

# PEPFAR

U.S. President's Emergency Plan for AIDS Relief

## The U.S. President's Emergency Plan for AIDS Relief

## June 2021

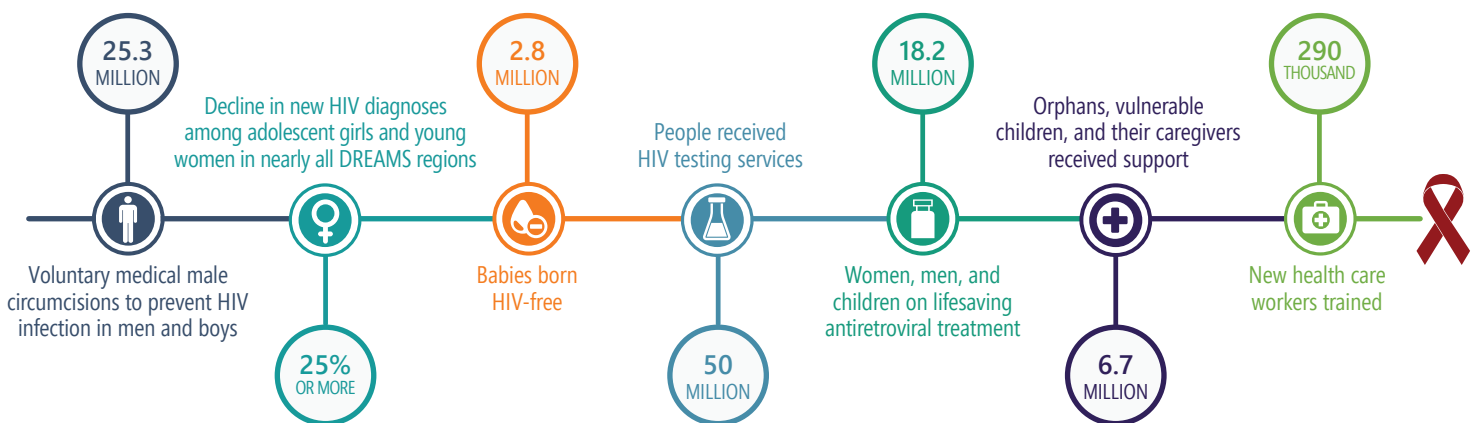

# PEPFAR has saved 20 million lives in more than 50 countries

With strong bipartisan support across U.S. presidencies and U.S. congresses, and through the American people's remarkable generosity, the U.S. President Emergency Plan for AIDS Relief (PEPFAR) has saved 20 million lives, prevented millions of HIV infections, and transformed the HIV/AIDS pandemic from crisis toward control – community by community.

Through PEPFAR support, several countries have achieved HIV epidemic control and reached or exceeded the Joint United Nations Programme on HIV/AIDS (UNAIDS) 90-90-90 targets by 2020. PEPFAR continues to work in more than 50 countries worldwide and to ensure that all populations, including key populations and other vulnerable groups, can access HIV prevention and treatment services in ways that meet their needs.

PEPFAR has replaced death and despair with vibrant life and hope, showing the power of what is possible through compassionate, cost-effectiveness, accountable, and transparent American foreign assistance. PEPFAR's rigor has allowed the program to significantly expand its life-saving results and impact with little or no increased financial resources over the past decade.

PEPFAR's investments also continue to strengthen the systems that drive client-centered and sustainable health care. These investments support a lasting health system for partner countries to confront other current and future health challenges and enhance global health security.

PEPFAR's transformative, life-saving impact is unassailable, but our mission is not yet finished. The HIV/AIDS pandemic constantly evolves in every community and country and PEPFAR continually adapts to address new risk groups, new health challenges, and persistent gaps.

PEPFAR is the largest commitment by any nation to address a single disease in history. Managed and overseen by the U.S. Department of State, and supported through the compassion and generosity of the American people, PEPFAR has saved 20 million lives, prevented millions of infections, and helped transform the global AIDS response.
