TRADE AND INVESTMENT

Mutual Recognition

Agreement Between the
UNITED STATES OF AMERICA
and the UNITED KINGDOM OF
GREAT BRITAIN AND NORTHERN
IRELAND

Signed at Washington February 14, 2019

Entered into force December 31, 2020
NOTE BY THE DEPARTMENT OF STATE

Pursuant to Public Law 89—497, approved July 8, 1966
(80 Stat. 271; 1 U.S.C. 113)—

“. . .the Treaties and Other International Acts Series issued under the authority of the Secretary of State shall be competent evidence . . . of the treaties, international agreements other than treaties, and proclamations by the President of such treaties and international agreements other than treaties, as the case may be, therein contained, in all the courts of law and equity and of maritime jurisdiction, and in all the tribunals and public offices of the United States, and of the several States, without any further proof or authentication thereof.”
AGREEMENT BETWEEN

THE UNITED STATES OF AMERICA AND

THE UNITED KINGDOM OF GREAT BRITAIN AND
NORTHERN IRELAND

ON THE MUTUAL RECOGNITION OF
CERTIFICATES OF CONFORMITY FOR MARINE
EQUIPMENT
AGREEMENT BETWEEN

THE UNITED STATES OF AMERICA AND

THE UNITED KINGDOM OF GREAT BRITAIN AND
NORTHERN IRELAND

ON THE MUTUAL RECOGNITION OF
CERTIFICATES OF CONFORMITY FOR MARINE
EQUIPMENT

The United States of America ("the United States") and the United Kingdom of Great Britain and Northern Ireland ("the United Kingdom"), hereafter referred to as "the Parties",

CONSIDERING the traditional links of friendship that exist between the United States and the United Kingdom;

DESIRING to facilitate trade in marine equipment between them and to increase the effectiveness of each Party's regulatory actions;

RECOGNIZING the opportunities offered to regulators by the elimination of unnecessary duplication of their activities;

NOTING the shared commitment of the Parties to the work of the International Maritime Organization (IMO);

CONSIDERING that the aim of the Parties is to enhance safety at sea and to prevent marine pollution;

RECOGNIZING, on the one hand, that mutual recognition agreements can positively contribute to facilitation of bilateral trade;

BEARING IN MIND, on the other hand, that the determination of equivalence must ensure that the fulfillment of the regulatory objectives of the Parties is fully respected and will not lead to a lowering of their respective levels of safety and protection;

RECOGNIZING that mutual recognition of Certificates of Conformity based on the equivalence of the marine equipment regulations of the United States and the United Kingdom is an important means of enhancing market access between them;
RECOGNIZING that agreements providing for mutual recognition are of particular interest to small and medium-sized businesses in the United States and the United Kingdom;

RECOGNIZING that any mutual recognition also requires confidence in the continued reliability of the conformity assessments of the United States and the United Kingdom;

BEARING IN MIND that the Agreement on Technical Barriers to Trade, an agreement annexed to the Agreement Establishing the World Trade Organization (WTO), encourages WTO Members to enter into negotiations for the conclusion of agreements for the mutual recognition of results of each other's conformity assessment procedures, as well as to give positive consideration to accepting as equivalent the technical regulations of other Members, provided they are satisfied that these regulations adequately fulfill the objectives of their own regulations,

HAVE AGREED AS FOLLOWS:

ARTICLE 1

Definitions

1. The following terms and definitions apply to this Agreement:

(a) "Certificate of Conformity" means the document or documents issued by a Conformity Assessment Body of a Party certifying that a product fulfills the relevant legislative, regulatory, and administrative requirements of that Party. In the United States, this is the Certificate of Type Approval issued by the United States Coast Guard. In the United Kingdom, these are the certificates, approvals, or declarations provided for by the Merchant Shipping (Marine Equipment) Regulations 2016 as amended.

(b) "Conformity Assessment Body" means a legal entity, whether a Regulatory Authority or another body, public or private, that has the authority to issue Certificates of Conformity. For the purposes of this Agreement, the Parties' respective Conformity Assessment Bodies are those referred to in Article 6.

(c) "Equivalence of technical regulations" means that the technical regulations, as defined in paragraph 1(g), of the United States and the United Kingdom related to a specific product are sufficiently comparable to ensure that the objectives of each Party's respective
regulations are fulfilled. Equivalence of technical regulations does not require that the respective technical regulations are identical.

