

**Report to Congress on
U.S. Contributions to International Organizations, Fiscal Year 2020
Section 4(b) of the United Nations Participation Act, 22 USC 287b(b)**

Section 4(b) of the United Nations Participation Act (22 U.S.C. § 287b(b)) calls for the Secretary of State to submit an annual report to Congress on the extent and disposition of all financial contributions made by the United States during the preceding year to international organizations in which the United States participates as a member. Section 312 of the Department of State Authorities Act, Fiscal Year 2017 (P.L. 114-323, “FY 2017 Authorities Act”) further requires the Director of the Office of Management and Budget to submit to Congress a report on all assessed and voluntary contributions with a value greater than \$100,000, including in-kind, of the U.S. Government to the United Nations and its affiliated agencies and related bodies during the previous fiscal year.

This report addresses both reporting requirements by describing U.S. Government contributions and other funding for international organizations and multilateral entities for fiscal year 2020. The report includes funding in support of certain multilateral entities that are not generally considered international organizations. The format of this report is similar to the report on contributions for FY 2018 and FY 2019. It includes the source of funds (including Federal agency and account) and a concise description of the purpose of such funding.

The report also specifies total funding from all sources for organizations in the UN system, the percentage of that total that U.S. contributions represent, and whether the Department considers contributions and other funding to be assessed, as required by Section 312 of the FY 2017 Authorities Act.

The amounts of U.S. government funding included in this report are amounts of funding obligated in fiscal year 2020. Some of the information contained in the report was provided by other Executive Branch agencies identified in the report. Each participating agency was responsible for the completeness and accuracy of the information provided. Not all Executive Branch agencies provided information

for inclusion in the report.

The Office of Management and Budget assisted with collection of information in the report and will also submit this report to Congress and post the report on its web site at <https://www.whitehouse.gov/omb/legislative/omb-reports/>, consistent with the FY 2017 Authorities Act. The amounts of total funding from all sources in the report are generally by calendar year, except for funding for UN peacekeeping missions. The amounts of total funding were obtained from publicly-available documents produced by the recipient entities. Information for some entities was not available when the Department produced this report.

The information provided on U.S. government funding includes financial and in-kind support, including assessed contributions, voluntary contributions, grants, and other funding to international organizations and multilateral entities. For each entry, the report provides specific information including: the responsible U.S. Government agency and bureau, the account that was the source of the funding, the recipient entity, a description of the purpose of the activity that the funding supported, the amount obligated, and whether the Department considers the amount provided to be an assessed contribution.

This report does not contain information on contracts for goods or services provided to the U.S. Government, the cost to the U.S. Government of the salaries and expenses of American employees detailed to the secretariats of international organizations, or the costs of reimbursing international organizations for taxes that American citizens and legal permanent residents employed by the organizations pay to U.S. federal, state, and local governments. Contributions to international financial institutions such as the International Bank for Reconstruction and Development are not included in this report but are the subject of a separate report to the Congress by the National Advisory Council on International Monetary and Financial Policies.

Once submitted to Congress in its final form, this report and annexes will be posted to the Department of State's public-facing web site at <https://www.state.gov/u-s-contributions-to-international-organizations/>.
