, and addresses all of the requirements specified in the DCCOI. Furthermore, I confirm that this Strategic Plan has been posted publicly on <http://www.state.gov/digitalstrategy> under the heading "Data Center Optimization Initiative Strategic Plans."

Signed,

**STUART M
MCGUIGAN**