(d) "Party" means the United States, or the United Kingdom, as the case may be.

(e) "International Instruments" means the relevant international conventions, resolutions, codes, and circulars of the IMO, and the relevant testing standards as listed in Annex II.

(f) "Regulatory Authority" means a government agency or entity that has the authority to issue regulations regarding issues related to safety at sea and prevention of marine pollution, that exercises a legal right to control the use or sale of marine equipment within a Party’s jurisdiction, and that may take enforcement action to ensure that products marketed within its jurisdiction comply with applicable legal requirements. The Parties' respective Regulatory Authorities are identified in Annex III.

(g) "Technical regulations" comprise the mandatory product requirements, testing and performance standards, and conformity assessment procedures laid down in the legislative, regulatory, and administrative provisions of the United States and the United Kingdom related to marine equipment, as well as any applicable guidelines for their application.

2. Other terms concerning conformity assessment used in this Agreement have the meaning given elsewhere in this Agreement or in the definitions contained in ISO/IEC 17000:2004 of the International Organization for Standardization (ISO) and the International Electrotechnical Commission (IEC). In the event of an inconsistency between ISO/IEC 17000:2004 and definitions in this Agreement, the definitions in this Agreement prevail.

ARTICLE 2

Purpose of the Agreement

1. This Agreement establishes the conditions under which the United States, on the one hand, and the United Kingdom, on the other hand, shall accept Certificates of Conformity issued by the Conformity Assessment Bodies of the other Party in assessing conformity to its own requirements, as specified in Annex I, hereinafter referred to as "mutual recognition".
2. This Agreement also lays down a framework for regulatory cooperation with the objective of maintaining and furthering mutual recognition between the United States and the United Kingdom of their respective regulatory requirements for marine equipment; of encouraging the improvement and evolution of regulatory requirements for the purpose of enhancing safety at sea and the prevention of marine pollution; and of ensuring consistent application of this Agreement. This cooperation will take place fully respecting each Party’s regulatory autonomy and each Party’s evolving policies and regulations, as well as the Parties’ shared commitment to the evolution of the relevant International Instruments.

3. This Agreement is intended to evolve as programs and policies of the Parties evolve. The Parties shall review this Agreement periodically in order to assess progress and identify potential enhancements to this Agreement. In their review, the Parties shall give particular attention to the evolution of the International Instruments.

ARTICLE 3

Basic Obligations

1. With respect to each product listed in Annex II, the United States shall accept as complying with its own legislative, regulatory, and administrative provisions as referred to in Annex I, without any further conformity assessment, Certificates of Conformity issued by the Conformity Assessment Bodies of the United Kingdom in accordance with the legislative, regulatory, and administrative provisions of the United Kingdom.

2. With respect to each product listed in Annex II, the United Kingdom shall accept as complying with its own legislative, regulatory, and administrative provisions as referred to in Annex I, without any further conformity assessment, Certificates of Conformity issued by the Conformity Assessment Body of the United States in accordance with the legislative, regulatory, and administrative provisions of the United States.

3. The technical regulations applicable in the United States and in the United Kingdom to each such product within the scope of this Agreement are specified in Annex II.
ARTICLE 4

Equivalence of Technical Regulations

1. The Parties have determined that their respective technical regulations for each product listed in Annex II are equivalent, as set forth in Article 3.

2. If the Parties decide to expand upon the product scope of Annex II, the determination of equivalence of technical regulations shall be based on their implementation of the relevant International Instruments in their respective legislative, regulatory, and administrative provisions, except where either Party regards that an International Instrument would be an ineffective or inappropriate means of fulfillment of its regulatory objectives. In the latter case, equivalency shall be determined on a mutually acceptable basis.

ARTICLE 5

Marking

Each Party may maintain its respective requirements with regard to the marking, numbering, and identification of products. With respect to the products listed in Annex II, the Conformity Assessment Bodies of the United Kingdom shall have the right to issue the marking and numbering required by U.S. legislation and regulations, as allocated to them by the U.S. Coast Guard. The Conformity Assessment Body of the United States shall have the right to issue the marking and numbering required by UK legislation and regulations.

