

MOROCCO

Technical Areas Endorsed by the Government of Morocco for U.S. Global Health Security Investments

* The World Health Organization (WHO) States Parties Annual Report (SPAR) is a publicly available self-assessment by the government of its global health security capacities. Scores presented here are based on a 5-point scale. Antimicrobial Resistance uses 2021 [Global Health Security Index](#) score as it is not included in the SPAR.

The U.S. has partnered with Morocco on Global Health Security (GHS) since 2023

Morocco conducted a Joint External Evaluation (JEE) in 2019

The U.S. Government (USG) GHS Program in Morocco

The U.S. partners with the Government of Morocco to strengthen capacities to prevent, detect, and respond to infectious disease threats. Areas of collaboration include strengthening antimicrobial resistance prevention, zoonotic disease detection and response, national laboratory systems, disease surveillance, and human resources.

U.S. investments support and build on those made by the Government of Morocco, in coordination with other partners and stakeholders. Current and planned GHS activities reflect national priorities, utilize the best available data, and align with the country context and the health system.
