

STAVANGER, NORWAY

THE INTERNATIONAL SCHOOL OF STAVANGER (ISS)

ASSISTED SCHOOL SPECIAL NEEDS PROFILE

NOTE: School situations can change quickly, particularly as schools face cutbacks to learning support programs due to the pandemic, unrest, and economic uncertainty. For the most current information, work with the REO and school. Information in this document was collected by the Department of State's Office of Overseas Schools directly from the school in fall 2022 and shows the availability of services rather than an assessment of the quality of the services. The profile is intended as a jumping off point for a conversation with the REO and school to understand the best fit for your child. Definitions may vary school to school. If a field is not specified, please reach out to the REO listed below for more information.

The [International School of Stavanger \(ISS\)](#) is a coeducational, English-language, day school enrolling students ages three through 18+. The school was established in 1966. Approximately 80% of its students are from families associated with NATO and the North Sea oil industry. The school year extends from mid-August to mid-June. Read more on the [Overseas Schools Fact Sheet](#).