ARTICLE 6

Conformity Assessment Bodies

1. For the purposes of issuing Certificates of Conformity in accordance with the provisions of this Agreement, the following applies:

   (a) The United States recognizes the Conformity Assessment Bodies designated by the United Kingdom in accordance with the Merchant Shipping (Marine Equipment) Regulations 2016 as amended; and

   (b) The United Kingdom recognizes the United States Coast Guard, together with the laboratories it has accepted under 46 CFR 159.010, as a Conformity Assessment Body of the United States.
2. Each Party shall provide that the Conformity Assessment Bodies referred to in paragraph 1 perform the following procedures in relation to the legislative, regulatory, and administrative provisions referred to in Annex I:

(a) testing and issuing of test reports; and

(b) performing quality assurance functions or system certifications.

3. Each Party’s Regulatory Authorities are responsible for the following procedures, but may delegate some or all of these functions to its Conformity Assessment Bodies:

(a) reviewing equipment design and test results against identified standards; and

(b) issuing Certificates of Conformity.

4. Prior to the entry into force of this Agreement, the Parties shall exchange their respective lists of Conformity Assessment Bodies. Thereafter, each Party shall promptly inform the other of any changes to its list of Conformity Assessment Bodies. Each Party shall maintain on the Internet updated lists of its Conformity Assessment Body(ies).

5. Each Party shall require that its Conformity Assessment Bodies record and retain details of their investigations of the competence and compliance of their subcontractors and maintain a register of all sub-contracting. Each Party shall make these details available to the other on request.

6. Each Party shall require that a Conformity Assessment Body, on request of a Regulatory Authority of the other Party make available to that Regulatory Authority, copies of the Certificates of Conformity and related technical documentation that the Conformity Assessment Body has issued.

ARTICLE 7

Joint Committee

1. The Parties hereby establish a Joint Committee consisting of representatives of each Party. The Joint Committee shall be responsible for the effective functioning of this Agreement.
2. Each Party shall have one vote in the Joint Committee. The Joint Committee shall make its decisions by unanimity. The Joint Committee shall determine its own rules of procedure.

3. The Joint Committee may consider any matter relating to the effective functioning of this Agreement. The Joint Committee shall have the authority to take decisions in the cases provided for in this Agreement. The Parties shall take the necessary measures to implement such decisions of the Joint Committee. In particular, the Joint Committee shall be responsible for:

(a) developing and maintaining the list in Annex II of products and associated legislative, regulatory, and administrative provisions that the Parties have determined to be equivalent;

(b) discussing issues and resolving problems that may arise concerning the implementation of this Agreement, including concerns that technical regulations of the Parties applicable to a specific product in Annex II may no longer be equivalent;

(c) addressing technical, conformity assessment, and technology issues in order to ensure a consistent application of this Agreement, in particular in relation to the relevant International Instruments;

(d) amending the Annexes;

(e) providing guidance and, if necessary, developing guidelines to facilitate the successful implementation and application of this Agreement; and

(f) establishing and maintaining a work plan for aligning and harmonizing the technical requirements of the Parties.

4. The Joint Committee may establish Joint Working Groups comprising representatives of the Parties' Regulatory Authorities and appropriate experts, as necessary, in order to address and advise the Joint Committee on specific issues related to the functioning of this Agreement.

ARTICLE 8

Preservation of Regulatory Authority

Nothing in this Agreement shall be construed to limit the authority of a Party to determine, through its legislative, regulatory, and administrative measures, the level of protection it considers appropriate for enhancing safety at sea and improving the
prevention of marine pollution, or otherwise to act with regard to risks within the scope of this Agreement.

ARTICLE 9

Exchange of Information and Contact Points

1. The Regulatory Authorities listed in Annex III shall establish appropriate means of exchanging information with respect to the functioning of this Agreement.

2. Each Party shall designate at least one contact point, which may be a Regulatory Authority listed in Annex III, to provide answers to all reasonable inquiries from the other Party and other interested parties such as manufacturers, consumers, and trade associations, regarding procedures, regulations, and other matters related to this Agreement. The Parties shall exchange, and make publicly available, lists of contact points.

3. Each Party shall make available to the public on the Internet the list of products for which its Conformity Assessment Body(ies) has/have issued Certificates of Conformity and shall update the list on a regular basis.

