

QSI INTERNATIONAL SCHOOL OF TBILISI (QSIT)

ASSISTED SCHOOL SPECIAL NEEDS PROFILE

NOTE: School situations can change quickly, particularly as schools face cutbacks to learning support programs due to the pandemic, unrest, and economic uncertainty. For the most current information, work with the REO and school. Information in this document was collected by the Department of State's Office of Overseas Schools directly from the school in fall 2022 and shows the availability of services rather than an assessment of the quality of the services. The profile is intended as a jumping off point for a conversation with the REO and school to understand the best fit for your child. Definitions may vary school to school. If a field is not specified, please reach out to the REO listed below for more information.

The QSI International School of Tbilisi (QSIT) is an independent, coeducational day school, which offers an educational program for students of all nationalities from two years of age through secondary (high school). The school was founded in 1995. The 2021-2022 school year is comprised of trimesters: August to December, January to April, and April to June. Read more on the [Overseas Schools Fact Sheet](#).
