

KRAKOW, POLAND

THE INTERNATIONAL SCHOOL OF
KRAKOW (ISK)

ASSISTED SCHOOL SPECIAL NEEDS PROFILE

School situations can change quickly, particularly as schools face cutbacks to learning support programs due to the pandemic, unrest, and economic uncertainty. For the most current information, work with the REO and school. Information in this document was collected by the Department of State's Office of Overseas Schools directly from the school in fall 2022 and shows the availability of services rather than an assessment of the quality of the services. The profile is intended as a jumping off point for a conversation with the REO and school to understand the best fit for your child. Definitions may vary school to school. If a field is not specified, please reach out to the REO listed below for more information.

International School of Krakow (ISK) was established by the American School of Warsaw in 1993. In 1998, the growth of the (American) International School of Krakow allowed it to operate as an independent institution. In 2004, as a reflection of the changing student population, the school adopted an international program to better meet the needs of its students. In doing so, the school became International School of Krakow. Read more on the [Overseas Schools Fact Sheet](#).
