

Your Social Field

West

You ask the hard questions and
need the details;

You don't start something
without the full picture

You lead with inquiry and
promote thoughtful discourse.

*"You fill in the details of the
mosaic."*

North

You willingly take charge;
You can list the things that
need to be done and are ready to go;
You drive the work and get it done
-- often early.

*"You will stitch the mosaic together
and do the work."*

South

You take in the information, slow
the group down and make sure
everyone's voice is heard;
You make sure the human side is
considered.

*"You take care of us and make sure
everyone participates in the creation
of the mosaic."*

East

You have the big picture;
You need to see the final product
and will work with that in mind;
You don't start until you are clear
about the purpose.

*"You know what the mosaic
looks like in the end."*
