

THE AMERICAN SCHOOL IN JAPAN

ASSISTED SCHOOL SPECIAL NEEDS PROFILE

School situations can change quickly, particularly as schools face cutbacks to learning support programs due to the pandemic, unrest, and economic uncertainty. For the most current information, work with the REO and school. Information in this document was collected by the Department of State's Office of Overseas Schools directly from the school in fall 2022 and shows the availability of services rather than an assessment of the quality of the services. The profile is intended as a jumping off point for a conversation with the REO and school to understand the best fit for your child. Definitions may vary school to school. If a field is not specified, please reach out to the REO listed below for more information.

Founded in 1902, [The American School in Japan](#) is a private, coeducational day school, serving students from age 3 to grade 12 on two campuses: early learning center (nursery- pre-kindergarten -kindergarten) in Roppongi and the Chofu campus in western Tokyo (kindergarten-grade 12). The school serves students of all nationalities, with the majority having U.S. citizenship. The school year has two semesters. Read more on the [Overseas Schools Fact Sheet](#).

ADMISSIONS & SPECIAL NEEDS INFORMATION

The school's admission criteria and procedures can be found at [ASIJ Admissions](#).