ARTICLE 10

Regulatory Changes

1. When either Party introduces new technical regulations related to this Agreement, it shall do so on the basis of existing International Instruments, except when it considers the International Instrument would be an ineffective or inappropriate means for fulfillment of its regulatory objectives.

2. Each Party shall notify the other Party of changes to its technical regulations related to the subject matter of this Agreement at least 90 days before they have entered into force. Where considerations of safety, health, or environmental protection require more urgent action, the Party taking the action shall notify the other Party as soon as practicable.

3. The Parties and their Regulatory Authorities shall inform and consult with each other, as permitted by their respective laws and regulations, on:

   (a) proposals to amend or introduce new technical regulations as laid down in their respective legislative, regulatory, and administrative provisions referred to, or related to, provisions listed in Annexes I and II;
(b) timely incorporation of amended or new International Instruments into their respective legislation, regulations, and administrative provisions; and

(c) the renewal of existing and valid Certificates of Conformity when the renewal is required by amended or new legislative, regulatory, or administrative provisions.

4. Each Party shall provide the other with an opportunity to comment on the regulatory changes referred to in paragraphs 1 through 3.

5. In the event of changes to the legislation, regulations, and administrative provisions referred to in Annexes I and II, the Joint Committee shall consider whether the technical regulations with respect to products listed in Annex II are still equivalent within the terms of Article 4(2).

(a) If the Joint Committee decides that certain technical regulations are still equivalent, the product shall be retained in Annex II.

(b) If the Joint Committee decides that certain technical regulations are no longer equivalent, references to the product and the relevant technical regulations shall be removed from Annex II and the Joint Committee shall issue a decision updating Annex II to reflect any change. Once mutual recognition has been discontinued, the Parties shall no longer be bound by the obligations referred to in Article 3 for the specific product. However, the importing Party shall continue to recognize previously issued Certificates of Conformity for those products that have been placed on that Party's market prior to the discontinuance of mutual recognition, unless a Regulatory Authority of the Party decides otherwise based on health, safety, or environmental considerations or the other Party's failure to satisfy other requirements within the scope of this Agreement.

(c) If the Joint Committee cannot agree on whether certain technical regulations with respect to a product listed in Annex II are still equivalent, mutual recognition with respect to that product shall be suspended according to the terms of Article 15.

6. The Parties shall make available on the Internet an up-to-date version of Annex II.
ARTICLE 11

Regulatory Cooperation

1. The Parties shall cooperate in the IMO and other relevant international organizations such as the ISO, the IEC, and the International Telecommunication Union (ITU), with a view to establishing and improving international rules for enhancing safety at sea and the prevention of marine pollution.

2. The Parties shall consider what technical work, data and information exchange, scientific and technological cooperation, or other cooperative activities can be pursued between them with a view to improving the quality and level of their technical regulations applicable to marine equipment and making efficient use of resources for regulatory development.

3. For products that are not listed in Annex II, either because they were not included in Annex II on entry into force of this Agreement, or because equivalence of technical regulations has been discontinued or suspended, each Party undertakes to examine its technical regulations with a view to establishing, to the extent possible, mutual recognition. The Parties shall endeavor to align their technical regulations to the extent possible on the basis of existing International Instruments in pursuit of the objective of their domestic legislation to enhance safety at sea and improve the prevention of marine pollution.

4. When the Parties have determined that technical regulations with respect to products not listed in Annex II are equivalent, the Joint Committee shall take a decision to amend Annex II accordingly.

ARTICLE 12

Cooperation on Conformity Assessment

1. The Parties and representatives of the Parties, including representatives of their respective Regulatory Authorities, shall consult as necessary to ensure the maintenance of confidence in conformity assessment procedures and Conformity Assessment Bodies. This can take the form of, for example, comparison of methods to verify and monitor the technical competence and ability of Conformity Assessment Bodies and, with the consent of both Parties, joint participation in audits/inspections related to conformity assessment activities or other assessment of Conformity Assessment Bodies.

