

Energy Resource Governance Initiative Toolkit

The Energy Resource Governance Initiative (ERGI) Toolkit is an online collection of interactive tools across mining governance disciplines that helps the user build capacity in industry-leading practices. The toolkit highlights real-world case studies informed by ERGI Founding Partners and international best practices. The toolkit serves as a compendium of step-by-step guides to the strategies, policies, and institutional skills that lead to a transparent, well-governed mining sector. Users can explore decision trade-offs across the mining lifecycle, and see how the choices made affect investment, state revenues, infrastructure, the environment, job creation, and local/indigenous communities.

Resource Management

States maximize their mineral wealth by providing high quality, actionable data to potential investors. These tools outline how to facilitate this process.

Featured Tool:

Understanding & Promoting Your Resource Endowment

Project Development

When mining industry stakeholders consider entering new markets, they seek out transparent and well-defined investment environments. These tools explain the key concepts that underpin such an environment.

Featured Tool:

Mineral Licensing & Leasing

Production

As mining operations progress from prospecting to extraction, the State performs an investment facilitation and oversight function. These tools provide guidance on the activities required to serve that function effectively.

Featured Tool:

Mineral Asset Classification & an Introduction to Royalties

Stewardship

Mining sector stewardship involves supporting all stakeholders across the full life cycle of a project to maximize the value from mining activities. Governments have an important role to play in promoting and innovating policies that create shared value through social, economic, and environmental outcomes. These tools provide public-private collaborative methods and practices to achieve optimal shared value.

Featured Tool:

Social License to Operate

ERGI

ERGI is designed to promote sound mining sector governance and resilient energy mineral supply chains. This initiative brings countries together to engage on advancing governance principles, sharing best practices, and encouraging a level playing field for investment.
