

AMERICAN SCHOOL OF BOMBAY

ASSISTED SCHOOL SPECIAL NEEDS PROFILE

School situations can change quickly, particularly as schools face cutbacks to learning support programs due to the pandemic, unrest, and economic uncertainty. For the most current information, work with the REO and school. Information in this document was collected by the Department of State's Office of Overseas Schools directly from the school in fall 2022 and shows the availability of services rather than an assessment of the quality of the services. The profile is intended as a jumping off point for a conversation with the REO and school to understand the best fit for your child. Definitions may vary school to school. If a field is not specified, please reach out to the REO listed below for more information.

The American School of Bombay, founded in 1981, is an independent, coeducational day school in Mumbai, India. The school offers a U.S.-style educational program from pre-kindergarten through grade 12. The school year extends from mid-August to early June. The school's structure, curriculum methods, and pedagogy integrate an American approach to education with the International Baccalaureate Program. Read more on the [Overseas School Fact Sheet](#).

ADMISSIONS & SPECIAL NEEDS INFORMATION

The school's admission criteria and procedures can be found at www.asbindia.org/join-our-school/admissions.