2. Each Party shall encourage its Conformity Assessment Body(ies) to take part in coordination and cooperation activities organized by the other Party.
ARTICLE 13

Surveillance of Conformity Assessment Bodies

1. Each Party shall ensure that its Conformity Assessment Body(ies) are capable and remain capable of properly assessing conformity of products or processes, according to the applicable legislative, regulatory, and administrative provisions and carry out the functions listed in Article 6(2) and, if applicable, Article 6(3). In this regard, each Party shall maintain, or cause to maintain, ongoing surveillance, as applicable, over its Conformity Assessment Body(ies) by means of regular audit or assessment.

2. If a Party has objective reasons for contesting the technical competence of a Conformity Assessment Body of the other Party, it shall inform the other Party in writing. The other Party shall in a timely manner present information in order to refute the contestation or to correct the deficiencies which form the basis of the contestation. If necessary, the Parties shall discuss the matter in the Joint Committee. If the Parties cannot agree on the competency of the Conformity Assessment Body, the contesting Party may refuse to grant its marking and/or numbering to the contested Conformity Assessment Body and refuse to recognize Certificates of Conformity it issues.

ARTICLE 14

Market Surveillance

1. Nothing in this Agreement shall be construed to limit the authority of a Regulatory Authority to take all appropriate and immediate measures:

(a) whenever it ascertains that a product listed in Annex II may not meet its applicable technical regulations; or

(b) whenever it ascertains that a product listed in Annex II, even though it does meet its applicable technical regulations and is correctly installed, maintained, and used for its intended purpose, may compromise the health and/or safety of a crew, passengers or, where applicable, other persons, or adversely affect the marine environment.

Such measures may include: withdrawing the product from the market, prohibiting its placement on the market, restricting its free movement, initiating a product recall, and preventing the recurrence of such problems, including through a prohibition on imports.
If the Regulatory Authority takes such action, it shall inform the other Party no later than fifteen days after taking such action, providing its reasons for such action.

2. Nothing in this Agreement shall be construed to prevent a Party from removing products from the market that do not in fact conform to that Party’s technical regulations.

3. Any applicable border inspections and checks of products which have been certified, labeled, or marked as conforming with the importing Party’s requirements specified in Annex I shall be completed as expeditiously as possible. The Parties agree that inspections related to internal movement of such products within a Party’s territory shall be completed in no less a favorable manner than for like domestic products.

ARTICLE 15

Suspending Mutual Recognition

1. In case a Party considers that the other Party’s technical regulations with respect to one or more products listed in Annex II are no longer equivalent, it shall inform the other Party and give the objective reasons for this. The Parties shall discuss the matter in the Joint Committee. If the Joint Committee does not reach a decision within 60 days of the referral to it, the contesting Party may suspend the mutual recognition obligation with respect to the product(s). The suspension shall remain in effect until the Joint Committee decides otherwise.

2. If mutual recognition is suspended for one or more products under paragraph 1, the Joint Committee shall update Annex II by a decision to reflect the suspension. The Parties shall cooperate, pursuant to the terms of Article 11, with a view to re-establishing equivalence with respect to the product(s), to the extent possible.

3. On suspension of mutual recognition for one or more products under paragraph 1, the Parties shall no longer be bound by the obligations referred to in Article 3 for the product(s). However, the importing Party shall continue to recognize previously issued Certificates of Conformity for product(s) that have been placed on the market of that Party prior to the suspension of mutual recognition, unless a Regulatory Authority of the Party decides otherwise based on health, safety, or environmental considerations or failure to satisfy other requirements within the scope of this Agreement.

ARTICLE 16

Alert System
The Parties shall put into place a two-way alert system between their Regulatory Authorities in order to inform each other of products that have been found not to comply with applicable technical regulations or can pose an imminent danger to health, safety, or the environment.

ARTICLE 17

Confidentiality

1. Each Party shall maintain, to the extent permitted under its laws, the confidentiality of information exchanged under this Agreement. In particular, neither Party shall disclose to the public, nor permit a Conformity Assessment Body to disclose, information exchanged under this Agreement that constitutes trade secrets, confidential commercial or financial information, or information that relates to an ongoing investigation.

2. A Party or a Conformity Assessment Body may, on providing information to the other Party or a Conformity Assessment Body of the other Party, designate the portions of the information that it wishes to be kept confidential.

ARTICLE 18

Fees

Each Party shall endeavor to ensure that fees imposed by its Conformity Assessment Bodies for conformity assessment services with respect to products covered by this Agreement are commensurate with the services provided. Neither Party shall charge any fees with respect to conformity assessment services provided by the other Party that are covered by this Agreement.

ARTICLE 19

Territorial Application

1. This Agreement applies, on the one hand, to conformity assessment procedures performed on products in the territory of the United Kingdom, and, on the other hand,
to conformity assessment procedures performed on products in the territory of the United States.

2. Without prejudice to paragraph 1, this Agreement applies to products installed on ships entitled to fly the flag of one or more of the Parties, operating in international voyages, regardless of where they are located.

ARTICLE 20

Agreements with Other Countries

Except where the Parties agree otherwise in writing, no mutual recognition that one Party concludes with a non-Party (third party) shall be construed to require the other Party to accept the results of conformity assessment procedures performed in the territory of the third party.

ARTICLE 21

Entry into force, amendments, and termination

1. This Agreement shall enter into force on the date of the later notification in an exchange of written notifications between the Parties certifying that they have completed their respective internal requirements and procedures. In submitting a notification, the United Kingdom shall take account of its obligations arising in respect of any agreement between the European Union and the United Kingdom pursuant to Article 50 of the Treaty on European Union.

2. The Parties may amend this Agreement, including Annexes, through written agreement. The Joint Committee may also amend the Annexes to this Agreement in accordance with Article 7.

3. Either Party may terminate this Agreement by giving the other Party six months’ notice in writing.

4. Following termination of this Agreement, a Party shall continue to accept the results of conformity assessment procedures performed by conformity assessment bodies under this Agreement prior to termination, unless a Regulatory Authority of that Party decides otherwise based on health, safety, and environmental considerations or failure to satisfy other requirements within the scope of this Agreement.

ARTICLE 22
Final Provisions

1. This Agreement does not affect the rights and obligations of the Parties under any other international agreement.

2. The Parties shall review the functioning of this Agreement no later than two years after it enters into force and at regular intervals thereafter.

IN WITNESS WHEREOF the undersigned, being duly authorized by their respective Governments, have signed this Agreement.

DONE at Washington, D.C., in duplicate, this 14th day of February, 2019.

[Signatures]

For the United States of America

For the United Kingdom of Great Britain and Northern Ireland
ANNEX I

LEGISLATION, REGULATIONS, AND ADMINISTRATIVE PROVISIONS

Legislation, regulations, and administrative provisions of the United Kingdom:

The Merchant Shipping (Marine Equipment) Regulations 2016 as amended.

Legislation, regulations, and administrative provisions of the United States:

46 U.S.C. § 3306

46 CFR Parts 159 to 165
ANNEX II

PRODUCT COVERAGE FOR MUTUAL RECOGNITION

General note:

The international conventions apply in their up-to-date version. For the purpose of identifying correctly the relevant standards, test reports, certificates of conformity and declarations of conformity shall identify the specific testing standard applied and its version.

Navigation equipment

Notes applicable to this section:

1. Resolution A.1021(26) and Resolution MSC.302(87) shall be considered, as applicable, for all the navigation equipment - They refer to “Code on alerts and indicators, 2009,” and to “Adoption of performance standards for bridge alert management,” respectively.

2. IEC 61162 series refer to the following reference standards for Maritime navigation and radio-communication equipment and systems - Digital interfaces:

• IEC 61162- 1 (2016) - Part 1: Single talker and multiple listeners
• IEC 61162- 2 ed1.0 (1998- 09) - Part 2: Single talker and multiple listeners, high-speed transmission
• IEC 61162- 3 ed1.2 Consol. with am1 ed. 1.0 (2010- 11) and am2 ed. 1.0 (2014- 07) - Part 3: Serial data instrument network
• IEC 61162- 3 ed1.0 (2008- 05) - Part 3: Serial data instrument network
• IEC 61162- 3- am1 ed1.0 (2010- 06) Amendment 1 - Part 3: Serial data instrument network
• IEC 61162- 3- am2 ed1.0 (2014- 07) Amendment 2 - Part 3: Serial data instrument network
• IEC 61162- 450 ed1.0 (2011- 06) with am1 (2016)- Part 450: Multiple talkers and multiple listeners - Ethernet interconnection
